Aldo Van Eyck Works 19441999:

Metaphorical Practices in Architecture Sarah Borree, Stephanie Knuth, Moritz Röger, 2023-06-23 Metaphors are diversly and intricately embedded in architectural practice and discourse Precisely for this reason this volume argues and sets out to explore how they can be engaged to critically interrogate architecture s social cultural and political dimensions past and present and to productively challenge and intervene with established perspectives debates and practices Mapping out not just potentials but also addressing the challenges limitations and dangers inherent in using metaphors in architectural research and practice the volume prominently illustrates the ambiguity and contradictoriness inherent in both metaphors and the process of engaging and exploiting them Covering a broad range of historical and geographical cases and concerns the contributions illustrate effectively that metaphors can expand or narrow our engagement with architecture and consolidate or legitimise but also destabilise and challenge established social cultural disciplinary and political structures concepts and categories With its aim to explore metaphors as both subject and method to critically challenge and expand established practices perspectives and standards in architectural research and practice the volume will be of interest for scholars working across the architectural humanities including architectural history theory culture design and urbanism as well as for researchers concerned with architecture and the city from fields such as cultural visual and area studies as well as art history

Exhibition as Interior, Interior as Exhibition Penny Sparke, Jana Scholze, Pat Kirkham, Ersi Ioannidou, Fiona Fisher, Patricia Lara-Betancourt, 2025-09-04 Exhibition design has long been studied in the fields of art design and architecture but the focus has been on the design of the exhibition narrative rather than the design as interior space This book breaks new ground exploring the complex relationships which exist between exhibitions museums and galleries and interior design Taking a case study driven approach chapters explore a wealth of spaces looking at contemporary art galleries and globally renowned museums and also subverted spaces like squatted homes high rises distilleries and laboratories Their geographic coverage ranges from socialist Eastern Europe to the US stopping via many other countries such as Germany Croatia Australia and the UK These case studies rethink how exhibitions interact with their spatial surroundings with key themes including the role of labour in creating these spaces the dualism of public and private space the impact of exhibition audiences and reception the political implications of exhibitions and the influence of institutions With an interdisciplinary range of contributors and combining a historical and contemporary outlook this is a must read for anyone designing or curating design driven museum spaces
