Copyright Office, 1964 The record of each copyright registration listed in the Catalog includes a description of the work copyrighted and data relating to the copyright claim the name of the copyright claimant as given in the application for registration the copyright date the copyright registration number etc *The Paris Zone* James Cannon, 2016-02-24 Since the mid 1970s the colloquial term zone has often been associated with the troubled post war housing estates on the outskirts of large French cities However it once referred to a more circumscribed space the zone non aedificandi non building zone which encircled Paris from the 1840s to the 1940s This unusual territory although marginal in a social and geographical sense came to occupy a central place in Parisian culture Previous studies have focused on its urban and social history or on particular ways in which it was represented during particular periods By bringing together and analysing a wider range of sources from the duration of the zone s existence this study offers a rich and nuanced account of how the area was perceived and used by successive generations of Parisian novelists including Zola and Flaubert poets songwriters artists photographers film makers politicians and town planners More generally it aims to raise awareness of a neglected aspect of Parisian cultural history while pointing to links between current and past perceptions of the city s periphery CURRENT CONTENTS January 7, 2002 Volume 24 Number 1, 2002

the evolution of protest music in France since 1981 exploring the contradictions that emerge when artists who take their musical production and political commitment seriously cross over to the mainstream becoming profitable and consensual Contestation is understood as a discourse shaped by the assumptions and practices of artists producers the media and audiences for whom it makes sense to reject politically reactionary ideas and the dominant taste for commercial pop Placing music in its economic historical and ideological context however reveals the fragility and instability of these oppositions The book firstly concentrates on music production in France the relationships between independent labels major companies and the state's cultural policies This section provides the material background for understanding the development of rock alternatif France's self-styled subversive genre of the 1980s and explains the specificity of a protest music culture in late twentieth century France in relation to the genre's tradition in the West The second part looks at representations of a protest identity in relation to discourses of national identity focusing on two 1990s sub-genres The first chanson néo-réaliste contests modernity through the use of acoustic instruments but its nostalgic protest raises questions about the artists' real engagement with the present The second rock métis borrows from North African and Latino rhythms and challenges the neutral Frenchness of the Republic while advocating multiculturalism in problematic ways A discussion of Manu Chao's career a French artist who has achieved success abroad also allows an exploration of the relationship between transnationalism and anti-globalization politics Finally the book examines the audiences of French protest music and considers festivals as places of non-mainstream identity negotiation Based on first-hand interviews this section highlights the vocabulary of emotions that audiences use to make sense of an alternative performance unveiling the contradictions that underpin their self-definition as participants in a protest culture The book contributes to debates on the cultural production of resistance and the representation of post-colonial identities uncovering the social constructedness of the discourse of protest in France It pays attention to its nation-specific character while offering a wider reflection on the fluidity of subversive identities with potential applications across a range of Western music practices *Littératures Contemporaines*
