Auffrey,2013-04-17 I am both pleased and honored to introduce this book to readers and I want to take a few moments to explain why Michael Romanos and Christopher Auffrey have produced a volume which will be of immense value to several different types of people Planners and other specialists concerned with the development of the Southeast Asian region and the issues and opportunities associated with urban growth and sustainable development will find much to interest them in this book But the book I believe has much wider appeal and that is what I want to touch on briefly here The University of Cincinnati where Michael Chris and I work is attempting to globalize itself to develop its institutional capacity for international activities to infuse its curriculum with international themes and to promote and increase global competence among its graduates Many American universities are doing this of course In the process we are seeing some very interesting experiments in pedagogy as faculty look for learning moments in new and sometimes exotic places Michael Chris and their colleagues have it seems to me developed an outstanding model for learning across national and cultural boundaries In the chapters which follow you will read the results of their work What will be less apparent however is the process by which that work was produced
