**Alcohol: No Ordinary Commodity** Thomas F. Babor,Sally Casswell,Kathryn Graham,Taisia Huckle,Michael Livingston,Esa Österberg,Jürgen Rehm,Robin Room,Ingeborg Rossow,Bundit Sornpaisarn,2022-10-31 Alcohol No Ordinary Commodity is a collaborative effort

by an international group of addiction scientists to improve the linkages between addiction science and alcohol policy. It presents in a comprehensive practical and readily accessible form the accumulated scientific knowledge on alcohol research that has a direct relevance to the development of alcohol policy on local, national and international levels. It provides an objective basis on which to build relevant policies globally and informs policy makers who have direct responsibility for public health and social welfare. By locating alcohol policy primarily within the realm of public health, this book draws attention to the growing tendency for governments both national and local to consider alcohol misuse as a major determinant of ill health and to organize societal responses accordingly. The scope of the book is comprehensive and global. The authors describe the conceptual basis for a rational alcohol policy and present new epidemiological data on the global dimensions of alcohol misuse. The core of the book is a critical review of the cumulative scientific evidence in seven general areas of alcohol policy: pricing and taxation regulating the physical availability of alcohol; modifying the environment in which drinking occurs; drinking driving countermeasures; marketing restrictions; primary prevention programs in schools and other settings; and treatment and early intervention services. The final chapters discuss the current state of alcohol policy in different parts of the world and describe the need for a new approach to alcohol policy that is evidence based, global and coordinated. A valuable resource for those involved in addiction science and drug policy as well as those in the wider fields of public health, health policy, epidemiology and practising clinicians.

Using qualitative research methods, the essays examine the roles of key players including governments, NGOs, public health advocates and representatives of the alcohol industry. The contributors base their incisive papers on interviews with representatives from public health and the government, lobbyists, researchers, media and those in the alcohol industries as well as on an analysis of government documents, newspaper accounts and official statistics.

**Alcohol, Power and Public Health** Shane Butler, Karen Elmeland, Betsy Thom, James Nicholls, 2017-03-16. In recent years, the reduction of alcohol related harm has emerged as a major policy issue across Europe. of pricing strategies restrictions on retail availability and marketing regulations Alcohol Power and Public Health explores the emergence of the public health perspective on alcohol policy in Europe the strategies alcohol control policy advocates have adopted and the challenges they have faced in the political context of both individual states and the European Union The book provides a historical perspective on the development of alcohol policy in Europe using four case studies Denmark England Scotland and Ireland It explores the relationship between evidence values and power in a key area of political decision making and considers what conditions create or prevent policy change The case studies raise questions as to who sets policy agendas how social problems are framed and defined and how governments can balance public health promotion against both commercial interests and established cultural practices This book will be of interest to academics and researchers in policy studies public health social science and European Union studies
