A Critique of the Origins of Islamic Economic Thought Mohammed Yassine Essid, 2021-11-22 The possible indebtedness of political economy to fourth century Greek thinkers has been widely debated the contribution of Islam on the other hand is consistently forgotten This volume addresses this neglect by examining in three parts the following questions Is there a school of economic thought that can be considered specifically Arab or have the Arabs succeeded in combining the Greek heritage with other more oriental currents Muslim economic thought has enriched the Hellenic contribution to economic thought in the areas of government of the kingdom by the caliph of the city and the household organisation the Arab concept of *tadbir* should be examined in relation to each of these three levels In rejecting profit usury egoism and monopoly and in preaching

moderation altruism the practice of fair prices and unselfishness Islam inaugurated an economic system which has derived from that of the Greeks and which laid the basis for pre capitalist thought
