Shore, 1997-11-25 Substance abuse is one of higher education s worst problems not only in terms of financial but also human

cost Drawing upon current theory and research this handbook arrives at practical solutions to these problems While there are divergent models of research and practice in substance abuse which have led to competing models of intervention treatment and prevention this book seeks to reconcile those differences It allows the reader to understand substance abuse from theoretical research perspectives and guides the reader from conceptualization to programming to intervention with the substance abusing student The book is divided into three parts The first deals with ways of conceptualizing substance abuse and the models which have been the basis for developing intervention strategies Theories of how substance abuse problems develop are discussed and some suggestions are given as to how these theories may guide prevention intervention and treatment The second part focuses on how one should establish policies and programming on campus and how these programming and policy decisions can help in prevention strategies The final part outlines how one can assess intervene and provide treatment for a substance abuser Included here is a chapter on self help groups and how they may be used in support of treatment and aftercare

Pain and Chemical Dependency Howard Smith M.D., Steven Passik, 2008-04-25 Both pain and addiction are tremendous public health problems Practitioners of every stripe say that they learned precious little about pain or addiction in their training and readily admit that instruction on the interface of pain and addiction is nonexistent The recent problem of prescription drug abuse has only served to highlight the fact that these two worlds need unification those who treat pain must be informed about the risks of controlled substances and those who treat addiction need to better and more fully understand their benefits Nowhere is the pooled knowledge of pain management and addiction medicine brought together to allow for a greater appreciation of the risks of addiction when treating people with pain and the pain problems of those with chemical dependency This major new volume brings this vast knowledge base together presenting an array of perspectives by the foremost thought leaders at the interface of pain and chemical dependency and is the most comprehensive resource on the subject to date There have been an increasing number of seminars devoted to this topic and a new society The International Society on Pain and Chemical Dependency has recently been formed and this volume is destined to become the classic text on this multidisciplinary subject It will appeal to anesthesiologists neurologists rehab physicians palliative care staff pain center physicians and psychologists

Chemical Dependency and Intimacy Dysfunction Eli Coleman, 1988. The failure to deal with social sexual issues may impair the progress of recovery in a chemically dependent individual and his or her family. The failure to deal with sexual compulsivity in intravenous drug abusers may seriously impair our ability to deal with AIDS. The failure to deal with chemical dependence may render family therapy ineffective in the treatment of sex offenders. Despite the connection between chemical dependency and intimacy dysfunction, the intimacy concerns are rarely recognized in the diagnosis, treatment and aftercare of the chemically dependent person and his or her family. In this pioneering work, experts in the fields of chemical dependence and human sexuality provide professionals with information and skills to deal with intimacy dysfunction issues, offering hope for improving treatment and rehabilitation of chemically dependent individuals and their families. Typical intimacy dysfunctions are explored as well as treatment methods and strategies that have proven to be effective. A valuable resource guide, this comprehensive volume addresses the key issues in the multidisciplinary approach to the study of chemical dependency and intimacy dysfunction.

College Drinking

George W. Dowdall,2023-07-03 Drinking is recognized as one of the most important problems confronting students on campus today with major impacts on health and safety This book answers crucial questions about why students drink examines its complex links to campus crime and sexual assault and offers new insights on how to address the issue It differs from other studies of college drinking by dispelling the myth that the problem is universal Dowdall s research reveals that the incidence of alcohol abuse varies enormously between colleges and in doing so identifies interventions and policies that have been effective and those that have failed His study is also unique in looking upstream at the broader cultural organizational and social forces that shape this behavior where most studies focus only on downstream behaviors well after students have selected their college and have started drinking Students and parents can take action to lower the risk of binge drinking by following the book s recommendations and consulting the data it provides about alcohol violations and crime at thousands of colleges For administrators and student affairs personnel it both defines and illuminates the issue and outlines effective interventions
