Alain Resnais Qui Etesvous:

Landscapes of Loss Naomi Greene, 1999-04-18 In this book Naomi Greene makes new sense of the rich variety of postwar French films by exploring the obsession with the national past that has characterized French cinema since the late 1960s Observing that the sense of grandeur and destiny that once shaped French identity has eroded under the weight of recent history Greene examines the ways in which French cinema has represented traumatic and defining moments of the nation's past the political battles of the 1930s the Vichy era decolonization the collapse of ideologies Drawing upon a broad spectrum of films and directors she shows how postwar films have reflected contemporary concerns even as they have created images and myths that have helped determine the contours of French memory This study of the intricate links between French history memory and cinema begins by examining the long shadow cast by the Vichy past and shifting political and historical perspectives toward the nation's more distant past which also emerged in these years Finally the mood of nostalgia and melancholy that appears to haunt contemporary France is analyzed in the context of films about the nation's imperial past as well as those that hark back to a golden age a remembered paradis perdu of French cinema itself *Cinema as a Worldbuilding Machine in the Digital Era* Alain Boillat, 2022-08-09 This essay examines the primacy of worldbuilding in the age of CGI transmedia practices and high concept fiction by studying the principles that govern the creation of a multiverse in a wide range of film and TV productions Emphasis is placed on Hollywood sci fi movies and their on screen representation of imaginary machines that mirror the film medium following in the tradition of Philip K Dick's writings and the cyberpunk culture A typology of worlds is established as well as a number of analytical tools for assessing the impact of the coexistence of two or more worlds on the narrative structure the style uses of color editing practices the generic affiliation or hybridity the seriality and the discourse produced by a given film particularly in fictions linked to post 9 11 fantasies Among the various titles examined the reader is offered a detailed analysis of the Resident Evil film series Total Recall and its remake Dark City the Matrix trilogy Avatar Source Code and other time loop films TRON and its sequel Christopher Nolan's Tenet and several TV shows most notably HBO's Westworld but also Sliders Lost Fringe and Counterpart *Creative Encounters with French Films* Emily Zants, 1993 *Narration and Spectatorship in Moving Images* Barbara Fisher Anderson, Joseph D. Anderson, 2009-03-26 Philosophers and students of the arts have wondered since the time of Aristotle about the nature of aesthetic experience and how this experience can seemingly be evoked by works of art For more than a century producers and directors of motion pictures have made decisions about how to craft them based upon assumptions about complex stylistic devices and the effects such patterns of organization have on viewers Over the past few years film scholars have made considerable progress in analyzing the manifold connections that exist between stylistic patterns and aesthetic effects for moving images of all kinds In doing so they have increasingly drawn upon insights and methodologies derived from psychology The international conference from which this volume takes its contributions and its title was organized to

Fog the greatest film ever made But when Alain Resnais finished his documentary with its depiction of Nazi atrocities the resistance of the French censors was fierce A mere decade had passed since the end of the war and the French public was unprepared to confront the horrors shown in the film let alone the possibility of French complicity In fact it would be through Night and Fog that many viewers first learned as film critic Serge Daney put it that the worst had only just taken place An engrossing account of the genesis production and legacy of Resnais s incomparable film this book documents in extraordinary detail how a film that began as a cinematic spin off of an educational exhibition on resistance liberation and deportation went on to become a significant step in the building of a collective consciousness of the tragedy of World War II Sylvie Lindeperg frames her investigation with the story of historian Olga Wormser Migot who played an integral role in the research and writing of Night and Fog and whose slight error on one point gave purchase to the film s detractors and revisionists and Holocaust deniers Lindeperg follows the travails of Resnais Wormser Migot and their collaborators in a pan European search for footage photographs and other documentation She uncovers creative use of liberation footage to stand in for daily life of the camps featured to such shocking effect in the film a finding that raises hotly debated questions about reenactment and witnessing even as it enhances our understanding of the film s provenance and impact A microhistory of a film that altered the culture it reflected Night and Fog offers a unique interpretation of the interworking of biography history politics and film in one epoch making cultural moment
