

# Types of Alcoholics

## **The Social Drinker**

Social drinkers primarily consume alcohol in social settings, such as parties or gatherings.

1

## **The Binge Drinker**

Binge drinkers consume large amounts of alcohol, often resulting in memory lapses and poor decision-making.

2

## **The Functioning Alcoholic**

The functional subtype maintains its daily responsibilities while regularly consuming alcohol in excess.

3

## **The Chronic-Severe Alcoholic**

Chronic severe subtypes are characterized by a compulsive need to drink daily, experiencing withdrawal without alcohol.

4

## **The Binge-Eating Alcoholic**

Some alcoholics binge eat after consuming alcohol, which can lead to unhealthy weight gain and other health issues.

5

## **The High-Functioning Alcoholic**

High-functioning alcoholics maintain successful careers and personal lives while concealing their alcohol dependence.

6

## **Alcoholism And The Identification Of Alcoholics:**

**Alcohol and the Identification of Alcoholics** H. Gwynne Giles, Bhushan M. Kapur, 1991      **Diagnosis of Alcohol Abuse** Ronald Ross Watson, 1989-07-31 The latest methods used to diagnose alcoholism are discussed in this timely publication Old systems are reviewed and their efficacy in the diagnosis of alcoholism is analyzed Laboratory methods that could improve the objectivity and accuracy of clinical tests are highlighted Additionally physical psychological and biochemical tests used to diagnose severe alcoholism are explored      **A Commander's, Supervisor's, and Physician's Guide to Alcohol Abuse and Alcoholism** United States. Department of the Army, 1973      *Identification and Treatment of Alcohol Dependency* Professor Colin R. Martin, 2008 Colin Martin has brought together an excellent set of contributors to produce a truly comprehensive text that will ensure all interested professionals can not only update their knowledge but also better understand each other's roles and how best to help patients and clients through shared working to achieve a common goal of better health This book is not just for people who see themselves as having a primary role in the field but also for those teachers the police and family members who live daily with its effects Professor Dame Betty Kershaw University of Sheffield UK Alcohol dependency represents an enduring problem for both the individual and wider society Despite contemporary media coverage on increasingly dangerous levels of drinking in the United Kingdom the fact remains that excessive alcohol consumption has been a distinguishing feature of Western society for generations This book is arranged by a number of themed parts largely representing the key areas in the process of facilitating access to effective clinical management The book will also be of interest to the wider public who have an interest or concern in relation to alcohol dependency Contents include Part 1 Identification Part 2 Medical interventions Part 3 Psychological interventions Part 4 Contemporary issues in the identification and treatment of alcohol dependency Part 5 Clients with complex needs Part 6 Reproductive and developmental concerns      Treatment and Rehabilitation of the Chronic Alcoholic Benjamin Kissin, 2012-12-06 The present volume contains a large variety of treatment approaches to the long term rehabilitation of the alcoholic ranging from the biological to the physiological to the psychological to the social The multiplicity of proposed therapies each of which has its strong proponents suggests that alcoholism is either a complex medical social disease syndrome requiring a multipronged treatment approach or a very simple illness for which we have not yet discovered the remedy The latter may indeed be true but we cannot use what we do not know and must use what we do know We do however have the obligation to be responsible in our treatment to provide the best that is known at this time and to be discriminating in our prescription of appropriate treatment for individual patients If there is one conclusion we would like to offer in our preface it is that alcoholics constitute a markedly heterogeneous population with widely disparate needs for whom at least at our present level of knowledge a broad spectrum of treatment modalities is necessary If this is true then probably most of this book has validity With this volume on the treatment and rehabilitation of the chronic alcoholic we bring to completion our five volume series

The Biology of Alcoholism As the title of the present volume indicates we have departed from our original intention to deal solely with biological aspects of the syndrome and have attempted rather to produce a more comprehensive work *Recent Developments in Alcoholism* Marc Galanter, 2012-12-06 From the President of the Research Society on Alcoholism This annual book series is a valuable resource for the alcoholism field because it provides critical and timely reviews of selected areas that have interest to both practitioners and researchers It tries to achieve a balance between psychosocial and biomedical topics and between research and patient care activities Such a mix is offered in Volume 6 The Research Society on Alcoholism whose membership embraces researchers from all disciplines that study the etiology treatment and prevention of alcoholism and alcohol related disabilities regards the support and sponsorship of this book series as one of its major missions Ting Kai Li M D President Research Society on Alcoholism From the President of the American Medical Society on Alcoholism and Other Drug Dependencies The broadening scope of clinical and scientific interest in alcohol dependence is reflected in this sixth volume of *Recent Developments in Alcoholism* It offers valuable reviews on important current issues in the field namely the intertwining of nature and nurture a continuing search for predictors and indicators of the disease and the social impact of alcoholism on the job and in special populations This material should pique the interest of clinicians from all disciplines Medical social and political planners also need to turn to the expanding body of knowledge in the field of chemical dependence reflected here The volume is therefore of value to a contemporary readership and to those who will turn to it in future years Evaluation of the Alcoholic, 1981 *Alcoholism and Narcotics* United States. Congress. Senate. Committee on Labor and Public Welfare. Subcommittee on Alcoholism and Narcotics, 1970 **Alcoholism and Narcotics** United States. Congress. Senate. Labor and Public Welfare, 1970 *Gay Men, Drinking, and Alcoholism* Thomas S. Weinberg, 1994 Alcohol use is an integral part of the gay world According to some estimates the rate of problem drinking is about three times higher among gays than in mainstream society but few researchers have examined this phenomenon in depth Thomas S Weinberg's ethnographic study provides new insight into the role of drinking in the gay male community Weinberg utilizes interviewing and participant observation techniques in a variety of drinking related settings in the gay subculture of Paradise City the fictitious name of a large western city where he carried out his research Emphasizing drinking as social behavior Weinberg explores the ways social contexts such as bars love relationships and reference groups affect individual drinking patterns and concludes that drinking is intimately entwined with friendship networks and extended families in the gay world Weinberg is concerned not only with alcoholism but with variation in alcohol use and changes in alcohol use over time He employs the concept of career to explain why and how an individual's drinking might either increase or decrease over the course of his lifetime Letting his informants speak for themselves Weinberg directs attention to their own perspectives on the meaning of their drinking behavior After creating a typology of drinkers including self defined as well as researcher defined alcoholics Weinberg considers alternative explanations for gay problem drinking He thoroughly

explores the gay bar scene its importance in gay life and the way that interactions within the bar environment affect drinking and risk taking specifically as they relate to HIV Weinberg also looks closely at self defined gay alcoholics and considers three alternative explanations for gay problem drinking the alienation thesis the influence of parental role models and reference group theory He rejects the alienation thesis and the influence of parental role models because these causal factors were not borne out by his statistical correlations Instead Weinberg finds the most powerful explanation in reference group theory which links individuals behavior to the norms of the social groups they identify with Finally he arrives at a processual model of gay problem drinking based on his data analysis By comparing alcohol use in the homosexual and heterosexual communities Weinberg provides a new perspective on gay problem drinking that will interest sociologists psychologists and clinicians as well as concerned lay readers in the gay community He cites examinations of large scale survey research on tavern attendance and drinking ethnographic studies of bar behavior literature on special groups and studies of marital interaction in alcoholic families concluding that gay drinking is a special situation that only reference group theory and a processual model adequately address The closing chapter contains policy recommendations for reducing alcohol use in the gay community
