Absolute Values And The Unity Of The Sciences The Origin And Human Responsibility:

Prophets and Protons Benjamin E Zeller,2010-03-01 This in depth study shows how new religious movements offer a variety of strategies for reconciling science and religious faith By the twentieth century established religious traditions were forced to grapple with the challenges presented by scientific knowledge and innovation But emerging religions still led by a living founder to guide them found new ways to respond to science The Hare Krishnas the Unification Church and Heaven s Gate each found distinct ways to incorporate major findings of modern American science understanding it as central to their wider theological and social agendas In *Prophets and Photons* Benjamin Zeller examines how these New Religious Movements NRMs crafted their views on science during their founding period and how those views evolved over time These NRMs shed light on how religious groups new old alternative or mainstream could respond to the tremendous growth of power and prestige of science in late twentieth century America In this engrossing book Zeller carefully shows that religious groups had several methods of creatively responding to science and that the often assumed conflict based model of science vs religion must be replaced by a more nuanced understanding of how religions operate in our modern scientific world

Absolute Values and the Unity of the Sciences ICUS Staff,Icus,1997 **Place of Science in a World of Values and Facts** Loucas G. Christophorou,2005-12-27 This is an engrossing book It is also an unusual book it is written by a scientist who is quite willing to talk about the softer side of life about things such as love and respect and responsibility and to try and position them in the context of his science He is also willing to talk about religion the manner in which it relates to science and science to it and to attempt reconciliation of both He sets himself a tough task to tread the narrow path between the maudlin and the severely sober In this he is eminently successful He is successful not because he aims at any grand synthesis but because he has chosen the more modest path of simply laying out the cards on the table This work is also unusual for another reason The majority of books that attempt to explain science to a lay public that try to describe its workings its raison d'être its hidden contents its societal impact its implications for our future etc are written by theorists This is hardly surprising The theoretician after all is expected to think deeply to be the great unifier to be concerned with meaning Very few books about science are written by scientists ones who spend their time in a working experimental laboratory This is such a book And because it is it is also a very different book *Main Currents in Western Environmental Thought* P. R. Hay,2002 Topics covered include the roots of environmental philosophy the development of ecophilosophy deep ecology and ecofeminism how religion relates to environmental values environmentalists writings on science and epistemology animal liberation the role of place the economic dimensions of environmental thought environmental writing in various political traditions and green writers critiques of political movements The work draws from the disciplines of philosophy political science psychology sociology and cultural studies [Science of Valuations](#) Salvatore Giuffrida,Maria Rosa Trovato,Paolo Rosato,Enrico Fattinanzi,Alessandra Oppio,Simona Chiodo,2024-04-16 This volume collects the best papers presented at the

2019 Conference SIEV Italian Society of Appraisal and Valuation on the Science of Evaluation foundations actuality and prospects The book consists of twenty six papers and is organized into four parts the first one collects reflections on the nature of the value judgement on the truth of the evaluative statement and on the authenticity its contents the values the next three present operational experiences in the three fields of natural urban and cultural heritage where the knowledge of the value of the human space supports decisions and policies highlighting feature concerning value and valuations in the dialectic between earth and the city the value bearers between heuristic and normatively the role of valuation for the complementarity of rules and creativity The book is being published in the midst of the new radical transformations of the equilibrium between social system and environment generated by the serious and unexpected crises of the third decade of this century Reflections on the reality that fills evaluative statement with truth the reality of values is more topical than ever in a historic phase in which the role of democracies and the destiny of civil coexistence is called into question claiming the order of unamendable values like truth justice and beauty The book brings together experiences that focus on the intentional evaluative consciousness as a condition for the responsibility of the subject individual and collective concerning the saliences and urgencies most significantly contributing to the formation of orderly communities **Modern Science and Moral**

understanding of the relation between individuals and communities and challenges us to ask ourselves how we can best achieve both harmony and freedom in our shared human future

The New Politics of Materialism Sarah Ellenzweig, John Zammito, 2017-07-14 This collection which includes an international roster of contributors from philosophy history literature and science is the first to ask what is new about the new materialism and place it in interdisciplinary perspective

Spirituality and Ethics in Management László Zsolnai, 2005-12-30 The significance of spirituality in management is acquiring considerable international recognition It is one of the hottest emerging fields in management A number of recent events underscore this development In February 2000 the Indian Institute of Management organized a Corporate Reputation for Competitive Advantage workshop in Calcutta which focused on spirituality ethics and leadership The conference Business Religion and Spirituality was held at the University of Notre Dame in April 2000 In April 2001 the International Academy of Business Disciplines held its 13 annual meeting in Orlando Florida and had a track on Spirituality in Organizations In April 2002 a world conference was organized in New York entitled Spirit in Business Ethics Mindfulness and the Bottom Line These and other important scientific events clearly show that spirituality is no longer considered to be purely a matter of individual search and is becoming more and more recognized in management and business ethics circles Our Spirituality in Management workshop was held in July 13 2001 in Szeged Hungary It was jointly organized by the Business Ethics Center of the Budapest University of Economic Sciences the Faculty of Economics and Business Administration and the Department for the Study of Religion of the University of Szeged Scholars and practitioners from 13 countries represented disciplines as diverse as economics business management studies philosophy theology sociology and medical anthropology Participants included PETER PRUZAN Copenhagen Business School Denmark S K

The Reflexive Method Applied to the Problem of God in Lachelier and Lagneau Paul Ricoeur, 2025-11-04 An engaging and thought provoking translation of Paul Ricoeur's earliest work that is essential for understanding his philosophical development The Reflexive Method Applied to the Problem of God in Lachelier and Lagneau now held in the Ricoeur Archive in Paris was a qualifying thesis Ricoeur wrote at the age of twenty one when he was just beginning his advanced university studies In it he examines the use of the reflexive method by two important French philosophers from the nineteenth century Jules Lachelier and Jules Lagneau They both sought to develop an integral metaphysics that recognizes God as the principle underlying pure impersonal thought and practical reason and that requires a kind of philosophical faith In his conclusion Ricoeur criticizes their doctrine of God and philosophy of immanence for not being able to deal with the question of transcendence and for its failure to address concrete human existence yet he concedes that it may be seen as a first truce in the internecine war between faith and reason Despite this criticism Ricoeur later maintained that his own philosophy does stand in the line of a reflexive philosophy while remaining within the sphere of Husserlian phenomenology and striving to be a hermeneutical

variation of this phenomenology He also continued to address the question of faith and reason in works like *Figuring the Sacred* and with Andr LaCocque *Thinking Biblically* as well as in many other essays *The Reflexive Method Applied to the Problem of God* in Lachelier and Lagneau is necessary reading for anyone doing serious work on and with Ricoeur s philosophy *Bio-syllabus for European Environmental Education* Agni Vlavianos-Arvanitis,2002 **Congressional Record** United States. Congress,1979 *The Philosophy of History* Augustus Schade,1899 **From Modernity to Cosmodernity** Basarab Nicolescu,2014-01-01 Offers a new paradigm of reality based on the interaction between science culture spirituality religion and society The quantum biological and information revolutions of the twentieth and twenty first centuries should have thoroughly changed our view of reality yet the old viewpoint based on classical science remains dominant reinforcing a notion of a rational mechanistic world that allows for endless progress In practice this view has promoted much violence among humans Basarab Nicolescu heralds a new era cosmodernity founded on a contemporary vision of the interaction between science culture spirituality religion and society Here reality is plastic and its people are active participants in the cosmos and the world is simultaneously knowable and unknowable Ultimately every human recognizes his or her face in the face of every other human being independent of his or her particular religious or philosophical beliefs Nicolescu notes a new spirituality free of dogmas and looks at quantum physics literature theater and art to reveal the emergence of a newer cosmodern consciousness *Europe, or The Infinite Task* Rodolphe Gasché,2008-12-22 What exactly does Europe mean for philosophy today Putting aside both Eurocentrism and anti Eurocentrism Gasch returns to the old name Europe to examine it as a concept or idea in the work of four philosophers from the phenomenological tradition Husserl Heidegger Pato ka and Derrida Beginning with Husserl the idea of Europe became central to such issues as rationality universality openness to the other and responsibility Europe or The Infinite Task tracks the changes these issues have undergone in phenomenology in order to investigate Europe s continuing potential for critical and enlightened resistance in a world that is progressively becoming dominated by the mono perspectivism of global market economics Rather than giving up on the idea of Europe as an anachronism Gasch aims to show that it still has philosophical legs *The Saturday Review of Politics, Literature, Science and Art* ,1856
