**Maya Christian Murals of Early Modern Yucatán** Amara Solari, Linda K. Williams, 2024 This multidisciplinary project studies religious murals that were painted by Christianized Maya artists in the first centuries after the conquest of Mexico Solari and Williams study the paintings all of which are based in the Yucatán Peninsula from an art history perspective along with the printed sources referencing the murals At the same time they examine the chemical signatures left by the murals pigments and the techniques used in their production through state of the art imaging technologies By using these methodologies the authors seek to explain the many ways in which cultural and material exchange took place between the Spanish and Maya peoples At first glance murals depicting Spanish ideals of Western Christianity would appear to be an obvious and frequent tool of oppression in the Yucatán as they were elsewhere in the Americas but they were also a form of agency for Indigenous people as a means to shape these narratives with their own subtle imagery and ideas drawn from Mayan cosmologies and cultural traditions These painters used European pictorial techniques such as perspective while also using local materials to create vivid pigments and colors never before seen in murals in Europe The authors seek to trace how the initial and continued use of these material sources to create these images led to a much more localized form of Catholicism that continues to be practiced by Mayan speakers today

**Jewish Latin American Artists**, 2025-09-18 Jewish visual artists living and working in Latin America during the 20th and 21st centuries broaden an appreciation of the art of the Americas The anthology addresses an often underacknowledged Jewish presence as part of the aesthetic of the global south providing the general public and scholars with in depth insights The artists dynamic prints sculptures paintings and photographs explore aspects of modernist abstraction and at times indigenous materials sardonic commentary on consumerism and utopian ideals in their works of art The anthology begins to fill a void of the contribution of Jewish Latin American artists born in Europe who immigrated to Latin America and others born there

Exiles and Citizens Patricia W. Fagen, 2014-11-07 At the end of the Spanish civil war Mexico was the only country to offer open refuge to the thousands of Republican emigrants who fled from Spain in 1939 1940 Exiles and Citizens is a study of these political exiles especially those with intellectual and professional backgrounds and ambitions It focuses on

their adjustment to Mexico on their continued ties to Spain and on their impact on Mexican development The critical dilemma faced by the Spanish exiles was that despite having fought for their political and social ideals in Spain they forfeited in exile their active role in Spanish history In Mexico they found a political and social system that seemed to include many of the ideals that had inspired the Spanish Republic moreover they were able to incorporate themselves economically professionally and intellectually into Mexican national life Yet because they were not native born citizens they had little or no creative part to play in the politics of their adopted country For Mexico the impact of the refugees from Spain was enormous Integrated from the first into nearly all intellectual professional and cultural fields their skills proved an important catalyst to Mexican development Yet outside these fields Mexico was never an effective melting pot The Republicans themselves were divided in their loyalties and the Mexicans from the beginning were reluctant to encourage the full participation of their guests in national affairs Two goals were shared by most of the exiles to ensure that the world would remember the liberal creative and open Spain they had created and thus reject Franco to show their gratitude by working for the benefit and progress of Mexico These goals although frequently contradictory sustained the emigration and gave meaning to exile The refugees tried to maintain their identity by coming together in formal and informal associations that were intended either to act on behalf of the homeland or to re create the Spanish Republican structures and values in exile To maintain a Spanish identity however proved difficult and for the second and third generations in Mexico the initial goals had already lost their meaning For them economic and professional as well as familial ties were strongly Mexican Spanish Republicans in Mexico represented a fairly rare phenomenon a large group of skilled relatively well educated immigrants to a country where persons of their attainments and status were not numerous Moreover as political exiles they approached the problems of acculturation differently from economic emigrants Patricia Fagen s study thus offers a further understanding of an important exile community and the characteristics that set it apart from other examples of immigrant experiences In addition the study sheds new light on the intellectual history of Mexico and the far reaching effects of the Spanish civil war
