Alcohol and Aging Thomas P. Beresford, Edith Lisansky Gombert, 1995 U S census figures forecast that the percentage of U S citizens over the age of 65 will double between 1980 and 2030 Estimates that between 3 and 10% of this group are prone to alcohol abuse points to the potential for an increasingly ominous health care problem Alcohol and Aging the first comprehensive treatment of the topic written for clinicians covers a wide range of issues unique to elderly alcoholics from diagnosis and treatment to alcohol related medical and cognitive disorders from problems arising from interactions between alcohol and medication to the biochemistry of intoxication Throughout the book focuses on clinical practical problems and stays away from jargon making it accessible to a wide range of readers Featuring contributions a diverse group of specialists the book will be an invaluable aid to physicians psychiatrists clinical psychologists and social workers who treat alcoholism in the aging population

Handbook of Drug Abuse Prevention Zili Sloboda, William J. Bukoski, 2007-08-06 There are a number of reasons why this book is important First there is no one source that summarizes what we know about the prevention of substance abuse from the research field so the book serves as a repository of accumulated knowledge on prevention theory intervention design and development and prevention research methodology Second as an evolving field prevention science has only begun to assert itself in both the arenas of practice and

policy The formation of the Society for Prevention Research in 1991 was the first recognition that a science of prevention existed and required a separate forum to present the rapidly growing content of the field for discussion and review Finally there is a need to establish a baseline a reference point against which progress in the field of prevention science can be assessed This book serves all of these purposes The idea for this book grew from the observation in the early 1990s that after decades of attempts to develop effective interventions to prevent drug use among children and adolescents in the United States that we were finally having success particularly in addressing the initiation of use These successes are the result of research that has provided a better understanding of the factors and processes associated with the onset of substance use

Drug Use and Ethnicity in Early Adolescence William A. Vega, Andres G. Gil, 2006-04-11 This book presents new and important information about adolescent drug use The book is intended for human service professionals teachers researchers and students interested in the issue of early adolescent drug use and its causes and pervasiveness in a multiethnic population Today the field of adolescent drug use research relies on integrative models that permit competing explanations of drug use This approach promotes flexibility in testing hypotheses pertinent to adolescents of very different social and cultural backgrounds or personal characteristics Longitudinal studies including the one presented in these pages have identified many risk and protective factors or processes that are linked to adolescent drug use We review these throughout this book and present new information from our own research Our point of departure is to extend and elaborate descriptive research and models of adolescent drug research to cover the unique and diverse experiences of adolescents who are Hispanic African American and White non Hispanic Current Catalog National Library of Medicine (U.S.), First multi year cumulation covers six years 1965-70 **Addiction Counseling Competencies**, 2006 Criminal Behavior Elaine Cassel, Douglas A. Bernstein, 2007-04-03 Criminal Behavior explores crime as a developmental process from birth through early adulthood It further examines the role that legal political and criminal justice systems play in the development of criminal behavior

National Library of Medicine Current Catalog National Library of Medicine (U.S.), 1988 *Treating Drinkers and Drug Users in the Community* Tom Waller, Daphne Rumball, 2008-04-15 Treating Drinkers and Drug Users in the Community is the second book in a new collection from Addiction Press Addiction Press was set up with the express purpose of communicating current ideas and evidence in this expanding field not only to researchers and practising health professionals but also to policy makers students and interested non specialists These publications are designed to address the significant challenges that addiction presents to modern society The drugs field has undergone a phase of rapid change in recent years and all the non medical treatment interventions for those with alcohol problems and dependence can be equally helpful for drug users This has opened the way for unification of alcohol and drug treatment services at a clinical level with potential for more efficient service provision and for effective interventions which can be readily adopted in a wide range of settings Modern drug and alcohol services and all professionals working with substance users will benefit from the initiatives and procedures

discussed in this book Key features Describes a wide range of treatments for young people and adults with drug and alcohol dependence Integrates alcohol and drug prevention and treatment Provides an invaluable and accessible guide for many different professionals Sets out assessment criteria questionnaires and a joint treatment framework **Sourcebook of Psychological Treatment Manuals for Adult Disorders** Michel Hersen,Vincent B. Van Hasselt,2013-11-11 Here is a practical reference offering mental health professionals 16 state of the art methods for treating a variety of problems presented by outpatient and inpatient adult clients Supported by ample clinical illustrations each chapter offers sufficient information so that the respective methods can be replicated Problems include obsessive compulsive disorder depression schizophrenia and obesity The book also examines contemporary issues of accountability in treatment This handbook meets the needs of psychologists psychiatrists counselors social workers rehabilitation specialists and graduate students

Adolescent Drinking and Family Life Geoff Lowe,David R. Foxcroft,David Sibley,2022-12-29 Originally published in 1993 Adolescent Drinking and Family Life portrays teenage drinking not as a symptom of pathology but as a perfectly normal developmental phase within the context of the home environment Drinking is predominantly social behaviour and the family is seen as a major agent of socialization The authors have therefore explored family dynamics and the influence which the home environment has upon adolescent drinking to come up with a new theoretical model A major feature of this approach is the interaction of ideas from family life psychology and human geography The authors present a typology of domestic regimes illustrated by case studies of boundary enforcement and transgression The general theme of boundary transgression applied here to both the psychosocial environment and built form represents an interesting new theoretical perspective The integration of these two fields is an innovation which should stimulate further interdisciplinary work in adolescence and addiction research Adolescent Drinking and Family Life will be interesting to researchers and practitioners in adolescence family dynamics and alcohol as well as any social scientist with an interest in the link between behaviour and the home environment This new approach had important implications for health education and for interventions concerned with adolescent alcohol use at the time Today it can be read in its historical context *Clinical Guide to Alcohol Treatment* Robert J. Meyers,Jane Ellen Smith,1995-08-04 This book is the first complete guide to implementing the Community Reinforcement Approach CRA an empirically based highly effective cognitive behavioral program for treating alcohol problems CRA acknowledges the powerful role of environmental contingencies in encouraging or discouraging drinking and attempts to rearrange these contingencies so that a non drinking lifestyle is more rewarding than a drinking one Unique in its breadth the approach utilizes social recreational familial and vocational strategies to aid clients in the recovery process This authoritative manual is a hands on guide to applying these therapeutic procedures The authors present a step by step guide to each component of the treatment plan many of which have been shown to be effective forms of treatment in themselves Topics include behavioral skills training social and recreational counseling marital therapy motivational

enhancement job counseling and relapse prevention Each chapter provides detailed instructions for conducting a procedure describes what difficulties to expect and presents strategies for overcoming them Sample dialogues between clients and therapists annotated by the authors further illuminate the treatment process The book concludes with a chapter that both addresses the common mistakes made when implementing CRA and emphasizes the flexibility and benefits of this total treatment plan This book is an invaluable resource for a wide range of practitioners including psychologists psychiatrists substance abuse counselors and social workers **Alcohol, Other Drugs, and Behavior** John Jung, 2010 Excellent text for covering alcohol and other drugs of abuse **Handbook of Alcoholism** Gerald Zernig, Alois Saria, Martin Kurz, Stephanie O'Malley, 2000-03-24 While the war on drugs continues to attract world attention it is often overlooked that alcoholism remains a major worldwide health concern No matter what your expertise the CRC Handbook of Alcoholism can help you acquire the necessary skills to treat problem drinkers and alcohol dependent patients In three sections Patient Care Research
