Changing Substance Abuse Through Health and Social Systems William R. Miller, Constance M. Weisner, 2012-12-06 In both developed nations and the developing world there is a clear trend towards addressing alcohol tobacco and other drug problems through health and social services There are several persuasive arguments for this shift beyond pure economics which include comorbidity cost effectiveness coordination of care and effectiveness This is the first volume to pull together effective methods that can be used for addressing substance abuse through health and social service systems It also integrates interventions for a range of drugs of abuse rather than focusing on only one such as alcohol The book's international perspective also makes this a unique contribution to the existing literature

Drug Misuse Jan Keene, 2013-11-11 dependence and second to inform about prevention harm minimization treatment and control in order that professionals can identify assess and work with different kinds of drug misusers It also aims to give information about the wide range of multidisciplinary and specialist professionals who can contribute in this field

BACKGROUND The ancient Greek word for drug has three meanings a cure or remedy a poison and a magical charm This book will consider these meanings in the modern sense drugs as medication and as a solution to problems drugs as dangerous to health and drugs as magical and hedonistic In the recent past policy and practice guidelines have often been based on a misunderstanding of the diversity and complexity of drug misuse Professionals have confused different types of drug misuse and or attempted to compress all types into one narrowly defined category i.e. all drugs are good or bad This is the first mistake it is preferable to go right back to the ancient Greeks and try to understand the range of different effects of drugs on different people

Practitioners first of all need to understand the complexity of drug misuse in order to develop realistic concepts and construct useful categories for assessment. After this they are in a position to identify clearly the main risks and problems in the different categories and so to determine which type of intervention is most appropriate. Alcohol, Drugs and Health Promotion in Modern Ireland Shane Butler, 2002. Broadening the Base of Addiction Mutual Support Groups Jeffrey D. Roth, William L. White, John F. Kelly, 2016-04-08. Mutual help groups have proliferated, diversified and adapted to emerging substance-related trends over the past 75 years and have been the focus of rigorous research for the past 30 years. This book reviews the history of mutual support groups for addiction that have arisen as adjuncts or alternatives to Twelve Step Programs, including secular mutual support groups like Secular Organization for Sobriety, Smart Recovery and Women for Sobriety, and faith-based mutual support groups like Celebrate Recovery. It also considers the mutual support groups attended by families and friends of addicts. These mutual support groups are examined in terms of their histories, theoretical underpinnings and intended communities. The structures common in mutual support groups have influenced the rise of a new recovery advocacy movement and new recovery community institutions such as recovery ministries, recovery community centers, sober cafes, sober sports clubs and recovery-focused projects in music, theatre and the arts. This volume explores how collectively these trends reflect the cultural and political awakening of people in recovery and growing recognition and celebration of multiple pathways of long-term addiction recovery. This book was originally published as a special issue of the *Journal of Groups in Addiction and Recovery*.
