Alcoholism In The Professions:

Drinking Careers Martin A. Plant, 1979 The central concern of this book is the relationship between an individual's drinking habits and social setting The way in which a person drinks or does not drink is influenced by age sex religion nationality and possibly by personality and heredity In spite of this people's drinking habits frequently and sometimes dramatically change as do their experiences of the problems which if extreme or numerous enough are sometimes called alcoholism This book is an empirical rather than theoretical work It does not attempt to expound a general theory of either normal or deviant drinking Introduction
