[Correction Lines](#) Curt Meine, 2013-04-10 The last fifteen years have been a period of dramatic change both in the world at large and within the fields of ecology and conservation The end of the Cold War the dot com boom and bust the globalizing economy and the attacks of September 11 among other events and trends have reshaped our worldview and the political environment in which we find ourselves At the same time emerging knowledge needs and opportunities have led to a rapid evolution in our understanding of the scientific foundations and social context of

conservation Correction Lines is a new collection of essays from one of our most thoughtful and eloquent writers on conservation putting these recent changes into perspective and exploring the questions they raise about the past present and future of the conservation movement The essays explore interrelated themes the relationship between biological and social dimensions the historic tension between utilitarian and preservationist approaches the integration of varied cultural perspectives the enduring legacy of Aldo Leopold the contrasts and continuities between conservation and environmentalism the importance of political reform and the need to retool conservation to address twentyfirst century realities Collectively the essays assert that we have reached a critical juncture in conservation a correction line of sorts Correction Lines argues that we need a more coherent and comprehensive account of the past if we are to understand our present circumstances and move forward under unprecedented conditions Meine brings together a deep sense of history with powerful language and compelling imagery yielding new insights into the origins and development of contemporary conservation Correction Lines will help us think more clearly about the forces that have changed and are changing conservation and inspire us to address current realities and future needs

The Environmental Vision of Thomas Merton Monica Weis, 2011-06-24 Delightful a superb guide to the ecological themes of Merton's life and writings The Christian Century Nature was always vital in Thomas Merton's life from the long hours he spent as a child watching his father paint landscapes in the fresh air to his final years of solitude in the hermitage at Our Lady of Gethsemani where he contemplated and wrote about the beauty of his surroundings Throughout his life Merton's study of the natural world shaped his spirituality in profound ways and he was one of the first writers to raise concern about ecological issues that have become critical in recent years In The Environmental Vision of Thomas Merton Monica Weis suggests that Merton's interest in nature which developed significantly during his years at the Abbey of Gethsemani laid the foundation for his growing environmental consciousness Tracing Merton's awareness of the natural world from his childhood to the final years of his life Weis explores his deepening sense of place and desire for solitude his love and responsibility for all living things and his evolving ecological awareness Explains how Merton evolved from a nature enthusiast to one of the world's most respected ecological stewards Louisville Courier Journal **This is**

Environmental Ethics: An Introduction Wendy Lynne Lee, 2022-07-18 Provides students and scholars with a comprehensive introduction to the growing field of environmental philosophy and ethics Mitigating the effects of climate change will require global cooperation and lasting commitment Of the many disciplines addressing the ecological crisis philosophy is perhaps best suited to develop the conceptual foundations of a viable and sustainable environmental ethic This is Environmental Ethics provides an expansive overview of the key theories underpinning contemporary discussions of our moral responsibilities to non human nature and living creatures Adopting a critical approach author Wendy Lynne Lee closely examines major moral theories to discern which ethic provides the compass needed to navigate the social political and economic challenges of potentially catastrophic environmental transformation not only but especially the climate crisis Lee

argues that the ethic ultimately adopted must make the welfare of non human animals and plant life a priority in our moral decision making recognizing that ecological conditions form the existential conditions of all life on the planet Throughout the text detailed yet accessible chapters demonstrate why philosophy is relevant and useful in the face of an uncertain environmental future Questions which environmental theory might best address the environmental challenges of climate change and the potential for recurring pandemic Discusses how inequalities of race sex gender economic status geography and species impact our understanding of environmental dilemmas Explores the role of moral principles in making decisions to resolve real world dilemmas Incorporates extensive critiques of moral extensionist and ecocentric arguments Introduces cutting edge work done by radical deep green writers animal rights theorists eco phenomenologists and ecofeminists This is Environmental Ethics is essential reading for undergraduate students in courses on philosophy geography environmental studies feminist theory ecology human and animal rights and social justice as well as an excellent graduate level introduction to the key theories and thinkers of environmental philosophy

The Landscape of Reform Ben A. Minteer, 2006 In The Landscape of Reform Ben Minteer offers a fresh and provocative reading of the intellectual foundations of American environmentalism focusing on the work and legacy of four important conservation and planning thinkers in the first half of the twentieth century Liberty Hyde Bailey a forgotten figure in the Progressive conservation movement urban and regional planning theorist Lewis Mumford Benton MacKaye the forester and conservationist who proposed the Appalachian Trail in the 1920s and Aldo Leopold author of the environmentalist classic A Sand County Almanac Minteer argues that these writers blazed a significant third way in environmental ethics and practice a more pragmatic approach that offers a counterpoint to the anthropocentrism versus ecocentrism use versus preservation narrative that has long dominated discussions of the development of American environmental thought Minteer shows that the environmentalism of Bailey Mumford MacKaye and Leopold was also part of a larger moral and political program one that included efforts to revitalize democratic citizenship conserve regional culture and community identity and reclaim a broader understanding of the public interest that went beyond economics and materialism Their environmental thought was an attempt to critique and at the same time reform American society and political culture Minteer explores the work of these four environmental reformers and considers two present day manifestations of an environmental third way Natural Systems Agriculture an alternative to chemical and energy intensive industrial agriculture and New Urbanism an attempt to combat the negative effects of suburban sprawl By rediscovering the pragmatic roots of American environmentalism writes Minteer we can help bring about a new civic minded environmentalism today

Linking Ecology and Ethics for a Changing World Ricardo Rozzi, S.T.A. Pickett, Clare Palmer, Juan J. Armesto, J. Baird Callicott, 2014-02-06 To comprehensively address the complexities of current socio ecological problems involved in global environmental change it is indispensable to achieve an integration of ecological understanding and ethical values Contemporary science proposes an inclusive ecosystem concept that recognizes humans as components

Encountering Nature Thomas Heyd, 2016-04-29 This book argues

that an attentive encounter with nature is of key importance for the development of an environmentally appropriate culture. The fundamental idea is that the environmental degradation that we are increasingly experiencing is best conceived as the consequence of a cultural mismatch: our cultures seem not to be appropriate to the natural environment in which we move and on which we depend in thoroughgoing ways. In addressing this problem, Thomas Heyd weaves together a rich tapestry of perspectives on human interactions with the natural world, ranging from traditional modes of managing human communities that include the natural environment to the consideration of poetic travelogues, ecological restoration, and botanic gardens. The volume is divided into three parts which respectively consider the relation of human beings to nature in terms of ethics, aesthetics, and culture. It engages the current literature in each of these areas with the help of interdisciplinary approaches as well as on the basis of personal encounters with natural spaces and processes. The ultimate aim of this book is to make a contribution to the development of a cultural fabric that is suitable to the natural spaces and processes in which we may thrive and on which we all depend as individuals and as a species.

[A History of Ecological Economic Thought](#) Marco P. Vianna Franco, Antoine Missemer, 2022-08-01. Contributing to a better understanding of contemporary issues of environmental sustainability from a historical perspective, this book provides a cohesive and cogent account of the history of ecological economic thought. The work unearths a diverse set of ideas within a Western and Slavic context from the Renaissance and the Enlightenment to the late 1940s, to reveal insights firmly grounded in historiographical research and of import for addressing current sustainability challenges, not least by means of improving our grasp on how humans and nature can generously coexist in the long term. The history of ecological economic thought offered in this volume is rich and diverse, encompassing views that are bound by the observance of the tenets of the natural sciences but which differ significantly in terms of the role of energy and materials to cultural development and the normative aspects involving resource distribution, social ideals, and policy making. Combining the approaches of independent scholarly figures and scientific communities from different historical periods and nationalities, the book brings elements that are still missing in the scarce literature on the history of ecological economic thought and highlights the underlying threads which unite such initiatives. The book brings a fresh look into the historical development of ecological economic ideas and will therefore be of great interest to scholars and students of ecological economics, environmental economics, sustainability science, interdisciplinary studies, and history of economic thought.

[Ecoaesthetics and Ecosophy in China](#) Cheng Xiangzhan, 2023-10-09. Chinese ecoaesthetics, which originated in 1994, has developed theoretically over the last 30 years. This branch of aesthetics, which is based on ecology and to transform aesthetically towards the era of ecological civilization, uses ecological realism as its philosophical foundation and ecohumanism as its guiding principles. Its central aesthetic paradigm is known as the body-mind-environment model. Its main research object is ecological aesthetic appreciation, an exploration of how to appreciate aesthetics and ecology through ecological beauty. Additionally, ecohumanism can be further improved by referring to principles of ecology and examining the

aesthetic synergies between humans and the earth's ecosystem. Ultimately, ecohumanism is not only a method to aid in survival in an ecological crisis but to elevate the human condition through assuming ecological responsibilities and promoting ecological civilization leading to a more valuable and meaningful life. The theme of this book, Ecosophy C, can be summarized as Moving toward the Aesthetics of Eternal Engendering. Its key phrase, Creating life, corresponds to shengsheng in Chinese, literally implying a continuous cycle of reproduction. Philosophically, this concept translates to eternal engendering. In essence, ecoaesthetics is the pursuit of the endless cycling of bio-engendering, which is the main goal of ecoaesthetics.

Cheng Xiangzhan is outstanding among Chinese environmental aestheticians in joining classical and contemporary Western environmental aesthetics with his original contributions to the more recent work by Chinese scholars. Cheng's creative and integrative accomplishments are supported by a remarkable facility in English and reflected in his original and systematic consideration of the outstanding issues. While much can be debated, there is substantial material here, and this book makes a signal contribution to carrying the discussion forward.

Arnold Berleant, distinguished environmental aesthetician, His latest book *The Social Aesthetics of Human Environments* will appear in September 2023.

Grizzly Lessons Gerald Blanchard, 2004-10

Grizzly Lessons is a survival guide to living in or visiting grizzly and wolf country. Fear, physical danger, financial hardship, and animosity between neighbors are contemporary challenges of the everyday Western experience. Stories of grizzly attacks reveal the remarkable psychological resilience of survivors. Most have returned to the wilderness with increased respect for bears, and their love of nature intact. *Grizzly Lessons* avoids the polarizing rhetoric of the vitriolic wolf-bear debates. In contrast, Blanchard presents accounts of coexistence from historical Native Americans to present-day ranchers, hunters, and other wilderness explorers. For those who are open to them, the ultimate lessons of humility, respect, and

interdependence are offered through grizzly encounters **Human Health and Ecological Integrity** Laura Westra, Colin L. Soskolne, Donald W. Spady, 2012-05-31 The connection between environment and health has been well studied and documented particularly by the World Health Organization It is now being included in some legal instruments although for the most part caselaw does not explicitly make that connection Neither the right to life nor the rights to health or to normal development are actually cited in the resolution of cases and in judges decisions This volume makes the connection explicit in a broad review of human rights and legal issues associated with public health and the environment It will be particularly useful as many legal instruments emphasize the right to development without fully discussing the necessary safety and public health aspects and the respect for the ecology of any area where such development often unwanted by local or indigenous communities is to be located Climate change is another pressing variable that is considered and several chapters address the interface between human health and ecological conditions Overall the book integrates perspectives from a wide range of disciplines including ethics ecology public health and epidemiology and human rights and law *Aldo Leopold* Curt D. Meine, 2010-10-19 This biography of Aldo Leopold follows him from his childhood as a precocious naturalist to his profoundly influential role in the development of conservation and modern environmentalism in the United States This edition includes a new preface by author Curt Meine and an appreciation by acclaimed Kentucky writer and farmer Wendell Berry
