This book provides a comprehensive analysis of the concept and market characteristics of the bancassurance phenomenon. It also evaluates the impact of banking risks associated with diversification into insurance business. *Dual Reporting for Equity and Other Comprehensive Income under IFRSs and U.S. GAAP* Francesco Bellandi, 2012-05-21 Under IFRS, US GAAP and the SEC rules and regulations, business enterprises must recognise, measure and disclose information regarding equity items on the face of the statement of financial position, other specific statements or in the notes to the financial statements. However, under both IFRS and US GAAP, there is no all-inclusive general standard on stockholders' equity. This book clarifies the process of reporting stockholders' equity in a manner which can be reconciled under all the relevant standards. Not only has the author addressed the informational needs of the players in the accounting industry, he has also drawn, based on his vast experience, practical implications of reporting under both standards.
