German and English Christoph Friedrich Grieb, 1857 **Food** Warren Belasco, 2008-09-01 Food The Key Concepts presents an exciting, coherent, and interdisciplinary introduction to food studies for the beginning reader. Food Studies is an increasingly complex field drawing on disciplines as diverse as Sociology, Anthropology, and Cultural Studies at one end, and Economics, Politics, and Agricultural Science at the other. In order to clarify the issues, Food The Key Concepts distills food choices down to three competing considerations: consumer identity, matters of convenience and price, and an awareness of the consequences of what is consumed. The book concludes with an examination of two very different future scenarios for feeding the world's population: the technological fix which looks to science to provide the solution to our future food needs, and the anthropological fix which hopes to change our expectations and behaviors. Throughout the analysis is illustrated with lively case studies. Bulleted chapter summaries, questions, and guides to further reading are also provided.
