Academic Death:

Gypsy Scholars, Migrant Teachers and the Global Academic Proletariat Rudolphus Teeuwen, Steffen Hantke, 2007 Once adjunct teaching was considered a temporary solution to faculty shortages in institutions of higher education Now it a permanent and indispensable feature of such institutions not just in the U S but worldwide This book takes stock of this new development concentrating primarily on the situation in the humanities It looks at its impact on the lives of the highly educated scholars and teachers from many parts of the world scholars waking up to the sobering fact that higher education presents them with a two tiered labour market in which they themselves are permanently barred from moving up to the higher tier To them being an adjunct teacher means experiencing frustration and humiliation All essays in this book offer personal accounts of adjuncts experiences together with critical reflections on institutional conditions and suggestions for their improvement In turn defiant poignant analytical exasperated and sardonic these essays are always incisive and revealing Their inside view a view from below shows higher education as a world different from how it appears to tenured professors and university administrators different from that presented in most college brochures For all those who care about the current state and the future of higher education no matter if they are teachers scholars students parents or administrators this book will offer valuable insights into the working world of academic teaching BOOK JACKET

research **CALL for widening participation: short papers from EUROCALL 2020** Karen-Margrete Frederiksen, Sanne Larsen, Linda Bradley, Sylvie Thouësny, 2020-12-14 Despite the Covid 19 pandemic the EUROCALL society succeeded in holding the 28th EUROCALL conference EUROCALL2020 on 20-21 August as an online two day gathering. The transition process required to make this happen was demanding and insightful for everyone involved and in many ways a logical consequence of the core content and purpose of EUROCALL. Who would be better suited to transform an onsite conference into an online event than EUROCALL? CALL for widening participation was this year's theme. We welcomed contributions from both theoretical and practical perspectives in relation to the many forms and contexts of CALL. We particularly welcomed longitudinal studies or studies that revisited earlier studies. The academic committee accepted 300 abstracts for paper presentations, symposia, workshops and posters under this theme. 57 short papers are published in this volume. We hope you will enjoy reading this volume, the first one to reflect a one hundred percent online EUROCALL conference.

Online Gathering **Medical Press and Circular**, 1887 *The War on Learning* Elizabeth Losh, 2024-02-06 An examination of technology based education initiatives from MOOCs to virtual worlds that argues against treating education as a product rather than a process. Behind the lectern stands the professor deploying course management systems, online quizzes, wireless clickers, PowerPoint slides, podcasts and plagiarism detection software. In the seats are the students armed with smartphones, laptops, tablets, music players and social networking. Although these two forces seem poised to do battle with each other, they are really both taking part in a war on learning itself. In this book Elizabeth Losh examines current efforts to reform higher education by applying technological solutions to problems in teaching and learning. She finds that many of these initiatives fail because they treat education as a product rather than a process. Highly touted schemes, video games for the classroom, for example, or the distribution of iPads let students down because they promote consumption rather than intellectual development. Losh analyzes recent trends in postsecondary education and the rhetoric around them, often drawing on first person accounts. In an effort to identify educational technologies that might actually work, she looks at strategies including MOOCs, massive open online courses, the gamification of subject matter, remix pedagogy, video lectures from Randy Pausch to the Baked Professor and educational virtual worlds. Finally, Losh outlines six basic principles of digital learning and describes several successful university based initiatives. Her book will be essential reading for campus decision makers and for anyone who cares about education and technology.

Loser Sons Avital Ronell, 2012-01-30 There are sons who grow up unhappily believing that no matter what they do they cannot please their fathers. Often unable to shed their sense of lifelong failure, either they give up and suffer in a permanent sulk or they try with all their might to prove they are worth something after all. These are the loser sons, a group of historical men as varied as President George W. Bush, Osama bin Laden and Mohammed Atta. Their names quickly illustrate that not only are their problems serious but they also make serious problems for others, expanding to whole nations. When God is conceived and inculcated as an angry and impossible to please father, the problems

can last for generations In *Loser Sons* Avital Ronell draws on current philosophy literary history and political events to confront the grim fact that divested boys become terrifying men This would be old news if the problem didn't recur so often with such disastrous consequences Looking beyond our current moment she interrogates the problems of authority paternal fantasy and childhood as they have been explored and exemplified by Franz Kafka Goethe's *Faust* Benjamin Franklin Jean Fran ois Lyotard Hannah Arendt Alexandre Kojve and Immanuel Kant Brilliantly weaving these threads into a polyvocal discourse Ronell shows how with their arrays of powerful symbols ideologies of all sorts perpetuate the theme that while childhood represents innocence adulthood entails responsible cruelty The need for suffering preferably somebody else's has become a widespread assumption not only justifying abuses of authority but justifying authority itself Shockingly honest *Loser Sons* recognizes that focusing on the spectacular catastrophes of modernity might make writer and reader feel they're engaged in something important while in fact what they are engaged in is still only spectacle To understand the implications of her insights Ronell addresses them directly to her readers challenging them to think through their own notions of authority and their responses to it

Max Weber's 'Science as a Vocation' Peter Lassman, Irving Velody, Herminio Martins, 2023-05-31 Max Weber's lecture *Science as a Vocation* is a classic of social thought in which central questions are posed about the nature of social and political thought and action The lecture has often been taken to be a summation of Weber's thought It can also be argued that together with the responses of its admirers and critics it provides a focus for discussion of the nature of modernity and its political consequences and of the philosophical and political implications of the social or human sciences This volume provides a full clear revised translation of the lecture together with translations from the German of key contributions to the lively debate that followed its publication The book concludes with a substantial essay on the current significance of the lecture which discusses its relevance to the debates about the nature of science as a cultural phenomenon the disjunction between science and nature Weber's conception of the disenchantment of the world the division of scientific labour and the fundamental nature and place of sociology
