Principles and Practice of Semantic Web Reasoning Hans J. Ohlbach, Sebastian Schaffert, 2004-09-02 The best informal definition of the Semantic Web is maybe found in the May 2001 Scientific American article The Semantic Web Berners Lee et al which says The Semantic Web is an extension of the current Web in which information is given well defined meaning better enabling computers and people to work in cooperation People who work on the Semantic Web quite often base their work on the famous semantic web tower a product of Tim Berners Lee's inspiring drawing on whiteboards The lowest level is the level of character representation Unicode and the identification of resources on the Web URIs The highest level concerns

the problem of trusting information on the Web Somewhere in the middle of the tower is the logic level It addresses the problem of representing information on the Web in a way so that inference rules can derive implicit information from explicitly stated information The workshop Principles and Practices of Semantic Web Reasoning PPSWR 2004 addressed problems on this level It took place in September 2004 as a satellite event of the 20th International Conference on Logic Programming ICLP in St Malo France After PPSWR 2003 in Mumbai India it was the second workshop in this series This book contains the articles presented at the workshop Financial management: principles and practices Dr. Dhanraj Patil,2025-05-13
