*Encyclopedia of Criminological Theory* Francis T.

Cullen, Pamela Wilcox, 2010-09-23 Consistently excellent The level and coverage of the content make this an invaluable reference for students studying criminology or taking criminal psychology modules at degree level and beyond Adam Toccock Reference Reviews In discussing a criminology topic lecturers and course textbooks often toss out names of theorists or make a sideways reference to a particular theory and move on as if assuming their student audience possesses the necessary background to appreciate and integrate the reference However university reference librarians can tell you this is often far from the case Students often approach them seeking a source to provide a quick overview of a particular theory or theorist with just the basics the who what where how and why if you will And reference librarians often find it difficult to guide these students to a quick one stop source In response SAGE Reference is publishing the two volume Encyclopedia of Criminological Theory available in both print and electronic formats This serves as a reference source for anyone interested in the roots of contemporary criminological theory Drawing together a team of international scholars it examines the global landscape of all the key theories and the theorists behind them presenting them in the context needed to understand their strengths and weaknesses In addition to interpretations of long established theories it also offers essays on cutting edge research as one might find in a handbook And like an unabridged dictionary it provides concise to the point definitions of key concepts ideas schools and figures Coverage will include contexts and concepts in criminological theory the social construction of crime

policy implications of theory diversity and intercultural contexts conflict theory rational choice theories conservative criminology feminist theory      **Alcohol Research & Health** ,2001      **Studying and Preventing Homicide** M. Dwayne Smith, Margaret A. Zahn, 1999 A comprehensive exploration Studying and Prevention of Homicide offers thoroughly researched chapters by a distinguished group of contributors Leading scholars in the field editors M Dwayne Smith and Margaret A Zahn have compiled an extensive range of topics including mass and serial murders homicides by youth gang homicides domestic homicides homicides by female offenders and alcohol drug related homicides
