

Songs of the Humpback Whale

Whales breathe from protrusible blowholes. A blowhole, sometimes accompanied by a small, fleshy, cone-shaped protuberance, is located on the dorsal surface of the animal. Whales also have dorsal fins, but these are not homologous with the fins of fish. In fact, the dorsal fin of a whale is a fleshy, leathery structure, supported by the ribs through a series of cartilage, which are not homologous with those of fish. During a blow, an air-breathing whale sends forth a tremendous, atomized white blow, the height of which varies according to the size of the whale. "Spouting," however, is not synonymous with the release of moisture in the form of "blowing." Quite apart from any definite respiratory use, "right whale" blows show the blowholes going into the water, and "blowing" also is used by the animal to indicate its presence above the surface of the water. In fact, the blow of a whale is a signal that the animal is there. Being a gas, it travels faster than the movement of the body, and therefore, it is often the first indication of the presence of a whale. The blowholes of baleen whales are far larger than those of toothed whales. The smallest blowholes are those of the sperm whale, which is the smallest of all whales. The blow of a sperm whale is a series of short, sharp puffs, and the blow of a humpback whale is a series of long, low, rolling waves.

Album Of Whales:

Album of Whales Tom McGowen, 1980-01-01 Introduces various types of whales dolphins and porpoises **The Sounding of the Whale** D. Graham Burnett, 2022-12-22 This wonderful book documents the interplays among science conservation and politics in the evolving career of the whale over the last century William Perrin Senior Scientist for Marine Mammals at the Southwest Fisheries Science Center NOAA Fisheries Service From biblical times whales have breached in the human imagination as looming figures of terror power confusion and mystery In the twentieth century however our understanding of and relationship to these superlatives of creation underwent some astonishing changes and with *The Sounding of the Whale* D Graham Burnett tells the fascinating story of the transformation of cetaceans from grotesque monsters useful only as wallowing kegs of fat and fertilizer to playful friends of humanity bellwethers of environmental devastation and finally totems of the counterculture in the Age of Aquarius When Burnett opens his story ignorance reigns even Nature was misclassifying whales at the turn of the century and the only biological study of the species was happening in gruesome Arctic slaughterhouses But in the aftermath of World War I an international effort to bring rational regulations to the whaling industry led to an explosion of global research and regulations that while well meaning were quashed or widely flouted by whaling nations the first shot in a battle that continues to this day The book closes with a look at the remarkable shift in public attitudes toward whales that began in the 1960s as environmental concerns and new discoveries about whale behavior combined to make whales an object of sentimental concern and public adulation A sweeping history grounded in nearly a decade of research *The Sounding of the Whale* tells a remarkable story of how science politics and simple human wonder intertwined to transform the way we see these behemoths from below *War of the Whales* Joshua Horwitz, 2015-07-21 Joel Reynolds a crusading attorney and Ken Balcomb a marine biologist teamed up to expose the truth behind a submarine detection system that floods entire ocean basins with high intensity sound and drives whales onto beaches **The Culture of Feedback** Daniel Belgrad, 2019-08-30 When we want advice from others we often casually speak of getting some feedback But how many of us give a thought to what this phrase means The idea of feedback actually dates to World War II when the term was developed to describe the dynamics of self regulating systems which correct their actions by feeding their effects back into themselves By the early 1970s feedback had become the governing trope for a counterculture that was reoriented and reinvigorated by ecological thinking *The Culture of Feedback* digs deep into a dazzling variety of left of center experiences and attitudes from this misunderstood period bringing us a new look at the wild side of the 1970s Belgrad shows us how ideas from systems theory were taken up by the counterculture and the environmental movement eventually influencing a wide range of beliefs and behaviors particularly related to the question of what is and is not intelligence He tells the story of a generation of Americans who were struck by a newfound interest in and respect for plants animals indigenous populations and the very sounds around them threading his tapestry with cogent

insights on environmentalism feminism systems theory and psychedelics The Culture of Feedback repaints the familiar image of the 70s as a time of Me Generation malaise to reveal an era of revolutionary and hopeful social currents driven by desires to radically improve and feed back into the systems that had come before How the World Flows Albert Folch,2025 How the World Flows acts like a microscope that pulls the reader into the barely noticeable Lilliputian world of fluids at small scales the microfluidic world and answers the question What is microfluidics in non technical language Microfluidics is the field of science that studies fluids constrained to spaces that are smaller than one millimeter wide and by extension the engineering field which builds devices that exploit the unique properties of fluids at these scales Author Albert Folch explores this micro science which has inspired engineers to build devices such as engines spray cans ballpoint pens inkjet and 3D printers pregnancy and Covid tests glucometers asthma nebulizers kidney dialysis machines and DNA analyzers This book also shows that many processes essential to life on Earth such as the formation of raindrops the rise of sap in plants and the percolation of water through soil are all microfluidic marvels It examines how our cells breathe feed and fight diseases through small capillaries Many ancient human inventions ranging from soaps and sauces to the candle wick the gauze and the ink brush rely on microfluidics but the size of the fluid interactions in these systems natural and human made has prevented most people from appreciating their inner workings Through engaging and digestible stories Folch takes a lens to this tiny science and demonstrates how big a role microfluidics play in life as we know it **Whale Quest** Karen Romano Young,2017-08-01 Decades of commercial whaling nearly decimated a variety of whales considered a keystone species Keystone species are indicators of the overall health of Earth s habitats While whales have made a comeback through an international ban on commercial whaling they are still threatened with extinction Global warming water and noise pollution and commercial shipping and fishing are among the most serious threats to whale survival Meet the scientists citizen scientists researchers whale watching guides and other concerned citizens who are working together to protect whale populations around the globe Learn about whale biology habitats and behavior and discover more about the high technology tools that help researchers in their work **A Book of Noises** Caspar Henderson,2023-11-03 A Little Book of Noises gathers together sounds from the cosmos the natural world the human world and the invented world as well as containing pockets of silence From the vast sound of sand in the desert to the tuneful warble of a songbird from the meditative resonance of a temple bell to the improvisational melodies of jazz this is a celebration of all things auraculous or ear marvelous Sound shapes our world in invisible but significant ways and writer Caspar Henderson brings his characteristic curiosity and knowledge to the subject to take us on an exhilarating journey to examine noise related to humans anthropophony other life biophony our planet geophony and space cosmophony **Among Whales** Roger Payne,1995 Taking readers on a journey across the spectrum of life to discover the answers to the larger questions of life on Earth an eminent field biologist addresses a wide range of subjects from the purpose of the brain to the possibilities of peaceful

cohabitation among the world's creatures 9 charts **Making Rumours** Ken Caillat, Steve Stiefel, 2012-03-05 Inside the making of one of the biggest selling albums of all time Fleetwood Mac's Rumours Fleetwood Mac's classic 1977 Rumours album topped the Billboard 200 for thirty one weeks and won the Album of the Year Grammy More recently Rolling Stone named it the twenty fifth greatest album of all time and the hit TV series Glee devoted an entire episode to songs from Rumours introducing it to a new generation Now for the first time Ken Caillat the album's co producer tells the full story of what really went into making Rumours from the endless partying and relationship dramas to the creative struggles to write and record You Make Loving Fun Don't Stop Go Your Own Way The Chain and other timeless tracks Tells the fascinating behind the music story of the making of Fleetwood Mac's Rumours written by the producer who saw it all happen Filled with new and surprising details such as Stevie Nicks and Lindsey Buckingham's screaming match while recording You Make Loving Fun how the band coped with the pressures of increasing success how the master tape nearly disintegrated and the incredible attention paid to even the tiniest elements of songs from Lindsey playing a chair to Mick breaking glass Includes eighty black and white photographs ***Unveiling the Whale*** Arne Kalland, 2009 Whaling has become one of the most controversial environmental issues It is not that all whale species are at the brink of extinction but that whales have become important symbols to both pro and anti whaling factions and can easily be appropriated as the common heritage of humankind This book the first of its kind is therefore not about whales and whaling per se but about how people communicate about whales and whaling It contributes to a better understanding and discussion of controversial environmental issues Why and how are issues selected How is knowledge on these issues produced and distributed by organizations and activists And why do affluent countries like Japan and Norway still support whaling which is of insignificant economic importance Basing his analysis on fieldwork in Japan and Norway and at the International Whaling Commission the author argues how an image of a superwhale has been constructed and how this image has replaced meat and oil as the important whale commodity He concludes that the whaling issue provides an arena where NGOs and authorities on each side can unite swapping political legitimacy and building personal relations that can be useful on issues where relations are less harmonious **Translation in the Performing Arts** Enza De Francisci, Cristina Marinetti, 2025-03-31 This innovative collection showcases the interconnectedness of translation and the performing arts drawing on examples spanning languages eras and modes of performance to argue for the importance of re envisioning translation beyond writing Featuring contributions from established and emerging scholars the volume builds on recent epistemological shifts from a genre based view of translation toward a material based approach interested in how performance and embodiment shape translation Chapters highlight the ways in which in the nexus of translation and performing arts we can situate the cross cultural encounters and transnational exchanges that underpin translation beyond the ideology of print and help us to better understand the international circulation of performative works The volume covers

a wide range of embodied practices from immersive theatre and intercultural opera to dance and sign language performance while also incorporating key perspectives from interviews with active practitioners Taken together the collection makes the case for a more nuanced understanding of translation one which accounts for the relationships between translation and the myriad forms of performance that permeate daily life This book will be of particular interest to students and scholars in translation studies visual culture theatre translation performing arts literary studies media studies and reception studies

The Sounds of Life Karen Bakker, 2024-03-12 When we think of animal sounds we tend to think about birds or other highly sonic animals However scientists are learning that a much wider range of animals and even plants use sound and they are figuring this out with the help of AI and other digital technologies This book tells the stories of scientists who are using these digital technologies to decode the hidden world of nonhuman sound The author shows how digital technology so often associated with our alienation from nature is offering an opportunity to listen to plants and animals in powerful ways changing our understanding of nonhuman communication and reviving our connection to the natural world This book is a story of discovery Early chapters describe early 20th century discoveries about whale noise while subsequent chapters describe how digital technologies have revealed the surprising sonic worlds of elephants turtles corals and plants Through these stories we learn that many more plants and animals can make and sense sound and that these sounds are linked to complex communication and social behavior But as we learn this science is not merely about listening to nature in new ways it also creates new possibilities for both conservation and interspecies communication In the book s later chapters the author describes fascinating breakthroughs aided by robotics and AI that may enable people to

communicate with other species She ends the book by exploring how conservationists are using bioacoustics to protect endangered species address the threat of noise pollution and create innovative responses to biodiversity loss and climate change Throughout the book the author describes the research of a diverse range of scientists with a particular emphasis on female and indigenous scientists And while she ultimately champions the potential of digital technology she is not naive to its limitations and is careful throughout to highlight the limits of technology Ultimately we see that bioacoustics aided by digital tech offers humanity a powerful window into the nonhuman world *Elephant Mountain* Debbie Ethell,2025-09-06 *Elephant*

Mountain is the gripping tale of Debbie Ethell a young woman whose fascination with an elephant skull in a bone museum leads her down an unexpected path What begins as a curiosity about the tragic love story of Morgan Berry the man who gave us Packy the first baby elephant born in a U S zoo in forty four years and Eloise Berchtold one of the world s greatest animal trainers soon becomes a chilling mystery The couple each killed by separate elephants they raised left behind a legacy tangled in secrets cover ups and unanswered questions As former owners of a secluded elephant farm in the rugged Pacific Northwest Morgan and Eloise s lives and deaths hold the key to a truth long buried beneath layers of deception Determined to uncover what really happened Debbie draws on her experience as a conservation research scientist and the steadfast support of her best friend who is facing a life threatening illness While navigating the shadows of her own past including her ongoing recovery from alcoholism Debbie finds courage and insight from a herd of wild elephants in Kenya a group she has studied since childhood Their stories of survival and loss mirror her own as she delves deeper into a mystery that will test her resolve and redefine her future **Beyond Straw Men** Phaedra C. Pezzullo,2023-09-26 Addressing plastics can feel

overwhelming Guilt shame anger hurt fear dismissiveness and despair abound *Beyond Strawmen* moves beyond hot take or strawman fallacies by illustrating how affective counterpublics mobilized around plastics reveal broader stories about environmental justice and social change Inspired by on and offline organizing Pezzullo engages public controversies policies and headline making advocates in Bangladesh Kenya the US and Vietnam through hashtag activism campaign materials and her podcast *Communicating Care* She argues that plastics have become an entry point into contested environmental politics including carbon heavy masculinity carceral policies planetary fatalism eco ableism greenwashing marine life endangerment pollution colonialism and waste imperialism Attuned to plastic attachments *Beyond Strawmen* shares how unsustainable patterns of the plastics industrial complex are resisted through imperfect but impactful networked cultures of care

Targeting Neuro-Immuno-Vascular Interactions in the Brain and the Periphery Imola Wilhelm,Istvan A. Krizbai,Mihaela Gherghiceanu,Éva Szőke,Zsuzsanna Helyes,2023-02-13 **Whale Music** David Rothenberg,2023-02-28 The marvelous sonic world of whales from the perspective of music and science Whale song is an astonishing world of sound whose existence no one suspected before the 1960s Its discovery has forced us to confront the possibility of alien intelligence not in outer space but right here on earth Thoughtful richly detailed and deeply entertaining *Whale Music* uses the enigma of

whale sounds to open up whales underwater world of sonic mystery In observing and talking with leading researchers from around the globe as they attempt to decipher undersea music Rothenberg tells the story of scientists and musicians confronting an unknown as vast as the ocean itself His search culminates in a grand attempt to make interspecies music by playing his clarinet with whales in their native habitats from Russia to Canada to Hawaii This is a revised edition of Thousand Mile Song originally published in 2008 The latest advances in cetacean science and interspecies communication have been incorporated into this new edition along with added photographs and color whale scores **Orca** Jason Michael Colby, 2018 Drawing on interviews official records private archives and the author s own family history this is the definitive story of how the feared and despised killer became the beloved orca and what that has meant for our relationship with the ocean and its creatures

cricket family Tonino's great great great grandfather was Grillo parlante the talking cricket in the original story Pinocchio. Grillo was also the conscience of Pinocchio and Grillo's great grandson was the famous Jiminy Cricket in Walt Disney's classic movie Pinocchio. In this wonderful story about Tonino the reader sees many different regions of the world through the eyes of this boy cricket where through the experiences of Tonino the reader will learn more about how crickets played various and important roles in different indigenous cultures. Tonino's charge by the Blue Fairy was to become the conscience of the world when it comes to environmental issues. A heavy responsibility for a small boy cricket. The importance of cultural diversity just as important as biodiversity is stressed and Tonino takes on Dr E O Wilson one of the greatest thinkers/writers of our generation as his mentor.
