Smoke Sander L. Gilman, Xun Zhou, 2004 People have always smoked and they probably always will Every culture in recorded history has smoked something whether for pleasure or relief whether as part of an elaborate religious ritual or merely to strike a pose This is the first truly comprehensive history of smoking describing all of its forms practices paraphernalia and materials in cultures locations and times throughout the world

The Smoking Book Lesley Stern, 2008-04-15 The Smoking Book is a dreamlike structure built on the solid foundation of two questions how does it feel to smoke and what does smoking mean Lesley Stern in an innovative hybrid form of writing muses on these questions through intersecting stories and essays that connect expand and contract like smoke rings floating through the air Stern writes of addictions and passionate attachments of the body and bodily pleasure of autobiography and cultural history Smoking is Stern's seductive pretext her way of entering unknown and mysterious regions The Smoking Book begins with intimate and vivid accounts of growing up on a tobacco farm in colonial Rhodesia reminiscences that permeate subsequent excursions into precolonial tobacco production and postcolonial life in Zimbabwe as well as dramatic vignettes set in Australia the United States Scotland Italy Japan and South America Stern has written a book at once intensely personal and kaleidoscopically international that weaves the intimate act of a solitary person smoking a cigarette into a broad cultural picture of desire exchange fulfillment and the acts that bind people together either in lasting ways or through ephemeral encounters The Smoking Book is for anyone who has ever smoked or loved a smoker against their better judgment it is for those who have never smoked or for those who mourn the loss of cigarettes as they would grieve for a lost friend But mostly The Smoking Book is for all those who are smoldering still

Ashton, Rob Stepney, 1982-01-01 The Faber Book of Smoking James Walton, 2000 Since the day that Christopher Columbus first observed native Americans with firebrands in their hands and herbs to smoke after their custom tobacco has wound its way into every corner of modern life In its various forms smoking has soothed and irritated us inspired and stupefied us beguiled us on screen and outraged us in train carriages Robert Burton wrote in *The Anatomy of Melancholy* that tobacco was divine a sovereign remedy to all diseases Nearly four centuries later the Oxford Medical Companion dryly noted that tobacco is the only legally available consumer product that kills people when it is used entirely as intended We've come a long way baby With contributions from the likes of Sir Walter Raleigh and Kenneth Williams Samuel Johnson and Helen Fielding *The Faber Book of Smoking* tells the fascinating story of one of humankind's most persistent and peculiar habits **Smoking is Good for You** William T. Whitby, 1978 **The Cigarette Book** Chris Harrald, Fletcher Watkins, 2010-11 A truthful and learned treasury of musings on the miracle drug Beryl *Learning to Smoke* Jason Hughes, 2003-02-15 Why do people smoke Taking a unique approach to this question Jason Hughes moves beyond the usual focus on biological addiction that dominates news coverage and public health studies and invites us to reconsider how social and personal understandings of smoking crucially affect the way people experience it *Learning to Smoke* examines the diverse sociological and cultural processes that have compelled people to smoke since the practice was first introduced to the West during the sixteenth century Hughes traces the transformations of tobacco and its use over time from its role as a hallucinogen in Native American shamanistic ritual to its use as a prophylactic against the plague and a cure for cancer by early Europeans and finally to the current view of smoking as a global pandemic He then analyzes tobacco from the perspective of the individual user exploring how its consumption relates to issues of identity and life changes Comparing sociocultural and personal experiences Hughes ultimately asks what the patterns of tobacco use mean for the clinical treatment of smokers and for public policy on smoking Pointing the way then to a more learned and sophisticated understanding of tobacco use this study will prove to be essential reading for anyone interested in the history of smoking and the sociology of addiction **My Gift to Help You Quit Smoking** Peter Kruse, 2020-10 For smokers to consider reflect and be liberated For non smokers to provide understanding of the struggles and trials of quitting One of these days I'm going to quit smoking If you've ever had this thought then this book is for you It's not a panacea It's the critical self reflection of a former smoker Open honest and direct Matthias Rost Dipl social pedagogue addiction therapist Diakonie Leipzig Germany Highly recommended for every smoker who wants to overcome his addiction and for their partners who want to better understand their struggle With the Lead motive method developed by the author there will be far fewer smokers in the future I am sure of it Stefan Bienert test reader A special book It sums things up in a nutshell It is written in an entertaining way without losing sight of the seriousness of the subject The author closes a previously unoccupied gap in the literature on quitting smoking Markus Wienken editor in chief of Verdener Aller Zeitung Germany quitsmoking stopsmoking nonsmoker

nonsmoking smokefree drugfree *Smoking, Health and Personality* Hans Jurgen Eysenck, Stuart Brody, 2000-01-01 The Report on Smoking and Health published by the Royal College of Physicians in England in 1965 warned of a connection between lung cancer and smoking The findings were widely publicized and were accepted by practically every one indeed they persist today As Hans J Eysenck shows in his classic study *Smoking Health and Personality* the results were by no means immune to challenge Not only were the experimental and statistical methods employed vulnerable to criticism but the results were open to more than one interpretation In this new edition Stuart Brody reviews Eysenck s achievement Eysenck critically reviewed the literature presented longitudinal studies showing that psychological characteristics are far more potent predictors of heart disease and cancer than smoking behavior and demonstrated that psychological treatment can halve death rates Eysenck also spoke the unspeakable iconoclastically attacking the cherished attribution of millions of deaths to smoking He examined the interaction of smoking with personality and constitutional factors and the connection between these factors and the development of cancer Eysenck saw the cause and effect relation between cancer and smoking as oversimplification He also makes a number of practical suggestions for the kind of social action that could be taken to decrease the incidence of lung cancer For his part Brody notes that massive campaigns which exhort people to eschew tobacco or cholesterol have had little or no demonstrable health benefits This original and stimulating volume is written with great clarity and is easily understood by the layman It is an incisive account of one of the most important social problems in this country today and a challenge to orthodoxy in the medical world As such this volume offers much for both sides of the anti smoking lobby as well as those in the fields of psychology political science and sociology Hans J Eysenck 1916 1997 wrote many books including the internationally acclaimed *Know Your Own IQ* and *The Uses and Abuses of Psychology* His works available from Transaction include *Intelligence* and new editions of *Rebel with a Cause* *The Psychology of Politics* and *Dimensions of Personality* Stuart Brody worked as a clinical psychologist in Germany as well as the United State He has been published in major U S and British medical journals and is author of *Sex at Risk* published by Transaction Tobacco Industry and Smoking Fred C Pampel, Fred C.
