Transformations of Contemporary Capitalism David Evans, 2023-10-02 In recent decades there has been many attempts to describe explore and explain the new post modern capitalism of the twenty first century In this context this book looks at one of the most exciting strands of this research in the late twentieth century the flexible specialisation research programme FSRP Drawing on the history of ideas discourse and literature on capitalism of the last four decades this book shows that although flexible specialisation anticipated some of the ways in which capitalism was being transformed in the late twentieth century they underestimated and failed to anticipate the forms of creative destruction and corporate digital control which were becoming embedded in the global capitalist accumulation dynamic itself The sudden disappearance of the Soviet Union and the end of history failed to open up the pathway for new forms of modern social democracy but gave rise instead to the new digital Behemoths Today the classical tendencies of capitalism as anticipated by Marx are all too present and despite talk of post capitalism and digital techno feudalism the landscape of monopolyfinance capital has consolidated itself The book counterposes the FSRP with the various Marxist interpretations of the capitalist transition together with the wider social and economic theories that emerged in the first decades for the twenty first century around for example the great acceleration de growth and post growth This book will be of interest to all readers concerned with heterodox political economy critical social theory intellectual history and above all the prospects for social transformation leading to social justice and an egalitarian enlightenment

Welsch, 2020-03-31 The Selling and Self Regulation of Contemporary Poetry is the first book length study of the contemporary poetry industry By documenting radical changes over the past decade in the way poems are published sold and consumed it connects the seemingly small world of poetry with the other wider creative industries In reassessing an art form that has been traditionally seen as free from or even resistant to material concerns the book confronts the real pressures and real opportunities faced by poets and publishers in the wake of economic and cultural shifts since 2008 The changing role of anthologies prizes and publishers are considered alongside new technologies new arts policy and re conceptions of poetic labour Ultimately it argues that poetry s continued growth and diversification also leaves individuals with more responsibility than ever for sustaining its communities The Origines of Contemporary France Taine, 1876
