Absolute Values And The New Cultural Revolution:

ICUS XIII Commemorative Volume, 1984 Claude Alvin Villee,1985-11-01 **Prophets and Protons** Benjamin E Zeller,2010-03-01 This in depth study shows how new religious movements offer a variety of strategies for reconciling science and religious faith By the twentieth century established religious traditions were forced to grappled with the challenges presented by scientific knowledge and innovation But emerging religions still led by a living founder to guide them found news ways to respond to science The Hare Krishnas the Unification Church and Heaven s Gate each found distinct ways to incorporate major findings of modern American science understanding it as central to their wider theological and social agendas In **Prophets and Photons** Benjamin Zeller examines how these New Religious Movements NRMs crafted their views on science during their founding period and how those views evolved over time These NRMs shed light on how religious groups new old alternative or mainstream could respond to the tremendous growth of power and prestige of science in late twentieth century America In this engrossing book Zeller carefully shows that religious groups had several methods of creatively responding to science and that the often assumed conflict based model of science vs religion must be replaced by a more nuanced understanding of how religions operate in our modern scientific world *A General Theory of Emotions and Social Life* Warren D. TenHouten,2006-11-22 Founded upon the psychoevolutionary theories of Darwin Plutchik and Izard a general socioevolutionary theory of the emotions affect spectrum theory classifies a wide spectrum of the emotions and analyzes them on the sociological psychological and neurobiological levels This neurocognitive sociology of the emotions supersedes the major theoretical perspectives developed in the sociology of emotions by showing primary emotions to be adaptive reactions to fundamental problems of life which have evolved into elementary social relationships and which can predict occurrences of the entire spectrum of primary complex secondary and tertiary emotions Written by leading social theorist Warren D TenHouten this book presents an encyclopaedic classification of the emotions describing forty six emotions in detail and presenting a general multilevel theory of emotions and social life The scope of coverage of this key work is highly topical and comprehensive and includes the development of emotions in childhood symbolic elaboration of complex emotions emotions management violence and cultural and gender differences While primary emotions have clearly defined valences this theory shows that complex emotions obey no algebraic law and that all emotions have both creative and destructive potentialities **The Unification Church: Outreach** Michael L. Mickler,1990 **The Cultural Revolution on Trial** Alexander C. Cook,2016-11-07 Introduction Indictment Monsters Testimony Emotions Verdict Vanity Conclusion Index of Chinese terms **New Essentials of Unification Thought: Head-Wing Thought** Sang Hun Lee,2014-04-25 Unification Thought is the philosophy derived from the Divine Principle of the Reverend Sun Myung Moon It is a powerful key that is capable of solving any problem no matter how difficult it might be This Thought presents a new view of life of the world of the universe and God s work in history It is a principle of integration that can bring different religious doctrines and

philosophies into unity while preserving their diverse characteristics **Time and Society** Warren D.

TenHouten, 2015-05-11 Time consciousness long a shared objective of philosophy and social thought is key to understanding different cultures and their cognitive adaptation to one another Warren D TenHouten's remarkable book achieves this goal by providing a bold and original three level theory of time consciousness its neurocognitive basis and social organization Using classical and contemporary ethnographies of Australian Aborigines and Euro Australians to support his theory TenHouten shows how involvement in hedonic sociality emphasizing equality and community leads to time that is cyclical present oriented and more generally natural whereas agonistic sociality based on inequality and agency leads to time that is linear future oriented and more generally rational **Education and Values in Developing Nations** John Oxenham, 1989

Adolescence: An Ethological Perspective Ritch C. Savin-Williams, 2012-12-06 Books on adolescence have been written for a variety of purposes Hall's 1904 two volume Adolescence encompasses most of them to advocate a particular theoretical approach to adolescence to stimulate use of a particular brand of scientific methodology when studying youth to address issues of the basic nature and importance of adolescence and to propose recommendations on how adolescents ought to be treated and educated In Hall's words It the two volumes constitutes the first attempt to bring together the various aspects of its vast and complex theme xix a full survey of pedagogic matter and method This is necessary because In no psychic soil too does seed bad as well as good strike such deep root grow so rankly or bear fruit so quickly or so surely xviii xix Mead 1928 retorted with Coming of Age in Samoa a refutation of Hall's conclusions Are the disturbances which vex our adolescents due to the nature of adolescence itself or to the civilization Under different conditions does adolescence present a different picture p II Thus Mead wanted to correct a theoretical injustice and to promote the impact that culture has on the developing adolescent personality Hollingshead's 1949 Elmtown's Youth was produced to further support Mead's conclusions Is the social behavior of an adolescent a function of physiological changes in the maturing individual or of his experiences in society p 6 His answer was clearly the latter specifically the family's economic and social status within Elmtown's social structure

Social Fabrics of the Mind Michael R.A. Chance, 2015-06-19 Originally published in 1988 this book outlines a new evolutionary paradigm for understanding human society and mental structure originating from the editor's work in primate ethology It is supported and further elaborated by the contributors Chance argues that two modes of social interaction the agonistic and hedonic underlie social life and corresponding mentality In the agonistic mode we are concerned with self security and our attention is much taken up with being accepted by a group This mode is based on a recently discovered state of inhibited braked mental arousal Social behaviour is either authoritarian or authority subservient and has a tendency to control or be controlled It curbs intelligence and restricts personality development In the hedonic mode we are freer to form a network of personal relationships that are typically mutually supportive The hedonic mode leads to the development of self confidence and a relaxed empathic and collaborative personality with intelligence enhanced The volume will still be of

interest to all concerned with human affairs including those working in ethology primatology anthropology social psychology psychiatry and political sociology

The Devil and the Revolution Cristian Derosa, 2025-01-17

The book *The Devil and the Revolution* by Cristian Derosa presents a deep and provocative analysis of historical revolutions and their spiritual and cultural roots. From a Christian and traditionalist perspective, the author argues that the revolutions that have marked the past centuries are not isolated or spontaneous events but part of a continuous and intentional project. This project, according to Derosa, has the ultimate goal of dismantling divine order and establishing a new era based on anti-Christian principles. The central thesis of the book is that the revolutionary spirit present since Lucifer's fall manifests itself in human history through heresies, cultural movements, and political events. Derosa connects historical episodes such as the Protestant Reformation, the French Revolution, and Communism to a spiritual dynamic opposing the Catholic Church and divine hierarchy. He views these revolutions as stages in a continuous process driven by the idea of egalitarianism and the rejection of divine laws. Derosa's narrative is grounded in a detailed historical analysis that combines cultural, social, and theological elements. He identifies five major historical revolutions, each representing a step forward in the revolutionary project. The Protestant Reformation is considered the first revolution, described as the initial rupture with the unity of the Church and the introduction of the concept of individual spiritual freedom. The French Revolution, on the other hand, is portrayed as the second stage in which egalitarianism and anticlericalism gain momentum, culminating in the explicit rejection of Church authority and the adoption of Enlightenment ideals. However, it is in his analysis of Communism and subsequent revolutions that the book reveals its most alarming dimension. Derosa describes Communism as the third great stage, marked by the denial of God and the attempt to create a new man in the image of materialist ideologies. He argues that cultural Marxism and modern hedonism are outcomes of the subsequent stages, representing the penetration of the revolutionary spirit into the most intimate structures of society and the individual, forming the basis of what he calls the fourth and fifth revolutions. The author extensively uses theological references to support his views, such as the biblical prophecy in Genesis 3:15 which announces the eternal conflict between the Woman's offspring and the Serpent's. This spiritual battle, he argues, permeates human actions and is reflected in major revolutionary transformations. The book also explores the role of Gnostic ideas as the matrix of revolutions. Derosa argues that Gnosticism, with its emphasis on knowledge as the path to salvation and its rejection of divine order, is the spiritual root of revolutionary thought. He draws parallels between ancient heresies and modern movements, showing how egalitarianism, moral relativism, and the cult of individual freedom are rooted in Gnostic principles. Derosa offers a striking interpretation of historical events, often appealing to the notion of a spiritual conspiracy led by malevolent forces. He also emphasizes the role of the Catholic Church as the primary barrier against the advance of the revolutionary project, highlighting the importance of spiritual and cultural resistance. In summary, *The Devil and the Revolution* is a work that invites reflection on the foundations and consequences of major historical transformations. By connecting revolutionary events to a spiritual and eschatological

perspective Derosa offers a unique and provocative vision intended to challenge both Christian readers and secular critics More than just a historical analysis it is a book that proposes a philosophical and theological interpretation of the course of humanity 日本基督教団 (Japan),1900 日本基督教団,1990 Challenging Religion James A. Beckford,James T. Richardson,2003-09-02 In the last half century new religious movements or cults of one sort and another have mushroomed throughout the US and Europe Increasingly these groups have been met with attempts to monitor and control them on the part of the state and concerns about the protection of religious consumers have been set against the democratic right to religious freedom In this collection leading sociologists of religion from the UK US Western and Eastern Europe debate the political practical and ethical issues which arise from these changes in the religious landscape **The Unification Church in America** Michael L. Mickler,1987 Aspects of Doctoral Research at the Maryvale International Catholic Institute (Volume One) Andrew B. Morris,2019-04-04 Established at Old Oscott in Birmingham England in 1980 the Maryvale Institute provides a variety of part time and distance learning courses to the lay faithful consecrated religious and ministers of the Roman Catholic Church Maryvale s doctoral research programme in Catholic Studies is conducted in collaboration with and accredited by Liverpool Hope University Successful students receive an award of a Doctor of Philosophy PhD degree from the University This book is concerned with the outcomes of that doctoral research programme It provides an overview of the breadth of work by its students in the UK USA and Africa and their contribution to new knowledge in the area of Catholic studies a wide field including history literature philosophy spirituality and theology

Rhetoric of the Chinese Cultural Revolution Xing Lu,2020-08-05 A startling look at revolutionary rhetoric and its effects Now known to the Chinese as the ten years of chaos the Chinese Cultural Revolution 1966 76 brought death to thousands of Chinese and persecution to millions In Rhetoric of the Chinese Cultural Revolution Xing Lu identifies the rhetorical practices and persuasive effects of the polarizing political language and symbolic practices used by Communist Party leaders to legitimize their use of power and violence to dehumanize people identified as class enemies Lu provides close readings of the movement s primary texts political slogans official propaganda wall posters and the lyrics of mass songs and model operas She also scrutinizes such ritualistic practices as the loyalty dance denunciation rallies political study sessions and criticism and self criticism meetings Lu enriches her rhetorical analyses of these texts with her own story and that of her family as well as with interviews conducted in China and the United States with individuals who experienced the Cultural Revolution during their teenage years In her new preface Lu expresses deep concern about recent nationalism xenophobia divisiveness and violence instigated by the rhetoric of hatred and fear in the United States and across the globe She hopes that by illuminating the way language shapes perception thought and behavior this book will serve as a reminder of past mistakes so that we may avoid repeating them in the future Artistic and Intellectual Practices in Contemporary China Carol Yinghua Lu,2025-01-20 This edited volume is the first internationally available English translation of key lectures

and essays delivered at Beijing's Inside Out Art Museum over the past decade. The book elevates a chorus of voices from domestic and international intellectuals, artists, curators, and historians in a dialogue that reframes Chinese art from 1949 to the present. Part I offers critical academic complications of the story of Chinese art from the 1950s to the present as one singularly defined and stifled by political revolution. It traces important continuities and early examples of contemporary art practice to the Party's birth and consolidation of power from the 1920s onwards. It relates the formation of contemporary art to the historical course of intellectual practice in China from 1949. Part II proposes China as an issue requiring historical interrogation rather than an inviolable entity. It questions the efficacy of Asia as a term, presents case studies of independent publishers that challenged tightly crafted historical narratives, and wraps up with incisive reflections on the challenges confronting creatives and historians in China today. With chapters ranging from peer-reviewed scholarship to cuttingly humorous personal anecdotes, its contributing authors give rare first-hand accounts of navigating pertinent historical and current situations, including censorship, China's illiberalism, and COVID-19. This book offers readers an ear to heretofore closed-door conversations in leading modern and contemporary art spaces.

Handbook of Contemporary Behavioral Economics Morris Altman, 2006. This groundbreaking handbook of original works by leading behavioral economists is the first comprehensive articulation of behavioral economics theory. At a time when conventional approaches have failed to resolve key economic concerns, the book provides a provocative alternative view of how economic decisions are actually made.

Physics and Politics in Revolutionary Russia Paul R. Josephson, 2023-09-01. Aided by personal documents and institutional archives that were closed for decades, this book recounts the development of physics or more aptly, science under stress in Soviet Russia up to World War II. Focusing on Leningrad, center of Soviet physics until the late 1930s, Josephson discusses the impact of scientific, cultural, and political revolution on physicists' research and professional aspirations. Political and social revolution in Russia threatened to confound the scientific revolution. Physicists, eager to investigate new concepts of space, energy, light, and motion, were forced to accommodate dialectical materialism and subordinate their interests to those of the state. They ultimately faced Stalinist purges and the shift of physics leadership to Moscow. This account of scientists cut off from their Western colleagues reveals a little-known part of the history of modern physics. Aided by personal documents and institutional archives that were closed for decades, this book recounts the development of physics or more aptly, science under stress in Soviet Russia up to World War II. Focusing on Leningrad, center of Soviet physics, un
