Craft as a Creative Industry Karen Patel, 2024-04-01 Craft is resurgent. More people are buying craft, more money is being spent on craft products than ever before. This book centres craft as a creative industry, illuminating the experiences of those working in and around craft, particularly people from marginalised groups. Shining a light on inequalities around craft work, the author examines the lived experiences of women makers of colour in the professional craft sector. Experiences of racism and microaggressions at all stages of their craft career are analysed. The author draws on innovative empirical research carried out in the UK and Australia, two countries where the resurgence in craft is apparent, yet professional craft practice is dominated by the white and relatively privileged. In interrogating hierarchies of expertise and cultural value in craft, the author employs case studies from community crafts and social enterprises. The result is a book of interest to scholars at the intersections of the creative and cultural industries, the creative economy and inequalities at work. *The Routledge International Handbook of Creative Learning* Julian Sefton-Green, Pat Thomson, Ken Jones, Liora Bresler, 2011-07-15 The concept of creative learning extends far beyond Arts based learning or the development of individual creativity. Organizing Creativity Stephan M. Schaefer, 2023-09-22 Creativity is a defining feature of contemporary work life Who has not taken part in brainstorming sessions read glossy pamphlets about innovation and creativity as important cornerstones of a new business strategy or been made aware of the importance of creative skills for one s career But what does it mean to be creative in and as an organization Organizing Creativity provides an answer to this question The book builds on the premise that creativity is essentially about ideas Every organization is dependent on valuable ideas for solving everyday problems as well as inventing new processes products or services The main argument of the book is that an analysis of organizational creativity should always account for the interdependency of context process and practice Based on cultural and processual perspectives it highlights the implications of context process and practice for different aspects of the creative process generating evaluating and facilitating ideas Furthermore it reflects on how dominant notions of creativity in the economy and society prevent transformative changes and suggests a radical transformative approach to organizing creativity as an alternative To support and illustrate its argument Organizing Creativity draws on abundant empirical examples case illustrations and seminal research from Sociology Social Psychology and Organization Studies It provides us with a multi dimensional perspective and will both further our understanding of and spark critical reflection on the complex interplay of the organizational social and cultural contexts processes and practices of organizing creativity
