The contributors show how different groups define the proper use of alcohol how State policies may effect drinking behaviour and highlight how beverages and comestibles must be seen in relation to each other. From this it is shown how important socio cultural distinctions are made between and within communities gender relations ethnic groups and socio economic groups and within religious ideologies what one drinks how one drinks with whom and where all influence not how alcoholic substances are regarded but how social relations are experienced. **Alcohol Gender and Culture** clearly demonstrates how the social construction of drinking may provide an analytical tool with which to approach different socio cultural groups and illustrates how any cultural group can be compared to another by its attitudes to alcohol.
