William R. Miller

Alcoholism A Treatment Manual:

Alcoholism, a Treatment Manual Wayne Poley, Gary Lea, Gail Vibe, 1979 This book provides a general introduction to and description of North America's major drug of abuse alcohol. Multidisciplinary in approach, the Manual addresses itself to the variety of methods. The reader is given observable behavioural and here and now techniques for treatment as well as answers to such fundamental questions as: What effects does alcohol have on the individual? How do we treat the alcoholic? How successful are we in our efforts? The Manual was written as a guide for frontline workers, those who need practical answers to questions that are beyond the scope of the alcohol clinic pamphlet but are too general for the highly technical or specialized reference work. It should appeal to counselors, therapists, educators, physicians, nurses, law enforcement officers, administrators and social workers. It will also be of interest to lay readers interested in the field of alcoholism and its treatment. *Alcoholism* Wayne Poley, Gary Lea, Gail Vibe, 1979

Handbook of Child and Adolescent Treatment Manuals Craig W. LeCroy, 1994 In the field of child and adolescent therapy there are numerous books describing theories and techniques of treatment. Until now there has been no clear presentation of how such theories translate into day to day practice. Craig LeCroy offers specific treatment manuals for carrying out particular programs including group treatment for children of divorce, for social skills training, and for the prevention of drug use, as well as treatment of childhood anxiety and depression, of academic problems, of conduct disorders, and for anger management, among others. Each treatment manual is based on extensive field testing by the author. The Handbook of Child and Adolescent Treatment Manuals provides practitioners, students, and researchers with specific methods and procedures used with children and adolescents. Each chapter is a specific treatment guide that has been tested and carefully refined through use, presenting concrete step by step instructions for effectively treating various child and adolescent behavior problems. The book covers the major clinical disorders and social problems facing children and adolescents, as well as new developments and refinements in the treatment of these problems. Experts in the field provide descriptions of treatment approaches for rational emotive therapy with children, social skills training, anger control training, adolescent relapse prevention, divorce adjustment groups, parent adolescent conflict, and more. The Handbook of Child and Adolescent Treatment Manuals is designed to be an important reference handbook for practitioners in various child and adolescent settings including schools, mental health clinics, residential treatment centers, group homes, family service agencies, and juvenile correction centers.
