Synthesis of Acetylenes, Allenes, and Cumulenes L. Brandsma, H. D.

Verkruisje,1981 **Acetylenes and Allenes** Thomas F. Rutledge,1969 Buch 2 *Synthesis of Acetylenes, Allenes and Cumulenes* L. Brandsma,1981 **Preparative Acetylenic Chemistry** L. Brandsma,2013-10-22 The first edition of Preparative Acetylenic Chemistry was published in 1971 as one of a series of laboratory manuals containing experimental procedures The book was used extensively by students during practical courses and laboratory research work and enabled procedures to be carried out by persons with relatively limited bench experience Discussions about their results have in many cases led to modified procedures or descriptions which have now been incorporated in this considerably revised and updated edition The new book contains a collection of some 250 experimental procedures on a scale of at least 0.1 molar for the preparation of a wide variety of compounds with a triple bond A number of procedures in the old edition have been omitted and replaced by others the subdivision and titling of the chapters and experiments have been changed and the indexes have been replaced by a type compound method index Some new and attractive methods have been included e.g. eliminations under phase transfer conditions and couplings under the influence of zero valent palladium compounds In a number of cases additional experiments have been described in order to give a more complete picture of the scope of the concerned methods This collection is based on almost 30 years active bench experience by the author and all the procedures have been checked at least once in the author's laboratory It will undoubtedly provide as much useful and practical assistance as did its predecessor **Aliphatic, Alicyclic and Saturated Heterocyclic Chemistry** W Parker,2007-10-31 Specialist Periodical Reports provide systematic and detailed review coverage of progress in the major areas of chemical research Written by experts in their specialist fields the series creates a unique service for the active research chemist supplying regular critical in depth accounts of progress in particular areas of chemistry For over 80 years the Royal Society of Chemistry and its predecessor the Chemical Society have been publishing reports charting developments in chemistry which originally took the form of Annual Reports However by 1967 the whole spectrum of chemistry could no longer be contained within one volume and the series Specialist Periodical Reports was born The Annual Reports themselves still existed but were divided into two and subsequently three volumes covering Inorganic Organic and Physical Chemistry For more general coverage of the highlights in chemistry they remain a must Since that time the SPR series has altered according to the fluctuating degree of activity in various fields of chemistry Some titles have remained unchanged while others have altered their emphasis along with their titles some have been combined under a new name whereas others have had to be discontinued The current list of Specialist Periodical Reports can be seen on the inside flap of this volume **Aliphatic Chemistry** A McKillop,2007-10-31 Specialist Periodical Reports provide systematic and detailed review coverage of progress in the major areas of chemical research Written by experts in their specialist fields the series creates a unique service for the active research chemist supplying regular critical in depth accounts of progress in particular areas of chemistry For over 80 years the Royal Society of Chemistry and its predecessor the Chemical Society have been publishing reports charting developments in chemistry

which originally took the form of Annual Reports However by 1967 the whole spectrum of chemistry could no longer be contained within one volume and the series Specialist Periodical Reports was born The Annual Reports themselves still existed but were divided into two and subsequently three volumes covering Inorganic Organic and Physical Chemistry For more general coverage of the highlights in chemistry they remain a must Since that time the SPR series has altered according to the fluctuating degree of activity in various fields of chemistry Some titles have remained unchanged while others have altered their emphasis along with their titles some have been combined under a new name whereas others have had to be discontinued

Base-Catalyzed Reactions of Hydrocarbons and Related Compounds Herman Pines, 2012-12-02

Base Catalyzed Reactions of Hydrocarbons and Related Compounds focuses on the use of bases as catalysts for the conversion of hydrocarbons and related compounds In order to emphasize the broad scope of base catalyzed reactions examples dealing with the conversion of non hydrocarbons are given Comprised of 14 chapters this book begins with a historical overview of base catalyzed conversions of hydrocarbons followed by a discussion on the isomerization of olefins acetylenes and allenes as well as the dimerization and oligomerization of hydrocarbons The reader is then introduced to a variety of reactions including those between aromatic hydrocarbons and olefins and between alkylpyridines and alkenylpyridines homogeneous carbon carbon addition reactions and reactions of aprotic solvents with olefins Subsequent chapters explore carbon carbon addition of olefins with miscellaneous compounds addition of ammonia amines and anilines to olefinic hydrocarbons hydrogenation and oxygenation dehydrogenation aromatization and hydrogen transfer and dehydration of alcohols This monograph will be of interest to chemists
