Cabinet of Natural Curiosities Albertus Seba,2001 **On the Nature of Ecological Paradox** Michael Charles Tobias,Jane Gray Morrison,2021-05-18 This work is a large powerfully illustrated interdisciplinary natural sciences volume the first of its kind to examine the critically important nature of ecological paradox through an abundance of lenses the biological sciences taxonomy archaeology geopolitical history comparative ethics literature philosophy the history of science human geography population ecology epistemology anthropology demographics and futurism The ecological paradox suggests that the human biological and from an insular perspective successful struggle to exist has come at the price of isolating H sapiens from life sustaining ecosystem services and far too much of the biodiversity with which we find ourselves at crisis level odds It is a paradox dating back thousands of years implicating millennia of human machinations that have been utterly ruinous to biological baselines Those metrics are examined from numerous multidisciplinary approaches in this thoroughly original work which aids readers particularly natural history students who aspire to grasp the far reaching dimensions of the Anthropocene as it affects every facet of human experience past present and future and the rest of planetary sentience With a Preface by Dr Gerald Wayne Clough former Secretary of the Smithsonian Institution and President Emeritus of the Georgia Institute of Technology Foreword by Robert Gillespie President of the non profit Population Communication **The Complete Guide to Night and Lowlight Photography** Michael Freeman,2008 Aimed at serious photographers this lavishly illustrated guide takes a close look at every detail of lowlight photography Michael Freeman The Complete Guide to Digital Photography Mastering Digital Black White Photography offers in depth analysis of the many techniques photographers must master for night and lowlight shooting Point by point he discusses how to keep the camera steady what lenses and camera settings to use and how to best apply flash bracketing image stabilizing vibration

reduction and noise reduction He also outlines common lowlight situations from stormy weather and deep shade to twilight moonlight city lights and nightclubs Finally Freeman examines software programs and processes that will increase the quality of lowlight photographs The Low Light Photography Field Guide Michael Freeman,2014-04-29 In bright light it is easier to take a beautiful photograph with your DSLR When the sun starts to go down or you are shooting indoors a whole new skill set is needed This new addition to the successful Field Guide Series will help you shoot what potentially could be the most lovely image without the help of natural light No more harsh flash photographs with dreary backgrounds and no more blurry night shots that were exposed too long Opening with a section on the qualities of different kinds of low light the book then deals with ways of overcoming gloomy situations whether you are shooting hand held or on a tripod Post production fixes are also covered allowing you to turn difficult shots into real works of art *The Art of the Portrait* Norbert Schneider,2002 Cabinet of natural curiosities : based on the copy in the Koninklijke Bibliotheek, The Hague Albertus Seba,2005 **The Gaza Project** Cyrill Delvin,2014-08-31 At the same time eight year old Abdul heard a familiar hissing noise He had heard the sound several times before But never as close as loud and as short He and his little brother hadn t yet fully turned around when they saw the two missiles After that they didn t perceive anything for a long time The explosion tore the two brothers apart and severed them from everything they loved forever Even time had abandoned the moment Middle East Senator Reeds a multi billionaire has big plans His aim to substitute a useless peace summit with a promising economic summit He regards the availability of drinking water as the key to resolving the conflict between Israel and Palestine Hence his international consortium undertakes further research in improving the treatment of sea water Money and power for the benefit of humankind instead of war But this is a provocation to those who have benefited from the regional instability so far In its frantic course of events history has no place for the fears and hopes the despair and hatred of individuals But nevertheless three people brace themselves against it with all their force and power the Palestinian Abdoul Rahim the Israeli Abarron Preiss and the American Charles Reed They cannot and will not accept what is given Their motivation for pursuing what they personally believe in links their three destinies inextricably together cyrril delvin net

Renaissance works of Albrecht Dürer and other artists from the first centuries of printing. Subsequent illustrations include the seventeenth century real and imaginary animals of Matthäus Merian and the unique eighteenth century compilations of Albertus Seba. Nineteenth century images are drawn from sources as diverse as J. G. Heck's *Bilder Atlas*, the prints of Georges Baron Cuvier, William Jardine's 40 volume *Naturalist's Library*, bird illustrations by John James Audubon, Alexander Wilson, Edward Lear and many others, extraordinary butterfly and insect images by E. A. Seguy as well as animal illustrations from Victorian chromolithograph die cuts. The exquisite Edwardian bestiary of the Detmold brothers brings the collection into the twentieth century and ends with the imagery of contemporary dinosaur artist James Gurney. Detailed bibliographical information concerning every source, including biographical details of each artist, makes this collection a vital reference tool as well as a splendid resource of outstanding animal illustrations. Students of graphic art and illustration as well as graphic designers and advertising professionals will prize this treasury of material from many rare historic sources.
