China Since Tiananmen Lawrence R. Sullivan, 1995 Lawrence Sullivan has done an admirable job in selecting organising and annotating and presenting a large number of largely primary source documents on and about the development of China since 1989 Australian Journal of Political Science **Environment and Society in the Long Late Antiquity**, 2019-01-04 Environment and Society in the Long Late Antiquity brings together scientific archaeological and historical evidence on the interplay of social change and environmental phenomena at the end of Antiquity and the dawn of the Middle Ages covering the period ca 300 800 AD It gives a new impetus to the study of the environmental history of this crucial period of transition between two major epochs in premodern history The volume contains both systematic overviews of the previous scholarship and available data as well as a number of interdisciplinary case studies It covers a wide range of topics including the histories of landscape climate disease and earthquakes all intertwined with social cultural economic and political developments Contributors are Daniel Abel Schaad Francesca Alba S nchez Flavio Anselmetti Jos Antonio L pez S ez Daniel Ariztegui Brunhilda Brushulli Yolanda Carri n Marco Alexandra Chavarr a Petra Dark Carmen Fern ndez Ochoa Martin Finn Asuunta Florenzano Ralph Fyfe Didier Galop Benjamin Graham John Haldon Kyle Harper Richard Hodges Adam Izdebski Katarina Kouli Inga Labuhn Tamara Lewit Anna Maria Mercuri Alessia Masi Lucas McMahon Lee Mordechai Mario Morell n Timothy Newfield Almudena Orejas Saco del Valle Leonor Pe a Chocarro Sebasti n P rez D az Eleonora Regattieri Stephen Rippon Neil Roberts Laura Sadori Abigail Sargent Gaia Sinopoli Paolo Squatriti Giovanni Stranieri Raymond van Dam Bernd Wagner Mark Whittow Penelope Wilson Jessie Woodbridge See inside the book **Urbane and Rustic England** Carl B. Estabrook, 1998 The rapid growth and renewed vitality of English cities and towns in the century after 1660 was remarkable But what was the effect of this urban renaissance on villages and those ordinary people whose roots were in the countryside **Monthly Weather Review**, 1999 **Political Ambition** Linda L. Fowler, Robert D. McClure, 1989-01-01 How do politicians decide whether or not to run for Congress What is involved in the winnowing process that dictates months before the election the choices available to voters on the ballot Using extensive interviews and analyses of district data and opinion polls Linda Fowler and Robert McClure argue that House elections are intelligible only if we look beyond that declared candidates to those who could have run but chose not to Their book set in New York s can Congressional District during the elections of 1984 and 1986 assesses the personal and contextual factors that motivate some individuals to enter a House race and induce others to remain on the sidelines By uncovering the hidden obstacles that line the road to Washington Fowler and McClure reveal why only the most ambitious men and women complete the journey Fowler and McClure contend that the cost cna complexity of competitive House races now demand a level of commitment and advance planning that only those with a highly focused desire to serve in Congress can sustain Despite the increased presence of national parties and PACs in congressional races they say it is the local political context that dominates the decision to run Within this setting

individual candidates not party organizations develop the strategies manage the resources and define the alternatives in most House races Fowler and McClure discuss how changes in American politics such as reapportionment the redistribution of power away from Washington and the transformation of parties and interest groups affect the nation s supply of competitive office seekers And they devote special attention to the recruitment of female legislators offering insight into the continued failure of women to make significant inroads into the House of Representatives **Between Town and**

Monastery. Peasant economy in the first millennium AD Luigi Pinchetti,2021-10-31 Approaches to early medieval peasantry are often polarized either enhancing the benefits brought by the weakening of aristocratic dominance or emphasizing the limited prospects for peasant development in the absence of a solid extra regional trade network This study offers a long term overview of the peasant economy throughout the 1st millennium AD in the Upper Volturno Basin between the town of Isernia and the monastery of San Vincenzo al Volturno The reader is presented with data collected from two archaeological surveys and is invited to scrutinize changes in settlement patterns ancient land use and ceramic distributions while the main economic center shifted from town to monastery These proxies of economic performance offer a vantage point to reconstruct the history of agrarian production and of exchange networks in Central Italy opening a novel outlook on peasant social dynamics at a time when the Roman economic system transitioned into the feudal system The results show that the golden age of peasants was an age of experimentation forcing to reconsider the role of the peasantry in the making of the feudal economy **REA Loan Program** United States. Associations and Other Groups in Science Ana Delicado,2013-11-13 Associations and Other Groups in Science An Historical and Contemporary Perspective brings together a collection of texts on the subject of scientific associations and their role in science and society It combines historical approaches focused on the role that associations and other groups played in the development of particular scientific disciplines in the nineteenth and twentieth centuries with contemporary analyses that highlight the involvement of associations in engagement with wider publics A somewhat neglected subject in the social studies of science scientific associations provide an opportunity for reflecting on and discussing wider issues in science such as the place of scientific advice in policy making the structure of scientific careers and the need for building bridges between the scientific community and society at large Since all chapters examine the Portuguese scientific system

this book also contributes to acquaint international audiences with the history and the current situation of science in Portugal. Some of the research findings included here are valid across borders and may be used for comparative research. Though mainly aimed at the science and technology studies community, it has the potential to reach readers in other social sciences as well as in the hard sciences keen on the history of their disciplines. *Plague and the End of Antiquity* Lester K.
