Alcohol in Postwar Europe ,2002 **Alcohol in postwar Europe** Thor Norström,2000 **Handbook of European Homicide Research** Marieke C. A. Liem,William Alex Pridemore,2011-10-17 This comprehensive work provides a sourcebook of information about the substantive methodological and policy oriented aspects of homicide research in Europe Part one of this work covers the most recent substantive and methodological information about European homicide research The second part will contains detailed case studies on homicide research in 15 20 individual European nations This work will be both conceptual and practical conceptual and practical Conceptual aspects will focus on theoretical frameworks and patterns and trends of violence in Europe Practical aspects will examine the results of empirical research topics relating to different data sources and the variation of legal definitions of violence throughout Europe and policy issues relating to variation in homicide prevention and punishment of homicide offenders throughout Europe This handbook will not only provide an up to date reference that brings together known information but will also offer previously unpublished comprehensive literature reviews and original research findings The editors distinctive approach is to provide readers with an English language central source of information about the voluminous literature on European homicide research that is currently spread widely in dozens of different European and American journals Alcohol in Postwar Europe ,2002 **The Economics of Beer** Johan F. M. Swinnen,2011-10-27 Beer has been consumed across the globe for centuries and was the drink of choice in many ancient societies Today it is the most important alcoholic drink worldwide in terms of volume and value The largest brewing companies have developed into global multinationals and the beer market has enjoyed strong growth in emerging economies but there has been a substantial decline of beer consumption in traditional markets and a shift to new products There is close interaction between governments and markets in the beer industry For centuries taxes on beer or its raw materials have been a major source of tax revenue and governments have regulated the beer industry for reasons related to quality health and competition This book is the first economic analysis of the beer market and brewing industry The introduction provides an economic history of beer from monasteries in the early Middle Ages to the recent microbrewery movement whilst other chapters consider whether people drink more beer during recessions the effect of television on local breweries and what makes a country a beer drinking nation It comprises a comprehensive and unique set of economic research and analysis on the economics of beer and brewing and covers economic history and development supply and demand trade and investment geography and scale economies technology and innovation health and nutrition quantity and quality industrial organization and competition taxation and regulation and regional beer market developments Youth Drinking Cultures Margaretha Järvinen,Robin Room,2017-03-02 How can binge drinking be explained and understood Is alcohol consumption related to the particular cultural characteristics of some European countries Should

heavy drinking cultures be seen as a mainstream youth phenomenon or as marginal and is this different in different countries A team of leading researchers addresses these questions and more in their analysis of the alcohol consumption patterns of European young people Alcohol consumption is an important marker of transition from childhood to early adulthood yet the timing intensity and purpose of adolescent drinking varies dramatically between countries The contributors provide cross national comparisons to investigate how drinking behaviour varies examining factors such as gender societal context and family socio economic backgrounds Youth Drinking Cultures offers a comprehensive set of perspectives on adolescent drinking in Europe In linking issues around social identity and the life course with a highly topical area of media and policy concern the book will be of great value to sociology and social policy scholars especially youth researchers and also to professionals working with young people Working Together to Reduce Harmful Drinking Marcus Grant, Mark

Leverton, 2009-10-05 This book is intended to contribute to the World Health Organization's WHO global strategy to reduce the harmful use of alcohol It explores areas where alcohol producers technical competence can and does make a positive contribution to reducing harmful drinking and where industry input has been welcomed by WHO The book describes each of these areas producing beer wine and spirits addressing availability of noncommercial beverages pricing marketing and selling beverage alcohol encouraging responsible choices and working with others The final chapter sets out views of how alcohol producers can contribute to reducing harmful drinking in countries where they are present The messages recurring throughout the book are that reasonable regulation provides the context for good alcohol policy excessive regulation often leads to unintended negative consequences leading producers have a proud record of making positive contributions to implementing effective alcohol policies but there are opportunities to do much more **Alcohol Research & Health**, 2003

In Substance Fabio Lugoboni, Lorenzo Zamboni, 2025-10-13 In Substance is a comprehensive handbook on the topic of addiction The book explores the phenomenon of substance and behavioral addictions in its entirety from scientific research to clinical practice intertwining neurobiological psychological social and therapeutic perspectives With contributions from more than one hundred Italian and international authors the volume examines the complex nature of addictive behaviors and their many forms from substance use disorders to emerging behavioral addictions as well as the latest approaches to treatment and prevention In Substance was conceived to fill a gap in the Italian landscape offering an updated and accessible collection of current knowledge on addiction and recovery pathways It combines scientific rigor with human depth making it an essential resource for mental health professionals addiction specialists students and anyone seeking a deeper understanding of vulnerability self control and change WHO Expert Committee on Problems Related to Alcohol Consumption WHO Expert Committee on Problems Related to Alcohol Consumption, 2007-09-19 Since the last meeting of the WHO Expert Committee on Problems Related to Alcohol Consumption WHO has undertaken a range of major initiatives to support Member States and reinforce the evidence on which policies work to develop global and regional information

systems and to promote effective policies in health care settings These initiatives provide the background for the continuing role of WHO in supporting Member States to reduce the harm done by alcohol In resolution WHA58 26 the Fifty eighth World Health Assembly in 2005 requested the Director General to report to the Sixtieth World Health Assembly on evidence based strategies and interventions to reduce alcohol related harm including a comprehensive assessment of public health problems caused by harmful use of alcohol and to draw up recommendations for effective policies and interventions to reduce alcohol related harm To this end a WHO Expert Committee on Problems Related to Alcohol Consumption was convened with the main objectives of reviewing a range of public health problems attributable to alcohol consumption as well as scientific and empirical evidence of effectiveness of different policy options and providing technical recommendations on effective policies and interventions to reduce alcohol related harm

Context Gerry Stimson,Marcus Grant,Marie Choquet,Preston Garrison,2013-05-13 Drinking beverage alcohol is a widespread source of individual and social pleasure in most countries around the world Yet some drinking patterns can lead to serious physical mental and social harms Drinking in Context is intended to complement existing volumes dealing with international alcohol policy by focusing on three main themes drinking patterns targeted interventions and partnership development An understanding that patterns of drinking are important predictors of outcomes has led to a growing realization that alcohol policies and prevention strategies need to focus on excessive or irresponsible drinking As a result there has been a shift towards interventions that address the targeted reduction of harm These approaches recognize socio cultural differences and avoid trying to impose a one size fits all solution In this context multi stakeholder partnerships offer an excellent opportunity to promote the complex mix of measures required by each society Shared responsibilities lead to shared solutions

The Economics of Addictive Behaviours Volume II John Joshua,2017-05-16 This title discusses the phenomenon of alcohol

abuse as a behavioural disease and the associated costs The author details alcohol's status as a psychoactive drug he notes however that in contrast to other psychoactive drugs alcohol has been widely culturally accepted in Western countries and legally available except in isolated incidents for a short period of time Joshua considers which policies are being correctly utilised so as to reduce the abuse of alcohol and how these policies may operate on a supply and demand model Whereas programs of prevention and treatment operate on the demand side of alcohol abuse legislation is directed at the supply side of alcohol that is dealing with marketing product promotion point of sale and price This is the second title in a four volume series The Economics of Addictive Behaviours consisting of three additional volumes on smoking illicit drug abuse and overeating *Social and Economic Control of Alcohol* Carole L. Jurkiewicz, Murphy J. Painter, 2007-11-14 As a toast to success a drowning of sorrows a rite of passage and the fuel for most social activities alcohol plays a central role in our culture Alcohol generates nearly 160 billion in US revenues annually and is a major source of tax revenue making the stakes in the modern debate over its use misuse and regulation staggeringly high Fact EBOOK: Issues in Public Health Fiona Sim, Martin McKee, 2011-09-16 What is public health and why is it important By looking at the foundations of public health its historical evolution the themes that underpin public health and the increasing importance of globalization this book provides thorough answers to these two important questions Written by experts in the field the book discusses the core issues of modern public health such as tackling vested interests head on empowering people so they can make healthy decisions and recognising the political nature of the issues The new edition has been updated to identify good modern public health practice evolving from evidence New features include Two new chapters on the expanding role of public health covering the issues of sustainability and climate change human rights genetics and armed conflict Expanded UK and international examples Examination of the impact of globalization on higher and lower income countries Exploration of the tension between the population approach and the personal behaviour change model of health promotion A variety of activities to help understanding and learning of the topics Issues in Public Health is an ideal introductory text for higher education students studying public health in depth Series Editors Rosalind Plowman and Nicki Thorogood *Biomedicalization of Alcohol Studies* Lorraine Midanik, 2019-01-22 Biomedicalization is seen as the natural outgrowth of continued scientific progress a movement towards improving the quality and quantity of life through scientific inquiries using biomedical perspectives and methods This approach carries with it the assumption that with proper risk assessment detection and treatment our lives can be lengthened improved and indeed more fulfilling Yet critics question biomedicalization's ability to deliver There is concern about how biomedicalization can change our traditional concepts of health as we discover more conditions for which we are at risk and health maintenance is seen as the responsibility of the individual The purpose of the book is to describe assess and critique biomedicalization and its influence as a larger social trend on the health field and specifically in the area of alcohol research policy and programs Chapter 1 gives a broad overview of biomedicalization Chapter 2 lays the groundwork

for a historical understanding of how medicalization and biomedicalization have developed and are expressed in diverse fields such as aging psychiatry mental health and women's health Chapter 3 focuses in depth on alcoholism and assesses the development and assumptions underlying the two movements that have greatly influenced the substance abuse field the medicalization of deviance and the growth of the disease model of alcoholism Chapter 4 discusses the origins and development of the National Institute on Alcohol Abuse and Alcoholism NIAAA from its inception in 1970 Chapter 5 illustrates the growing biomedicalization that has occurred in the alcohol field prior to NIAAA's movement to the National Institute of Health NIH Chapter 6 assesses how Sweden has handled alcohol problems and currently funds alcohol research Chapter 7 concludes with a rationale for an expanded discourse between social scientists and biomedical researchers working on social problems particularly alcohol issues This volume will stimulate discussion of the processes by which social problems and specifically alcohol issues are framed managed and studied It will hold particular interest for researchers and students in the areas of alcohol studies social science and social welfare Lorraine Midanik is a professor in the School of Social Welfare University of California Berkeley

EUROHIS A. Nosikov, Claire Gudex, 2003 The EUROHIS project has focused on the comparability of health surveys and has uncovered some problems that arise when aiming to compare data from different countries Similar problems of cross cultural comparability also arise when comparing data from other sources such as health registers and are just as complex and difficult to tackle One of the main advantages of health surveys however is the relatively low cost and time involved in adapting them according to the needs of health policy makers This work shows that the output from the EUROHIS project provides common instruments for the measurement of eight health indicators The development of these instruments has required careful consideration of relevant common concepts and how these should be defined and operationalized The instruments are freely available for use by all countries with the aim of enhancing national health information systems and facilitating cross national comparisons of health data Global Status Report, 2004-07-23

The Global Status Report on Alcohol 2004 is a new edition of the Report published by WHO in 1999 This edition provides an update of the role of alcohol in global health and contains data not found in the earlier edition The Report seeks to document what is known about alcohol consumption and drinking patterns among various population groups alcohol's impact on health worldwide and what is needed on a global basis to prevent and reduce alcohol related injury and disease For this new edition more emphasis has been placed on enhancing the comparability of data by setting clear and comprehens Substance Use in a Comparative Perspective Arnošt Veselý, Dagmar Džúrová, 2013-10-01 The book follows two main objectives First it aims at putting together different pieces of evidence on developments of substance use and risk behavior in five post communist countries over time Thus first objective is to build a complex and reliable empirical evidence base for empirical comparison and identify evidence gaps Second we try to analyze and interpret such developments using both quantitative and qualitative analysis and to relate them to the formulated theoretical framework Since available empirical evidence is often far from

conclusive the findings presented are sometimes rather exploratory and should be tested by further and more detailed research The book is structured as follows At the beginning we review various factors that have been found to be associated with substance use We try to present them in a complex and systematic way and create a conceptual framework for understanding and explaining substance use in a comparative way Next chapter describes the developments of substance use over time in five countries analyzed This description is based upon publicly available WHO data along with supplementary comments and interpretations by national experts Next chapter is devoted to country profiles of all five countries involved in the project and in depth overviews of developments in their respective substance use situations All reviews are written according to the same structure thus facilitating comparison The last chapter presents a multilevel analysis of substance use in the Czech Republic combining data for individuals and regions

Addiction Treatment Jack E. Henningfield, Patricia B. Santora, Warren K. Bickel, 2007-12-03 *Addiction Treatment* provides a solid foundation for understanding addiction as a treatable illness and for establishing a framework for effective treatment in the twenty first century
