Sunstein, Reid Hastie, John W. Payne, David A. Schkade, W. Kip Viscusi, 2008-12-19 Over the past two decades the United States has seen a dramatic increase in the number and magnitude of punitive damages verdicts rendered by juries in civil trials Probably the most extraordinary example is the July 2000 award of 144.8 billion in the Florida class action lawsuit brought against cigarette manufacturers Or consider two recent verdicts against the auto manufacturer BMW in Alabama In identical cases argued in the same court before the same judge one jury awarded 4 million in punitive damages while the other awarded no punitive damages at all In cases involving accidents civil rights and the environment multimillion dollar punitive awards have been a subject of intense controversy But how do juries actually make decisions about punitive damages To find out the authors experts in psychology economics and the law present the results of controlled experiments with more than 600 mock juries involving the responses of more than 8,000 jury eligible citizens Although juries tended to agree in their moral judgments about the defendant's conduct they rendered erratic and unpredictable dollar awards The experiments also showed that instead of moderating juror verdicts the process of jury deliberation produced a striking severity shift toward ever higher awards Jurors also tended to ignore instructions from the judges were influenced by whatever amount the plaintiff happened to request showed hindsight bias believing that what happened should have been foreseen and penalized corporations that had based their decisions on careful cost benefit analyses While judges made many of the same errors they performed better in some areas

suggesting that judges or other specialists may be better equipped than juries to decide punitive damages Using a wealth of new experimental data and offering a host of provocative findings this book documents a wide range of systematic biases in jury behavior It will be indispensable for anyone interested not only in punitive damages but also jury behavior psychology and how people think about punishment Smith, Currie & Hancock's Common Sense Construction Law Thomas J. Kelleher, Jr., Smith, Currie & Hancock LLP, 2009-01-27 Be prepared with the bestselling guide to the laws that govern construction Knowledge of construction law and employment law is essential to running a successful construction business This Fourth Edition of the bestselling Smith Currie Hancock s Common Sense Construction Law provides a practical introduction to the significant legal topics and questions affecting construction industry professionals Like its popular previous editions this Fourth Edition translates the sometimes confusing theories principles and established rules that regulate the business into clear lay person s English This new edition updates the comprehensive scope of its predecessors with Coverage of the newly issued and recently revised industry standard contract documents produced by the AIA ConsensusDOCS and EJCDC for 2007 2008 A CD featuring sample contracts and documents from AIA ConsensusDOCS and EJCDC that familiarizes readers with these important documents and aids in understanding document citations in the book Improved pedagogical tools and instructor support material for use in the classroom The most up to date and thorough guide to a sometimes intimidating but critical aspect of the practice of construction Smith Currie Hancock s Common Sense Construction Law Fourth Edition gives industry professionals the knowledge they need to avoid legal surprises and gain a competitive advantage **Product Liability Reform** United States.
