Special edition of the Federal Register containing a codification of documents of general applicability and future effect with ancillaries The F Programming Language Michael Metcalf,John Ker Reid,1996

The F programming language is a dramatic new development in scientific programming Building on the well established strengths of the Fortran family of languages it is carefully crafted to be both safe and regular whilst retaining the enormously powerful numerical capabilities of its parent language Fortran 90 as well as its data abstraction capability Thus an array language becomes available as part of a medium size widely available language for the first time In this respect the language is clearly superior to older ones such as Pascal C and Basic The book begins with an introductory chapter then describes in turn the features of the language language elements expressions and assignments control constructs program units and procedures array features intrinsic procedures and the input output facilities It is completed by six appendices including the difference between F and Fortran 90 and solutions to most of the exercises In the absence of a formal standard for F this book is the defining document for the language setting out the complete syntax and semantics of the language in a readable but thorough way It is essential reading for users of F
