**Soul-Searching** Luke Jeffrey Janssen, 2019-08-06. There are well over one hundred different views of the nature of human existence though the Bible may rule out many of these, there still remains a large number that are all compatible with Scripture. The Bible never explicitly defines the nature of the soul or spirit, which is actually quite puzzling or even ironic given that one major aim of Scripture is spiritual development and ultimate questions about the soul. In fact, Judeo-Christian thinking on those questions has been evolving over the course of four thousand years. This book documents that evolution as a man named Abram left Babylon four thousand years ago, journeying through the lands and the philosophies of civilizations.

preceding him by many more thousands of years while he and his descendants both physical and spiritual unpacked their understanding of our inner being the human soul and the afterlife That journey is followed to the present day and examines how a critically thinking Christian can embrace a theology of the human soul that is fully compatible with modern scientific findings including explanations for consciousness mind and soul Medical record ,1890 *Medical Record* George Frederick Shrady, Thomas Lathrop Stedman, 1890

*Conics* Keith Kendig, 2020-07-29 This book engages the reader in a journey of discovery through a spirited discussion among three characters philosopher teacher and student Throughout the book philosopher pursues his dream of a unified theory of conics where exceptions are banished With a helpful teacher and example hungry student the trio soon finds that conics reveal much of their beauty when viewed over the complex numbers It is profusely illustrated with pictures worked out examples and a CD containing 36 applets Conics is written in an easy conversational style and many historical tidbits and other points of interest are scattered throughout the text Many students can self study the book without outside help This book is ideal for anyone having a little exposure to linear algebra and complex numbers
