Academic Economics In Holland 1800187:

The Economic Consequences of the Dutch Christiaan van Bochove, 2008 Between 1550 and 1800 the Northern Netherlands went through a period of intense economic development This did not leave the surrounding regions untouched International trade blossomed tens of thousands of foreign workers found employment in the Netherlands and many millions of guilders were channelled abroad to finance foreign commercial undertakings and government policies This book offers the first systematic analysis of the international impact of Dutch economic development and investigates the economic consequences of Dutch dominance in the areas bordering the North Sea By using a wide variety of sources and literature Christiaan van Bochove describes the international flows of goods people and money focussing attention on the effects on the prices of everyday goods the wages of labourers and interest rates This book shows how by the end of the eighteenth century the development of the Dutch economy had turned the North Sea region into an integrated spatial economy that operated at the frontier of what was technologically and institutionally possible

Bourgeois Dignity Deirdre Nansen, 2010-11-15 The big economic story of our times is not the Great Recession It is how China and India began to embrace neoliberal ideas of economics and attributed a sense of dignity and liberty to the bourgeoisie they had denied for so long The result was an explosion in economic growth and proof that economic change depends less on foreign trade investment or material causes and a whole lot more on ideas and what people believe Or so says Deirdre N McCloskey in *Bourgeois Dignity* a fiercely contrarian history that wages a similar argument about economics in the West Here she turns her attention to seventeenth and eighteenth century Europe to reconsider the birth of the industrial revolution and the rise of capitalism According to McCloskey our modern world was not the product of new markets and innovations but rather the result of shifting opinions about them During this time talk of private property commerce and even the bourgeoisie itself radically altered becoming far more approving and flying in the face of prejudices several millennia old The wealth of nations then didn't grow so dramatically because of economic factors it grew because rhetoric about markets and free enterprise finally became enthusiastic and encouraging of their inherent dignity An utterly fascinating sequel to her critically acclaimed book *The Bourgeois Virtues* *Bourgeois Dignity* is a feast of intellectual riches from one of our most spirited and ambitious historians a work that will forever change our understanding of how the power of persuasion shapes our economic lives

The present study is based on research largely pursued in Holland from December 1956 until July 1957. The inquiry is centered around the development of academic economics in Holland between 1800 and 1870. This period suggested itself as an appropriate unit of time though it became necessary to extend the specified period in certain parts of the study. Reasons for the temporal delimitation of the investigation will become apparent as will the reasons for concentrating on academic economics. Financial assistance from the Rockefeller Foundation helped to make possible the field research carried out in The Netherlands. Most of the material incorporated into the study was found in the following Dutch libraries: Bibliotheek der Nederlandsche Economische Hoogeschool Rotterdam, Economische Historische Bibliotheek Amsterdam, Universiteitsbibliotheek van Amsterdam, Handels Economische Bibliotheek Amsterdam and Koninklijke Bibliotheek Den Haag. The study was greatly enhanced by suggestions and kind assistance from a number of librarians in charge of the above libraries. I further wish to acknowledge cooperation of Professors H. Van Stuijvenberg, I. J. Brugmans, A. M. De Jong, P. Hennipman, G. M. Verrijn Stuart and F. De Vries who helped to direct my explorations when sources on Dutch economics were largely unfamiliar to me. Helpful advice and suggestions were supplied also by Drs G. Koen, Drs J. H. De Vries and Drs H. H. Behrens.

Academic Economics in Holland 1800-1870 Irene Hasenberg Butter, 1969 **Academic Economics in Holland, 1800-70** Irène Hasenberg Butter, 1969 **Politics in the Dutch Economy** Bart Snels, 1999

In the first half of the seventeenth century the Dutch Republic emerged as one of Europe's leading maritime powers. The political and military leadership of this small country was based on large scale borrowing from an increasingly wealthy middle class of merchants, manufacturers and regents. This volume presents the first comprehensive account of the political economy of the Dutch republic from the sixteenth to the early nineteenth century. Building on earlier scholarship and extensive new evidence it tackles two main issues: the effect of political revolution on property rights and public finance and the ability of the nation to renegotiate issues of taxation and government borrowing in changing political circumstances.
