Psychological Perspectives on Reality, Consciousness and Paranormal Experience Tony Jinks, 2019-10-03

This book explores various explanatory frameworks for paranormal encounters

It opens with the story of an inexplicable human figure seen crossing a secluded hotel corridor interpreted as a ghost by the sole witness

The subsequent chapters explore the three most important historical perspectives accounting for this and other types of paranormal experience

Each perspective is examined from first principles with specific reference to what happened in the corridor how it happened why it happened and who might be responsible

The first perspective considers the experience to be legitimate to be something real and various possibilities are presented that are grounded in the paranormal and parapsychological literature among which a ghost is one putative explanation

In turn the second perspective treats the experience as being wholly illegitimate

With reference to psychological theory the ghost sighting is a product of erroneous consciousness

The third perspective is different yet again and considers the sighting to be authentic but argues that explaining the ghost requires a radical departure from conventional models of reality and consciousness

By contrasting these three paths the book provides a valuable resource for readers interested in the philosophical and psychological origins of explanations for paranormal experiences from the 19th century to the present

It will appeal to general readers in addition to students and scholars of parapsychology anomalistic psychology and consciousness studies

Returning to Reality Phillip M. Thompson, 2012-11-14

This book synthesizes the diverse reflections on technology by monk and spiritual writer Thomas Merton to develop a compelling contemplative critique of the threats and challenges of nuclear war communication technologies and biotechnologies that may alter what it means to be human

At the core of his critique Merton opposes a technological mentality that favors processes of efficiency and utility at the expense of our ultimate purpose a quest for the wisdom to guide us to the divine source of our being and reality

To counter this modern idolatry Merton's insights offer a path of reflection balance and community

More specifically Merton offers some constructive approaches and healing possibilities through a balanced approach to work a careful and intentional managing of technology and an accessing of the recuperative dimensions of nature

In its conclusion the book brings the insights of these chapters together for a final reflection on how to maintain our humanity and our spiritual integrity in a technological world

Space Travelers and the Genesis of the Human Form Joan D'Arc, 2000

Can Darwinian evolution actually prove that we are alone in the Universe

This book illustrates that Darwinian evolution is not an empirically predictable or testable scientific paradigm

Also shows that ancient artifacts on Mars and the Moon are evidence of Game Wardens in our own solar system

Could the Earth be a controlled DNA repository for the ongoing creation and dissemination of life forms including humans

The author puts forth compelling evidence in this well researched work

Mindfulness,

Now and Zen: The sceptics guide to Ultimate Reality Wally Barr, 2017-02-22 This book explores how each of us knows what we know. It considers claims that we see only illusions and that behind it all there is an indescribably beautiful reality both a God and a Nirvana. The book goes on to explain in simple terms how these two ideas so different on the surface may not be so different at all. Ranging across the centuries the book draws on the teachings of a wide variety of thinkers from vastly different cultural philosophical and religious backgrounds. The message they each bring is distilled into one consistent story in which our everyday sense of reality can be thought of as a deceptive and rather pale reflection of what's really going on. And although our thinking processes are seriously limited the book describes how we can all transcend these limitations and experience Ultimate Reality through the simple practice of mindfulness for mindfulness meditation offers freedom from thinking.

Future of Hope and Present Reality Andrew Chester, 2012 This book is the first of a two volume work with the overall title Future Hope and Present Reality. These volumes had their origin in the Speaker's Lectures that Andrew Chester gave in Oxford. Their main focus is central themes in biblical eschatology and especially the apparent contradictions between what is hoped for in the future and what is experienced in the present, the stark discrepancy that is between the world as it is and the world as it should be. In this first volume as the subtitle Eschatology and Transformation in the Hebrew Bible indicates the author is concerned with the Hebrew Bible or Old Testament; the second will be on the New Testament. He deals successively with central eschatological themes and the deep tensions they involve: divine threats of an absolute end to human life and to the world itself and divine promises of blessing and transformation along with the theological questions inevitably raised by these both in themselves and in relation to each other: the whole phenomenon of prophecy and the problems it involves not least whether it can be taken seriously in face of the contradictions and failures it manifests. He discusses the sheer discrepancy between ideal and reality in traditions relating to kingship along with the tensions inherent in the emergence of messianic hope, death as representing the end of any relationship with God along with hope that goes beyond death in relation both to the individual and also the nation and finally visions of a transformed and paradisaical world and whether these can bear any relation to reality. It is argued that the Hebrew Bible can be seen to offer genuine grounds for hope but that these can have any cogency only if the problems involved are really engaged with.

Reality Check Pivot, 2020-09-10 For readers of The Celestine Prophecy this is what you've been waiting for. Reality Check was written for everyone else who knows that we're on the verge of pushing Mother Nature and the economy to the breaking point. Reality Check shows the urgent need to reverse humanity's downward spiral by undoing the status quo. Half the book is filled with quotes from the likes of Chomsky, Sagan, Carlin, Goodall, Soros, Orwell, Asimov, Hegel, William James, Sting and the Beatles as well as some of the most popular TV shows and movies. This over the top attempt to avert an evolutionary crash hopes instead to turn the situation into an evolutionary bounce by galvanizing members of the so-called choir who already understand that the status quo needs to be revamped. Otherwise civilization as we know it won't last much longer. The book addresses

everything from parenting to economics political systems to global warming and general environmental destruction as well as sociology history and God It s time for a reality check What are you waiting for Reality Check Daniel Ford,2024-03-07
