

ALCOHOLISM AND HOMOSEXUALITY: A THEORETICAL PERSPECTIVE

Peter M. Nardi, PhD

ABSTRACT. Although causal relationships between homosexuality and alcoholism have not been established, the myths and assumptions surrounding this issue are numerous. Much of the available literature on the subject is from a psychoanalytic perspective, emphasizing latent homosexuality as a cause of alcoholism. Very little is from the perspective of gay and lesbian populations. This paper analyzes the assumptions underlying the biological and genetic approaches, learning theory, psychoanalytic perspectives, and sociological models as they relate to alcoholism and homosexuality.

Despite some indication of a high estimated rate of alcoholism among homosexuals (Eifield, 1975; Lohrenz, Connelly, Coyne, & Spare, 1978; Saghir & Robins, 1973), relatively little research focuses directly on the subject. This is due in part to the difficulty in delineating a representative sample of homosexual alcoholics. Alcoholism is difficult enough to define, and finding a cross-section of homosexuals (both open gays as well as those still repressed) is unrealistic. It is also due in part to the traditional resistance in social science to studying homosexuality. In either event, the available material is severely limited and of questionable reliability as the following analysis reveals.

The *Journal of Studies on Alcohol* is one of the most important publications in the alcohol field, publishing original articles and abstracts of current alcohol literature. The *Journal's* index serves as an important resource for the field of alcohol studies, with thousands of citations each year. From 1951 through 1980, however, there were only 42 references under the heading of homosexuality.¹

Dr. Nardi is Associate Professor of Sociology at Pitzer College, Claremont, California. The author wishes to thank Barry Adam, Andrew Berner, Stephen Murray, Farrell Webb, and Thomas Ziebold for their comments and suggestions.

¹Abstracting has not always been as systematic or comprehensive as in recent years. There is, however, no indication that references to homosexuality have been systematically omitted. If errors exist, they probably are randomly distributed throughout the years and across various subtopics. Thus, the numbers in Table 1 should be regarded as not absolute but rather as suggestive of the relative proportion of articles on the subject.

Alcoholism And Homosexuality Journal Of Homosexuality:

Gay Men, Drinking, and Alcoholism Thomas S. Weinberg, 1994 Alcohol use is an integral part of the gay world According to some estimates the rate of problem drinking is about three times higher among gays than in mainstream society but few researchers have examined this phenomenon in depth Thomas S Weinberg s ethnographic study provides new insight into the role of drinking in the gay male community Weinberg utilizes interviewing and participant observation techniques in a variety of drinking related settings in the gay subculture of Paradise City the fictitious name of a large western city where he carried out his research Emphasizing drinking as social behavior Weinberg explores the ways social contexts such as bars love relationships and reference groups affect individual drinking patterns and concludes that drinking is intimately entwined with friendship networks and extended families in the gay world Weinberg is concerned not only with alcoholism but with variation in alcohol use and changes in alcohol use over time He employs the concept of career to explain why and how an individual s drinking might either increase or decrease over the course of his lifetime Letting his informants speak for themselves Weinberg directs attention to their own perspectives on the meaning of their drinking behavior After creating a typology of drinkers including self defined as well as researcher defined alcoholics Weinberg considers alternative explanations for gay problem drinking He thoroughly explores the gay bar scene its importance in gay life and the way that interactions within the bar environment affect drinking and risk taking specifically as they relate to HIV Weinberg also looks closely at self defined gay alcoholics and considers three alternative explanations for gay problem drinking the alienation thesis the influence of parental role models and reference group theory He rejects the alienation thesis and the influence of parental role models because these causal factors were not borne out by his statistical correlations Instead Weinberg finds the most powerful explanation in reference group theory which links individuals behavior to the norms of the social groups they identify with Finally he arrives at a processual model of gay problem drinking based on his data analysis By comparing alcohol use in the homosexual and heterosexual communities Weinberg provides a new perspective on gay problem drinking that will interest sociologists psychologists and clinicians as well as concerned lay readers in the gay community He cites examinations of large scale survey research on tavern attendance and drinking ethnographic studies of bar behavior literature on special groups and studies of marital interaction in alcoholic families concluding that gay drinking is a special situation that only reference group theory and a processual model adequately address The closing chapter contains policy recommendations for reducing alcohol use in the gay community
