*The Moon and the Bonfire* Richard Bradley, Sharon Arrowsmith, 2005 Whilst a report on excavations at three stone circles and two fieldwalking projects in north east Scotland may not seem very appealing this book does much to heighten public awareness and interest in such sites and re connects us with the mysterious monuments of the past This study of the sites of Tomnaverie Deeside Cothiemuir Wood Donside and Aikey Brae Buchan is written in an engaging and approachable style with plenty of illustrative material Whilst the project was geared towards investigating the character chronology structural development and wider context of the stone circles its results go much further in revealing how people used and perceived such sites and the landscape around them Here contextual information discussion of methodology and objectives are combined with factual data and interpretation as the project members examine various aspects of the sites such as the characterisation shape colour and texture of the stones used construction techniques evidence of burning the presence of human remains and possible solar and lunar alignments The proffering of new insights into the use and symbolism of the monuments is highly valuable for example the suggestion that we should perhaps consider the use of these stone circles during the hours of darkness rather than daylight an idea first proposed by Aubrey Burl requires us to re think our preconceptions about monuments in the past The rewards of painstaking excavation and trudging through muddy fields are evident in a publication such as this
