Weiner, 2008-12 Americans Without Law shows how the racial boundaries of civic life are based on widespread perceptions about the relative capacity of minority groups for legal behavior which Mark S Weiner calls juridical racialism The book follows the history of this civic discourse by examining the legal status of four minority groups in four successive historical periods American Indians in the 1880s Filipinos after the Spanish American War Japanese immigrants in the 1920s and African Americans in the 1940s and 1950s Weiner reveals the significance of juridical racialism for each group and in turn Americans as a whole by examining the work of anthropological social scientists who developed distinctive ways of understanding racial and legal identity and through decisions of the U S Supreme Court that put these ethno legal views into practice Combining history anthropology and legal analysis the book argues that the story of juridical racialism shows how race and citizenship served as a nexus for the professionalization of the social sciences the growth of national state power economic modernization and modern practices of the self

More than a Historian Clyde Barrow,2018-04-17 Charles A Beard 1874 1948 was one of America s most influential historians and political scientists He played a major role in founding the disciplines of history and political science helped shape the teaching of social studies in the nation s public schools and was one the nation s most popular public intellectuals Yet in the second half of the twentieth century Beard s reputation has been eroded by relentless criticism Clyde W Barrow argues that Beard s work has renewed relevance in light of recent theoretical debates about the new institutionalism the crisis of the welfare state and American foreign policy messianism Barrow s takes Beard seriously as a political theorist while challenging many misconceptions For example Beard s method of economic interpretation has been dismissed as Marxist but Barrow carefully reconstructs the sources of Beard s thinking to demonstrate that his method owes more to historical and institutional economics and that his concept of state society relations was in fact derived from Madison s Tenth Federalist Barrow reconstructs Beard s theory of American political development using his concept of realistic dialectics which viewed the clash between democracy Jeffersonianism and capitalism Hamiltonianism as the engine of American political development During the 1930s Beard suggested that the United States was making the transition to a higher form of social and industrial democracy that would supersede the contradiction of American political development Notably Beard was a

critic of the New Deal and the liberal welfare state because they failed to reconstruct the economic relations that reproduce inequalities of income status and power Beard went on to voice his concern that at crucial junctures in American history class struggle is diverted into international conflicts as popular leaders back down from a direct confrontation with the dominant capitalist elite He analyzes American foreign policy as an extension of domestic economic policy and in particular a result of the failures of domestic economic policy Beard's conception of American history plays itself out in a tragic cycle of imperialism and diversion that left him a disenchanted realist This incisive study will be of interest to those interested in the evolution of historical thinking

Most Favored Nation Paul Wolman, 2000-11-09 *Most Favored Nation* discusses the movement for tariff revision under Republican administrations in the critical years preceding World War I Paul Wolman shows how and why some Republicans turned away from their party's and the nation's traditional tariff reduction and revision Wolman describes how the revisionists of this period developed a comprehensive program that sought to replace the logrolling system of protectionist interest trading that had prevailed in the United States since the 1860s In its place they proposed a multiple rate tariff embodying substantial reductions commercial reciprocity agreements especially with Germany France and Canada and a scientific tariff administered by a commission According to Wolman all revisionists hoped to further American leadership in an open door world economy But as their movement developed revisionists split into two competing groups One group the radical revisionists wished to use lower tariffs to restrain the growing power of corporations Led by agricultural implement manufacturer H E Miles of Wisconsin the radical revisionists hoped that freer importation of goods such as steel bars and billets would break the growing stranglehold of U S Steel and International Harvester on markets for intermediate goods and restore more competitive pricing The second group or cooperationists accepted the emerging hegemony of large corporations which were beginning to supplant traditional American proprietary enterprises Encouraged by Theodore Roosevelt and William Howard Taft these revisionists worked to rationalize the emerging corporate market system and U S foreign commercial relations without promoting anticorporate activism Wolman suggests that through both consensus and conflict the Republican revisionists of the McKinley Roosevelt and Taft era laid the foundation for modern systems of liberal trade In detailing how they did so Wolman offers new insights not only on the tariff question but also on related concerns in U S foreign economic policy including business state relations corporate development international treaty making and imperialism Originally published 1992 A UNC Press Enduring Edition UNC Press Enduring Editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print These editions are published unaltered from the original and are presented in affordable paperback formats bringing readers both historical and cultural value

The Whiteness of Child Labor Reform in the New South Shelley Sallee, 2004-01-01 Focusing on Alabama's textile industry this study looks at the complex motivations behind the whites only

route taken by the Progressive reform movement in the South In the early 1900s northern mill owners seeking cheaper labor and fewer regulations found the South's doors wide open Children then comprised over 22 percent of the southern textile labor force compared to 6 percent in New England Shelley Sallee explains how northern and southern Progressives who formed a transregional alliance to nudge the South toward minimal child welfare standards had to mold their strategies around the racial and societal preoccupations of a crucial ally white middle class southerners Southern whites of the better sort often regarded white mill workers as something of a race unto themselves degenerate and just above blacks in station To enlist white middle class support says Sallee reformers had to address concerns about social chaos fueled by northern interference the empowerment of white trash or the alliance of poor whites and blacks The answer was to couch reform in terms of white racial uplift and to persuade the white middle class that to demean white children through factory work was to undermine whiteness generally The lingering effect of this whites only strategy was to reinforce the idea of whiteness as essential to American identity and the politics of reform Sallee's work is a compelling contribution to and the only book length treatment of the study of child labor reform racism and political compromise in the Progressive era South
