Auping, 1989 **Abstraction-Geometry-Painting**, 1989 **Abstraction, Geometry, Painting** Michael Auping, 1989 The first book to fully explore the diverse perspectives that have formed one of the most significant developments in postwar American art geometric abstract painting Heavily influenced by the radical geometry of Piet Mondrian the American Abstract Artists group of the 1930s and 1940s and the geometric side of Abstract Expressionism geometric abstraction has had a profound and controversial effect since it first came to America in the mid 1940s Reproduced here are 81 illustrations including 55 in full colour by 25 of the most important artists to work in America Michael Auping's essay traces the evolution of the movement and places it in relation to a larger twentieth century tradition Illuminating statements by the artists accompany reproductions and a comprehensive bibliography for each artist including a list of one person and group exhibitions rounds out the volume **INSIDE COVER JACKET** **The Collected Essays and Criticism, Volume 3** Clement Greenberg, 1986 Clement Greenberg is widely recognized as the most influential and articulate champion of modernism during its American ascendancy after World War II the period largely covered by these highly acclaimed volumes of *The Collected Essays and Criticism Volume 3 Affirmations and Refusals* presents Greenberg's writings from the period between 1950 and 1956 while *Volume 4 Modernism with a Vengeance* gathers essays and criticism of the years 1957 to 1969 The 120 works range from little known pieces originally appearing in *Vogue* and *Harper's Bazaar* to such celebrated essays as *The Plight of Our Culture* 1953 *Modernist Painting* 1960 and *Post Painterly Abstraction* 1964 Preserved in their original form these writings allow readers to witness the development and direction of Greenberg's criticism from his advocacy of abstract expressionism to his enthusiasm for color field painting With the inclusion of critical exchanges between Greenberg and F R Leavis Fairfield Porter Thomas B Hess Herbert Read Max Kozloff and Robert Goldwater these volumes are essential sources in the ongoing debate over modern art For each volume John O Brian has furnished an introduction a selected bibliography and a brief summary of events that places the criticism in its artistic and historical context **Mathematics Education and Philosophy** Paul Ernest, 2003-09-02 Currently there is a great deal of interest in philosophical issues in the teaching and learning of both mathematics and science education In this book Ernest has collected together papers from the foremost researchers and practitioners in the philosophy of mathematics education and related areas together with a selection of papers from the International Congress of Mathematics Education held in Quebec in 1992 Throughout the outstanding feature of the collection is its multidisciplinary approach to the field of study This book is the second in Paul Ernest's *Studies in Mathematics Education* series *Mondrian's Dress* Nancy J. Troy, Ann Marguerite Tartsinis, 2023-10-24 An extraordinary look at how the style of Piet Mondrian's abstract paintings was posthumously appropriated by 1960s fashion Pop art and consumer culture Yves Saint Laurent's 1965 Mondrian dresses are

among the twentieth century's most celebrated and recognizable fashions but the context of their creation involves much more than meets the eye. In *Mondrian's Dress* Nancy J. Troy and Ann Marguerite Tartsinis offer a fresh approach to the coupling of Piet Mondrian's interwar paintings with Saint Laurent's couture designs by exposing the rampant merchandising and commodification that these works experienced in the 1960s. The authors situate the consolidation of Saint Laurent's fashion brand alongside the work of such Pop artists as Roy Lichtenstein, Andy Warhol, and Tom Wesselmann and show how conventional understandings of Mondrian's avant-garde abstractions were transformed by the mass circulation of his signature style. Beyond its attention to 1960s fashion, Pop art, and consumer culture, *Mondrian's Dress* offers critical assessments of Saint Laurent's so-called dialogue with art, the remarkable art collection that he built with his partner Pierre Berge, and the crucial role that photography plays in the marketing of couture. The first book-length study of its kind, *Mondrian's Dress* is a provocative reevaluation of how art, commerce, and fashion became fundamentally intertwined in the postwar period.

It's Abstraction, Concretely John McGreal, 2017-02-21. John McGreal's three new books: *It's Abstraction, Concretely*, *It's Figuration, Groundly*, and *It's Representation*. Really continue the *It* Series published by Matador since 2010. They constitute another stage in an artistic journey exploring the visual and audial dialectic of mark, word, and image that began over 25 years ago. Emerging out of the first books on the Bibliograph published in 2016, initiated with *It's Nothing Seriously*, these new texts retain some of the same structural features. The Bibliographs contain the same focus on repetition and variation in meaning of their dominant motifs of representation, abstraction, and figuration, which have framed philosophical discourse on epistemology and ontology in aesthetics. Their chance placement in each Bibliograph, interspersed with one another, displaying and enhancing similarities and differences. At the same time, these works constitute a development in the aesthetic form of the Bibliograph. In earlier works on *Nothing*, *Absence*, and *Silence*, it was just a question of finding and transferring given textual references from their source to construct their Bibliographs, with the focus being on the strategic position of the latter within each book. In these new works, the concern has been with working on the line and shape of the references themselves, with their enhanced spatial form as well as that of each Bibliograph as a whole. In shaping and spacing the referential images, the place of words and letters became as important as their semantic to read in a new way on diverse contemporary issues across conventional boundaries in the arts and sciences at several levels of physical, psychological, and social reproduction.

Irene Rice Pereira Karen A. Bearor, 2011-07-06. Artist Irene Rice Pereira was a significant figure in the New York art world of the 1930s and 1940s who shared an interest in Jungianism with the better-known Abstract Expressionists and with various women artists and writers seeking archetypal imagery. Yet her artistic philosophy and innovative imagery elude easy classification with her artistic contemporaries. In consequence, her work is rarely included in studies of the period and is almost unknown to the

general public This first intellectual history of the artist and her work seeks to change that Karen A Bearor thoroughly re creates the artistic and philosophical milieu that nourished Pereira s work She examines the options available to Pereira as a woman artist in the first half of the twentieth century and explores how she used those options to contribute to the development of modernism in the United States Bearor traces Pereira s interest in the ideas of major thinkers of the period among them Spengler Jung Einstein Cassirer and Dewey and shows how Pereira incorporated their ideas into her art And she demonstrates how Pereira s quest to understand something of the nature of ultimate reality led her from an early utopianism to a later interest in spiritualism and the occult This lively intellectual history amplifies our knowledge of a time of creative ferment in American art and society It will appeal to a wide range of readers interested in the modernist period **The**

Mobile Image from Watteau to Boucher David Pullins,2024-08-13 This book provides a new way of thinking about eighteenth century French art and visual culture by prioritizing production over reception Abandoning the ideologically driven discourse that distinguished fine from decorative art between the 1690s and 1770s The Mobile Image reveals how the two have been inextricably bound from the earliest stages of artistic instruction through the daily life of painters workshops In this study author David Pullins defines artisanal and artistic means of learning seeing and making through a system of mobile images motifs that were effectively engineered for mobility and designed never to be definitive always awaiting replication and circulation He examines the careers of Antoine Watteau Jean Baptiste Oudry and François Boucher situating them against a much broader cast of actors such as printmakers publishers anonymous studio assistants and architects among others to place eighteenth century painting within a wider context of media and making **George Johnson** George
