Alcohol And Homicide A Deadly Combination Of Two American Traditions Suny Series In Violence:

Alcohol and Homicide Robert Nash Parker, Linda-Anne Rebhun, 1995-01-01 The authors show how and why alcohol and violence are so often linked today *Behind Bars* Columbia University. National Center on Addiction and Substance Abuse, 1998 *Encyclopedia of Criminological Theory* Francis T. Cullen, Pamela Wilcox, 2010-09-23 Consistently excellent The level and coverage of the content make this an invaluable reference for students studying criminology or taking criminal psychology modules at degree level and beyond Adam Tocock Reference Reviews In discussing a criminology topic lecturers and course textbooks often toss out names of theorists or make a sideways reference to a particular theory and move on as if assuming their student audience possesses the necessary background to appreciate and integrate the reference However university reference librarians can tell you this is often far from the case Students often approach them seeking a source to provide a quick overview of a particular theory or theorist with just the basics the who what where how and why if you will And reference librarians often find it difficult to guide these students to a quick one stop source In response SAGE Reference is publishing the two volume Encyclopedia of Criminological Theory available in both print and electronic formats This serves as a reference source for anyone interested in the roots of contemporary criminological theory Drawing together a team of international scholars it examines the global landscape of all the key theories and the theorists behind them presenting them in the context needed to understand their strengths and weaknesses In addition to interpretations of long established theories it also offers essays on cutting edge research as one might find in a handbook And like an unabridged dictionary it provides concise to the point definitions of key concepts ideas schools and figures Coverage will include contexts and concepts in criminological theory the social construction of crime policy implications of theory diversity and intercultural contexts conflict theory rational choice theories conservative criminology feminist theory Hispanic Journal of Behavioral Sciences, 1998 American Book Publishing Record, 1995 *International Criminal Justice Review*, 2001 *Whitaker's Books in Print*, 1998 Social Policies for Children Irwin Garfinkel, Jennifer L. Hochschild, Sara S. McLanahan, 2001-08-09 Successful social policies for children are critical to America's future Yet the status of children in America suggests that the nation's policies may not be serving them well Infant and child mortality rates in the U S remain high compared to other western industrialized nations child poverty rates have worsened in the past decade poor health care child abuse and inadequate schooling and child care persist This book presents a new set of social policies designed to alleviate these problems and to help satisfy the needs of all children The policies deal with the seven critical domains affecting children from birth through the passage to adulthood child care schooling transition to work health care income security physical security and child abuse While nearly everyone agrees that children are in trouble there is considerable debate over what kind of trouble they are in why this is so and whether government can or should more actively seek to solve these problems Americans are evenly divided on the question of whether children's problems are more economic or moral in origin The

seven proposals in this volume both reflect and cut across ideological disagreements. Some call for more government, others call for less, and all call for different government methods for achieving socially agreed upon goals. Recommendations include replacing major welfare programs and tax subsidies with a set of universal policies including national health insurance, child support assurance, and universal child care; offering publicly funded vouchers to allow poor children in inner city neighborhoods to choose their own schools; using both private and governmental resources to get tough on crime; through more stringent criminal justice policies and dramatic social measures; and expanding apprenticeship programs for non-college bound youths. In addition to the editors, the contributors are Barbara R. Bergmann and Robert I. Lerman, American University; Douglas J. Besharov, American Enterprise Institute; John J.
