initial portrayal of William Lescaze 1896-1969 as an unconventional figure straddling two continents this book challenges a long established interpretation that sees Lescaze exclusively as promoter of the International Style canons in the United States Moving beyond it this book focuses on the role that the Swiss architect played in defining the main features of New York social housing and in the evolution that marks the encounter between European modernity and an American federal scene still profoundly tied to local conventions From an initially difficult status as an migrant to his involvement in decisional processes and bureaucratic organisations Lescaze's professional progress coincides with the gradual acceptance of European forms and models which little by little became part of the institutional language related to public housing which would remain prevalent in New York City until the end of WWII Drawing from yet unpublished archival sources pertaining to two fields housing and architecture which have traditionally been separate in American historiography this book sheds light on many crucial issues in a branch of architecture that is particularly relevant today

The Palm Springs School: Desert Modernism 1934-1975 Alan Hess, 2025-02-11 Palm Springs is at the center of a unique tradition in architecture marked by invention and a sensitivity to local conditions that has resulted in design that exerts an influence far greater than the town's small size The book is the first to fully explore the wide ranging forms this architecture has taken from houses to gas stations hotels to airports banks to restaurants and spas Much more than a resort destination Palm Springs has served as a laboratory of the Modern here so much architectural innovation and design took form From the steel and glass boxes of Richard Neutra to the earthy organic homes of John Lautner and everything in between the solutions of architects and designers including notably William F Cody E Stewart Williams and Albert Frey were diverse and are ever more relevant in the face of contemporary challenges Their answers addressed questions that still hold urgency How to design sustainably in harsh climates How to use technology efficiently and creatively to meet those challenges How to build affordable and high quality mass produced housing How to reflect a region's culture economy and distinctive atmosphere Architects here responded to nature's climatological demands and Palm Springs became a center for innovations that were rooted in practice more than theory Benefitting from the architectural freedoms offered by the remoteness of the California desert designers explored new approaches that we can now identify as central to the Palm Springs School shown here in rich archival and contemporary photography
