Pedro Almodóvar may have helped put queer Iberian cinema on the map but there are multitudes of LGBTQ filmmakers from Catalonia Portugal Castile Galicia and the Basque Country who have made the Peninsula one of the world's most vital sources for queer film Together they have produced a cinema whose expressions of queer desire have challenged the region's conservative religious and family values while intervening in vital debates about politics history and nation *Indiscreet Fantasies* is a unique collection that offers in depth analyses of fifteen different films produced in the region over the past fifty years each by a different director from Narciso Ibáñez Serrador's *La residencia* *The House That Screamed* 1969 to João Pedro Rodrigues's *Ornithology* 2016 Contributors examine how queer Iberian cinema has responded to historical trauma from the AIDS crisis to the repressive and homophobic Franco regime and explore how these films demonstrate a fluid understanding of sexuality gender and national identity The result will give readers a new appreciation for the cultural diversity of Iberia and the richness of its thought provoking queer cinema Published by Bucknell University Press Distributed worldwide by Rutgers University Press

Sea Level Variability and Change Ivan D. Haigh,Marta Marcos,Sönke Dangendorf,Francisco Calafat,2017-04-27 In June 2015 we held a workshop on the beautiful island of Mallorca Spain with a focus on sea level variability and change Over 120 sea level experts from around the world attended this workshop from a range of different disciplines The main aims of the workshop were to 1 Evaluate the current state of knowledge of sea level science 2 Identify gaps and unresolved questions in any aspect of sea level science and 3 Design future research to address these issues All aspects of sea level changes were covered from global to regional observations and modelling processes driving mean sea level changes and extremes from the geological scale to the instrumental era and future projections and including impacts on the coastal zones This E Book presents papers that came out of that workshop Overall these papers illustrate the multi disciplinary nature of sea level research cross cutting many fields of research including oceanography meteorology geology coastal morphodynamics engineering and the social economic aspects Collectively these articles represent an interesting range of perspectives and original studies that contribute to understanding the dynamic nature of sea level and its impacts across a wide range of time and space scales Enjoy reading them
