Excerpt from *The Book of Stars Being a Simple Explanation of the Stars and Their Uses to Boy Life Written to Conform to the Tests of the Boy Scouts* If you have never stood out in the open and watched the stars on a clear night you have missed the most wonderful sight to be seen from this little old mud ball of ours and my advice to you is not to let another night go by without making friends with the stars By the stars I mean everything in the far off sky that we can see and this includes the white hot points of light we call the fixed stars the blazing sun the bright planets the pale cold moon the fiery comets and the burning meteors All of these things in the sky are so easily ours to look at to enjoy and to use that we are apt not to take them at their true value just as many of us do not appreciate to the fullest the green grass the trees the birds and all the other good things we have without price You may wonder how you can make any use of the stars but there are dozens of ways by which they will serve your purpose from finding the north to lighting a fire and from telling the time to sending a signal and they are all easy to you when you know how All the apparatus you need so that you can know the stars is a pair of good sharp eyes and if you are fitted with these you are ready to begin your work in stargazing this very night About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works *The Stars and Their Stories*, 1913 *The Stars and Their Stories* A Book for Young People by Mary Matlock Griffiths first published in 1913 is a rare manuscript the original residing in one of the great libraries of the world This book is a reproduction of that original which has been scanned and cleaned by state of the art publishing tools for better readability and enhanced appreciation Restoration Editors mission is to bring long out of print manuscripts back to life Some smudges annotations or unclear text may still exist due to permanent damage to the original work We believe the literary significance of the text justifies offering this reproduction allowing a new generation to appreciate it The Star System Paul McDonald, 2000 Looks at the development and changing organization of the star system in the American film industry Tracing the popularity of star performers from the early cinema of attractions to the Internet universe Paul McDonald explores the ways in which Hollywood has made and sold its stars Through focusing on particular historical periods case studies of Mary Pickford Bette Davis James Cagney Julia Roberts Tom Cruise and Will Smith illustrate the key conditions influencing the star system in silent cinema the studio era and the New Hollywood Latter-Day Saints' Millennial Star, 1868 The Birth of Stars and Planets John Bally, Bo Reipurth, 2006-08-24 Publisher description **The Latter-Day**
