Young Adult Drinking Styles Dominic Conroy, Fiona Measham, 2019-11-30 This book brings together cutting edge contemporary research and discussion concerning drinking practices among young adults, individuals aged approximately 18-30 years old. Its chapters showcase an interdisciplinary range of perspectives from psychology, sociology, criminology, geography, public health and social policy. The contributors address themes including how identity becomes involved in young adult drinking practices, issues relating to the non-consumption of alcohol within friendship groups and the role of social context, religious and ethnic orientation, gender identity and social media use. In doing so, they highlight changing trends in alcohol consumption among

young people which have seen notably fewer young adults consuming alcohol over the last two decades In acknowledging the complex nature of drinking styles among young adults the contributors to this collection eschew traditional understandings of young adult drinking which can pathologise and generalise They advocate instead for an inclusive approach as demonstrated in the wide range of disciplinary backgrounds cultural perspectives methods and international settings represented in this book in order to better understand the economic socio cultural and pharmacological crossroads at which we now stand This book will appeal in particular to researchers theorists practitioners and policy makers working in the alcohol and drugs field public health and health psychology in addition to students and researchers from across the social sciences

Approaches to Drug Abuse Prevention at Colleges and Universities ,1988 **Binge Drinking on College Campuses** ,1998 **College Drinking** George W. Dowdall,2023-07-03 Drinking is recognized as one of the most important problems confronting students on campus today with major impacts on health and safety This book answers crucial questions about why students drink examines its complex links to campus crime and sexual assault and offers new insights on how to address the issue It differs from other studies of college drinking by dispelling the myth that the problem is universal Dowdall s research reveals that the incidence of alcohol abuse varies enormously between colleges and in doing so identifies interventions and policies that have been effective and those that have failed His study is also unique in looking upstream at the broader cultural organizational and social forces that shape this behavior where most studies focus only on downstream behaviors well after students have selected their college and have started drinking Students and parents can take action to lower the risk of binge drinking by following the book s recommendations and consulting the data it provides about alcohol violations and crime at thousands of colleges For administrators and student affairs personnel it both defines and illuminates the issue and outlines effective interventions

Substance Abuse on Campus P. Clayton Rivers,Elsie R. Shore,1997-11-25 Substance abuse is one of higher education s worst problems not only in terms of financial but also human cost Drawing upon current theory and research this handbook arrives at practical solutions to these problems While there are divergent models of research and practice in substance abuse which have led to competing models of intervention treatment and prevention this book seeks to reconcile those differences It allows the reader to understand substance abuse from theoretical research perspectives and guides the reader from conceptualization to programming to intervention with the substance abusing student The book is divided into three parts The first deals with ways of conceptualizing substance abuse and the models which have been the basis for developing intervention strategies Theories of how substance abuse problems develop are discussed and some suggestions are given as to how these theories may guide prevention intervention and treatment The second part focuses on how one should establish policies and programming on campus and how these programming and policy decisions can help in prevention strategies The final part outlines how one can assess intervene and provide treatment

for a substance abuser Included here is a chapter on self help groups and how they may be used in support of treatment and aftercare
