February 2009 a Boeing 737 800 flight TK1951 operated by Turkish Airlines was flying from Istanbul in Turkey to Amsterdam Schiphol Airport There were 135 people on board During the approach to the runway at Schiphol airport the aircraft crashed about 1.5 kilometres from the threshold of the runway This accident cost the lives of four crew members and five passengers 120 people sustained injuries The crash was caused by a malfunctioning radio altimeter and a failure to implement the stall recovery procedure correctly

Air Transport in the 21st Century John F. O'Connell,George Williams,2016-12-05 Airlines are buffeted by fluctuating political and economic landscapes ever changing competition technology developments globalization increasing deregulation and evolving customer requirements As a consequence all sectors of the air transport industry are in a constant state of flux The principle aim of this book is to review current trends in the airline industry and its related suppliers thereby providing an insight into the forces that are changing its dynamics The factors that are reshaping the structure of the industry are examined with a view to identifying the key issues whose impact will be critical in the future The book features two very distinct sections The first contains short contributions from industry executives at CEO VP level from airlines aircraft engine manufacturers safety and navigational provider organisations who have set out their take of where the airline industry is heading This commercial input sets the scene for the book and provides the bridge to the second section which is composed of 18 chapters written by distinguished academic authors Each chapter presents a valuable insight into a specific area of the air transport industry including airlines airports cargo deregulation the environment

navigation strategy information technology security and tourism The shared objective of the authors is to describe and explain the core competencies that are determining the current shape of the industry and to examine the forces that will change its direction going forward The book is written in a management style and will appeal to all levels of personnel who work for airlines across the world It is also written for airport authorities aerospace manufacturers regulatory and government transportation agencies researchers and students of aviation management transport studies tourism and the wider air transport industry

Fall of Ice from the Sky BIMAL K SRIVASTAVA, 2021-06-06 Reports of the Incidents of fall of large ice blocks from the sky have been appearing in media since times These ice chunks also known as Blue ice or Aircraft Ice happen to be the frozen mixture of human bio waste and liquid disinfectant that emerge in the form of the leakage from the defective toilet lines from a commercial airliner or any other transport category aircraft carrying passengers The book gives an account of more than 600 such cases of ice fall worldwide extracted from various languages Many people believe that the colour of ice blocks fallen from the aircraft toilets must be Blue or Green but as a matter of fact it could be of any colour blue green yellowish rusty muddy ash white dirty or colourless These ice blocks are potential hazards that are likely to endanger the lives and properties on the ground As the incidents are generally viewed from the perspective of weather and therefore no preventive measures are contemplated against them However a majority of them are actually found to be aviation related and thus there appears to be some possibility of minimising them provided appropriate precautionary measures are taken and implemented in the matter by the airlines regulatory authorities for aviation and other concerned This is the first occasion that a book on the topic of ice fall from the sky has been written by an aviation expert who has done it after conducting high quality research work considering various aeronautical aspects as well as the facts figures related to aviation Satendra Singh Former DGCA India

Design in Airline Travel Posters 1920-1970 David Scott, 2021-01-18 This book studies design in airline travel posters of the 1920 1970 period It is both a semiology and a sociocultural cultural history that explores the way advertising posters combine information and fantasy to create seductive images texts The book is lavishly illustrated in colour the images constituting part of the overall argument The field of poster studies is vast but it is surprising how little work has been done till date on the fundamental structures semiotic and semantic that underpin the visual messages posters produce Most studies of posters focus either on their history on specific themes politics travel sport cinema or on their status as collectable items Though such approaches are valid they hardly account for the specificity of the poster s appeal or for the complex semiotic and cultural issues poster art raises This book sets out to tackle these latter issues since they are fundamental both to the deeper significance and to the wider appeal of the poster as a cultural form In doing so it focuses on the field of airline travel posters which developed precisely in the period of the twentieth century 1920 1970 that coincided with the onset of mass travel
