The Acconia Survey A.J. Ammerman, 2017-07-05 Report of a key survey of archaeological sites in the southern toe of Italy to discover Neolithic sites and documenting prehistoric trade in obsidian **The Acconia Survey** A.J. Ammerman, 2017-07-05 Report of a key survey of archaeological sites in the southern toe of Italy to discover Neolithic sites and documenting prehistoric trade in obsidian *Sicily Before History* Robert Leighton, 1999 Sicily is the largest island in the Mediterranean Sea one of the most varied in appearance and least insular in terms of cultural development It has often been described as a meeting place of cultures where East meets West **Simulating Transitions to Agriculture in Prehistory** Salvador Pardo-Gordó, Sean Bergin, 2022-01-24 This book highlights new and innovative approaches to archaeological research using computational modeling while focusing on the Neolithic transition around the world The transformative effect of the spread and adoption of agriculture in prehistory cannot be overstated Consequently archaeologists have often focused their research on this transition hoping to understand both the ecological causes and impacts of this shift as well as the social motivations and constraints involved Given the complex interplay of socio ecological factors the answers to these types of questions cannot be found using traditional archaeological methods alone Computational modeling techniques have emerged as an effective approach for better understanding prehistoric data sets and the linkages between social and ecological factors at play during periods of subsistence change Such techniques include agent based modeling Bayesian modeling GIS modeling of the prehistoric environment and the modeling of small scale agriculture As more archaeological data sets aggregate regarding the transition to agriculture researchers are often left with few ways to relate these sets to one another Computational modeling techniques such as those described above represent a critical next step in providing archaeological analyses that are important for understanding human prehistory around the world Given its scope this book will appeal to the many interdisciplinary scientists and researchers whose work involves archaeology and computational social science Chapter The Spread of Agriculture Quantitative Laws in Prehistory is available open access under a Creative Commons Attribution 4.0 International License via [springer.com](https://www.springer.com) **Islands in Time** Mark Patton, 2013-01-11 Islands in Time explores the ecological and cultural development of prehistoric island societies It considers the prehistory of the Mediterranean and offers an explanation of the effects of isolation on the development of human communities Evidence is drawn from a broad range of Mediterranean islands including Cyprus Crete and the Cyclades Malta Lipari Corsica and Sardinia The Chora of Croton 1 Jon Morter, 2012-10-03 From 1974 to the present the Institute of Classical Archaeology ICA at the University of Texas at Austin has carried out archaeological excavations and surveys in ancient territories chorae in southern Italy This wide ranging investigation which covers a large number of sites and a time period ranging from prehistory to the Middle Ages has unearthed a wealth of new information about ancient rural economies and cultures in the region These discoveries will be published in two multivolume series Metaponto and Croton

This volume on the Neolithic settlement at Capo Alfiere is the first in the Croton series. The Chora of Croton 1 reports the excavation results of a remarkable Neolithic site at Capo Alfiere on the Ionian coast. Capo Alfiere is one of a very few early inhabitation sites in this area to have been excavated extensively with a full team of scientific specialists providing interdisciplinary studies on early farming and animal husbandry. It provides comprehensive documentation of the economy, material culture and way of life in the central Mediterranean in the sixth and fifth millennia BC. Most notable are the remains of a wattle and daub hut enclosed within a massive stone wall. Unique for this area, this well preserved structure may have been used for special purposes such as ritual as well as for habitation. The presence of Stentinello wares shows that the range of this pottery type extended further east than previously thought and casts new light on the development of ceramics in the area.

Written in Stone P. Nick Kardulias, Richard W. Yerkes, 2003-01-01. *Written in Stone: The Multiple Dimensions of Lithic Analysis* demonstrates the vitality of contemporary lithics analysis by examining material from a variety of geographical locations. This edited collection is primarily concerned with the link between craft production and social complexity, the nature of trade and the delineation of settlement patterns and manipulation of landscape. While deconstructing the present to reconstruct the past, each chapter incorporates a technological dimension shaped by the type of analysis utilized. Methods include microwear analysis which adds significant understanding of stone tool function to the identification of obsidian sources which illustrates the potential of lithic provenance studies for reconstructing trade. This book verifies and expands on the notion that lithics play an integral role in our understanding of past societies at all levels of complexity from Paleolithic hunter gatherers to archaic states.

Physics Methods in Archaeometry Società italiana di fisica, 2004. The role of exact sciences in connection with cultural heritage now is well established and a new scientific branch has been generated: Archaeometry. Literally, Archaeometry means measurement on ancient objects. It is a multidisciplinary field of investigations where the rigorous methods of exact sciences give a fundamental contribution to solving the problems associated with conservation and restoration as well as to the study itself of the cultural heritage. Archaeometry as a scientific research field involves interdisciplinary groups formed by scholars of the humanistic area together with scientists, physicists, chemists, mathematicians, biologists, engineers, etc. The primary justification for the need of involving exact sciences in the field which in the past traditionally has been exclusive of Art Historians must no doubt be found in the conservation and restoration activities. The second argument which in the public opinion justifies the involvement of science with the world of Art is the confidence that scientific methods are infallible in unmasking forgeries. But in our opinion the awareness of the central role of scientific methods as a support for philological and

Europe in the Neolithic A. W. R. Whittle, 1996-05-23. Dr Whittle reviews the latest archaeological evidence on Neolithic Europe from 7000 to 2500 BC. Describing important areas, sites and problems, he addresses the major themes that have engaged the attention of scholars: the transition from a forager lifestyle, the rate and dynamics of change and the nature of Neolithic society. He challenges conventional views, arguing that

Neolithic society was rooted in the values and practices of its forager predecessors right across the continent. The processes of settling down and adopting farming were piecemeal and slow. Only gradually did new attitudes emerge to time and the past, to the sacred realms of ancestors and the dead, to nature and to the concept of community. Unique in its broad and up to date coverage of long term processes of change on a continental scale, this completely rewritten and revised version of Whittle's *Neolithic Europe* a survey reflects radical changes in the evidence and in interpretative approaches over the past decade.

The Mediterranean Context of Early Greek History Nancy H. Demand, 2012-01-17. The Mediterranean Context of Early Greek History. Drawing extensively on the latest archaeological data from the entire Mediterranean basin, Nancy Demand offers a compelling argument for situating the origins of the Greek city state within a pan-Mediterranean network of maritime interactions that stretches back millennia. Jonathan Hall, University of Chicago. Nancy Demand's book is a remarkable achievement. Her Heraklian labors have produced stunning documentation of the consequences of the vast spectrum of interaction between the peoples surrounding the Mediterranean Sea from the Mesolithic into the Iron Age. Carol Thomas, University of Washington. Were the origins of the Greek city state, the polis, a unique creation of Greek genius? Or did their roots extend much deeper? Noted historian Nancy H. Demand joins the growing group of scholars and historians who have abandoned traditional isolationist models of the development of the Greek polis and cast their scholarly gaze seaward to the sparkling waters of the Mediterranean. The Mediterranean Context of Early Greek History reveals the role the complex interaction of Mediterranean cultures and maritime connections had in shaping and developing urbanization, including the ancient Greek city states. Utilizing and enhancing upon the model of the fantastic cauldron first put forth by Jean Paul Morel in 1983, Demand reveals how Greek city states did not simply emerge in isolation in remote country villages but rather sprang up along the shores of the Mediterranean in an intricate maritime network of Greeks and non-Greeks alike. We learn how early seafaring trade, such as the development of obsidian trade in the Aegean, stimulated innovations in the provision of food, the Neolithic Revolution, settlement organization, political form, materials for tool production, and concepts of divinity. With deep scholarly precision, The Mediterranean Context of Early Greek History offers fascinating insights into the wider context of the Greek city state in the ancient world.

In the Footsteps of the Etruscans Graeme Barker, Tom Rasmussen, 2023-10-12. In the Footsteps of the Etruscans describes the archaeology of the countryside within a ten km radius of the small town of Tuscania near Rome, throwing light on the unrecorded lives of the generations of farmers and shepherds who have lived there. What was the character of prehistoric settlement prior to Etruscan urbanization? How did urbanization

shape the lives of the ordinary Etruscans working the land hardly ever addressed in Etruscan archaeology What was the impact on these people of being absorbed into the expanding Roman empire and its globalised economic structures How did the empire's collapse and the subsequent emergence of the nucleated medieval village affect Tuscania's rural population The project's 7500 year archaeological history from the first farmers to those grappling with globalisation today contributes eloquently to our understanding of how Mediterranean peoples have constantly shaped their landscape and been shaped by it

Proportion and Structure of the Human Figure in Byzantine Wall-painting and Mosaic June Winfield, 1978 *The Oxford Handbook of Neolithic Europe* Chris Fowler, Jan Harding, Daniela Hofmann, 2015 The Neolithic a period in which the first sedentary agrarian communities were established across much of Europe has been a key topic of archaeological research for over a century However the variety of evidence across Europe and the way research traditions in different countries and languages have developed makes it very difficult for both students and specialists to gain an overview of continent wide trends The Oxford Handbook of Neolithic Europe provides the first comprehensive geographically extensive thematic overview of the European Neolithic from Iberia to Russia and from Norway to Malta offering both a general introduction and a clear exploration of key issues and current debates surrounding evidence and interpretation Chapters written by leading experts in the field examine topics such as the movement of plants animals ideas and people including recent trends in the application of genetics and isotope analyses cultural change from the first farming to the first metal artefacts domestic architecture subsistence material culture monuments and burial and other treatments of the dead In doing so the volume also considers the history of research and sets out agendas and themes for future work in the field The Archaeology of Measurement Iain Morley, Colin Renfrew, 2010-04-26 Explores the archaeological evidence for the development of measuring activities in numerous ancient societies and the implications of these discoveries **Journal of Field Archaeology** Association for Field Archaeology, 1993 **Environmental Issues in the Mediterranean** John B. Thornes, John Wainwright, 2004-03 The Mediterranean has been subject to changing human settlement and land use patterns for millennia This book reviews both physical and social aspects of this region in relation to its environment Archaeological Obsidian Studies M. Steven Shackley, 2013-06-29 This volume is the third in the Advances in Archaeological and Museum Science series sponsored by the Society for Archaeological Sciences SAS The purpose of this series is to provide summaries of advances in various topics in archaeometry archaeological science environmental archaeology preservation technology and museum conservation The SAS exists to encourage interdisciplinary collaboration between archaeologists and colleagues in the natural and physical sciences SAS members are drawn from many disciplinary fields However they all share a common belief that physical science techniques and methods constitute an essential component of contemporary archaeological field and laboratory studies The series editors wish to thank the reviewers of each of the chapters in this volume for their excellent comments and suggestions We also wish to thank Chriss Jones for her invaluable assistance in the preparation of the texts for

submission to the publisher xi Preface As noted in the introductory chapter this volume is the second major review of research progress in the study of archaeological obsidian An earlier book *Advances in Obsidian Glass Studies Archaeological and Geochemical Perspectives* appeared in 1976 A comparison of the treatment of topics reflected in this earlier work and that contained in this volume not only highlights important advances in the quality and depth of research on archaeological obsidian over more than a quarter of a century but also illustrates more generally some characteristics of developments in the archaeological science field in general

The Archaeology of Mediterranean Prehistory Emma Blake, A.
