growth improve social conditions and reduce poverty in IDA countries PRSCs were intended to allow greater country ownership provide more predictable annual support exhibit more flexible conditionality and strengthen budget processes in a results based framework By September 2009 the Bank had approved 99 PRSCs totaling some 7.5 billion and representing 38% percent of IDA policy based lending The evaluation finds that in terms of process PRSCs were effective in easing conditionality increasing country ownership and aid predictability stimulating dialogue between central and sectoral ministries and improving donor harmonization In terms of content PRSCs succeeded in emphasizing public sector management and pro poor service delivery Yet in terms of results it is difficult to distinguish growth and poverty outcomes in countries with PRSCs from other better performing IDA countries There is scope for further simplifying the language of conditionality and underpinning PRSCs with better pro poor growth diagnostics PRSCs can also strengthen their results frameworks and limit sector policy content in multi sector DPLs to high level or cross cutting issues Today Bank policy has subsumed PRSCs under the broader mantle of Development Policy Lending and the rationale for a separate brand name although differences linger from the past Since PRSCs and other policy based lending have gradually converged in design remaining differences compared to other Development Policy Loans should be clearly spelled out or the separate PRSC brand name should be phased out

**The Politics of Economic Liberalization in Indonesia** Andrew Rosser, 2013-07-04 This book examines the dynamics shaping the economic process of economic liberalisation in Indonesia since the mid 1980 s Much writing on the process of economic liberalisation in developing countries views economic liberalisation as the victory of economic rationality over political and social interests In contrast this book argues that economic liberalisation should not be understood in these terms but rather in the way that political social interests shape processes of economic reform in both a positive and negative sense Specifically Rosser argues that economic liberalisation needs to be understood in terms of the extent to which economic crises shift the balance of power and influence within society away from coalitions opposed to reform and towards those in favour of reform In the Indonesian context the main coalitions that need to be examined in this respect are the politico bureaucrats and the conglomerates who have generally opposed reform and mobile capitalists who have generally supported reform Based on extensive original research and providing much new material the book considers the politics of economic policy making in Indonesia in a range of sectors including the capital market intellectual property law the banking industry and the trade and investment sectors Analysing why the nature of economic policy in Indonesia has varied over time this study argues that there is nothing inevitable about a transition to a fully fledged liberal market order in Indonesia and outlines possible future scenarios for the country s political economy
