Academic Discourse and Critical Consciousness Patricia Bizzell, 1992-12-18 This collection of essays traces the attempts of one writing teacher to understand theoretically and to respond pedagogically to what happens when students from diverse backgrounds learn to use language in college Bizzell begins from the assumption that democratic education requires us to attempt to educate all students including those whose social or ethnic backgrounds may have offered them little experience with academic discourse Over the ten year period chronicled in these essays she has seen herself primarily as an advocate for such students sometimes called basic writers Bizzell's views on education for critical consciousness widely discussed in the writing field are represented in most of the essays in this volume But in the last few chapters and in the intellectual autobiography written as the introduction to the volume she calls her previous work into question on the grounds that her self appointment as an advocate for basic writers may have been presumptuous and her hopes for the politically liberating effects of academic discourse misplaced She concludes by calling for a theory of discourse that acknowledges the need to argue for values and pedagogy that can assist these arguments to proceed more inclusively than ever before The essays in this volume constitute the main body of work in which Bizzell developed her influential and often cited ideas Organized chronologically they present a picture of how she has grappled with major issues in composition studies over the past decade In the process she sketches a trajectory for the development of composition studies as an academic discipline

Academic Discourse across Cultures Igor Lakić, Milica Vuković, Branka Živković, 2015-09-10 Academic discourse has recently become a blooming field of research for linguists interested in genre and discourse analysis as well as pragmatics The methodology and conventions employed in academic discourse however vary across cultures to a certain degree and often represent obstacles for publishing in international journals for authors whose native language is not English as top journals tend to centre on the Anglo Saxon academic writing norms This is one of the major reasons why national academic discourses need to be linguistically profiled and studied and contrastively compared against these norms This volume contributes to this very objective by shedding light

on academic discourse as effectuated in various mostly Balkan countries and contrasts it against the corresponding western English discourse Furthermore academic discourse is studied through a variety of genres it can assume such as research articles conference proceedings and university lectures Through exploring the cultural differences in academic discourse and the standards of international academic writing this volume offers readers a chance to become better equipped in publishing abroad Opening with a chapter focusing on the general structure of research articles and national writing habits as a potential hindrance to publishing abroad the book goes on to study the rhetorical structure of the abstracts introductions and conclusions of research articles in linguistics economics and civil engineering The second part of the book deals with hedging contrastively studied in international and national journals with the following chapters studying cohesion as accomplished in academic writing Part three deals with the syntactic and semantic features of academic discourse This book will be of particular interest to linguists interested in genre and discourse analysis in general and academic discourse and will also appeal to scholars from other research backgrounds wishing to familiarise themselves with international and national academic conventions and thus overcome the hurdles relating to academic writing conventions when publishing abroad

Commonality and Individuality in Academic Discourse Maurizio Gotti, 2009 This volume explores the relationship between shared disciplinary norms and individual traits in academic speech and writing Despite the standardising pressure of cultural and language related factors academic communication remains in many ways a highly personal affair with active participation in a disciplinary community requiring a multidimensional discourse that combines the professional institutional social and individual identities of its members The first section of the volume deals with tensions involving individual collective values and the analysis of collective vs individual discursual features in academic discourse The second section comprises longitudinal investigations of the academic output of single scholars so as to highlight the individuality in their choices and the reasons for not conforming with the commonality of conventions shared by their professional community The third part deals with genres that are meant to impose commonality on the members of an academic community not only in the drafting of specialized texts but also when these are reviewed or evaluated for possible publication *Applicable Approaches to Analyzing Texts in Academic Discourse* Alireza Jalilifar, Alexanne Don, 2024-01-03 This book provides a comprehensive overview of approaches to problems of language learning aimed at graduate students and researchers interested in English for academic purposes Its primary focus is the complexity and nuances of academic writing such as phraseology nominalization thematicity and phrasal complexity features The book will clarify the issue of how language is used to communicate discipline related content viewed through the lens of linguistics as one of the human sciences Each chapter concludes with several tasks that enable users to substantiate what has been presented in that chapter The book primarily addresses non native speakers of English who are studying for master s and PhD qualifications through the medium of English however non native researchers may also find some chapters of the book useful for their underlying focus on

Discourse Analysis Ana Isabel MORENO, 2011-03-24 La publicación de este volumen representa un caso relativamente insólito. Un pequeño grupo de jóvenes investigadores de menos de treinta años convence a un grupo mucho más numeroso de la misma edad para celebrar en Salamanca la First Conference of Young Researchers on Anglophone Studies. El resultado es deslumbrante. No solo demuestran una gran capacidad organizativa sino que los resultados individuales de las aportaciones científicas son sobresalientes. Este volumen *Current Trends in Anglophone Studies* recoge una selección revisada de las propuestas presentadas en el Encuentro y gira en torno a una estructuración tripartita clásica: estudios culturales, lingüísticos y literarios. En ella caben todos aquellos que se mueven en el campo de los estudios anglofonos. Cada uno de estos campos podría haber sido suficiente para celebrar un congreso, pero parece razonable que en este tipo de encuentros tengan cabida todos. De ese modo, este volumen se convierte en un ejemplo de aproximación interdisciplinaria a los estudios anglofonos. Desde un punto de vista cuantitativo, los estudios culturales ocupan sin duda un espacio menor. Sin embargo, sobresale la variedad de temas tratados, así como la internacionalización de los autores dentro de este apartado. Estudiantes españoles e italianos acometen estudios relacionados con la música, la pintura, el cine, la traducción, la marginalidad social o el impacto de las nuevas tecnologías en la producción artística. Si no pareciera demasiado atrevido, podría decirse que estos jóvenes estudiosos irán más allá de lo que un día ya lejano pudieron imaginar Richard Hoggard o Raymond Williams. Los estudios aquí presentados reflejan sin duda la evolución que la propia sociedad ha experimentado en estos últimos cincuenta años y exploran la relación entre las prácticas culturales, la vida diaria y los contextos económicos, políticos e históricos. No es de extrañar que una gran parte de las contribuciones presentadas en este volumen se centren en el estudio de la lengua, ya que la demanda del inglés se ha incrementado de forma considerable en los últimos años. Sobresalen los análisis puramente filológicos y, sobre todo, los relacionados con el aprendizaje del inglés como segunda lengua. Por eso destacan estudios que contemplan rasgos morfológicos, léxicos o sintácticos. Sin embargo, el mayor número de participaciones hace referencia al ya citado aprendizaje del inglés como L2, tanto desde el análisis de materiales como desde la práctica oral o escrita. Las contribuciones literarias ofrecen una evaluación teórica formal e interpretativa de distintas tendencias desde perspectivas tanto interdisciplinares como interculturales. Cronológicamente, los estudios abarcan textos desde el siglo XVIII hasta nuestros días, con un acento especial en los autores más contemporáneos y en el género narrativo. En general, estos estudios se fijan en textos concretos y los analizan desde perspectivas culturales, sociológicas o psicológicas. Pero abundan menos las aproximaciones desde la teoría literaria, desde la técnica narrativa o como tal vez cabría esperar al tratarse de estudiantes tan jóvenes desde la aplicación de las nuevas tecnologías. Por el contrario, se repiten temas como los traumas heredados de la Guerra de Vietnam, las cicatrices del 11 de septiembre o los problemas de género. En definitiva, se trata de una selección de artículos claramente prometedora que transmite la seguridad de que el futuro de la Filología Inglesa está en buenas manos y podrá experimentar una positiva

evoluci n en los pr ximos a os Por todo ello hay que felicitar a todos los participantes individuales y sobre todo a los organizadores del evento y editores de este volumen que han demostrado una enorme capacidad de trabajo y de saber hacer

Cross-linguistic and Cross-cultural Perspectives on Academic Discourse Eija Suomela-Salmi, Fred Dervin, 2009 The goal of this volume is to examine academic discourse AD from cross linguistic and cross cultural perspectives The adjective Cross cultural in the volume title is not just limited to national contexts but also includes a cross disciplinary perspective Twelve scientific fields are under scrutiny in the articles One of the unique aspects of the volume is the inclusion of a variety of foreign languages English as a lingua franca Spanish French Swedish Russian German Italian and Norwegian Besides in several articles dealing with oral AD comparisons and parallels are also established with written AD The research methodologies used in the studies are varied and they offer an overview of the diversity and richness of approaches to AD All in all it is hoped that the volume appeals not only to young researchers but also to confirmed scholars interested in cross linguistic and cross cultural aspects of AD It will also be of interest to language teachers or teachers who are involved with e g international students and academic mobility
