political importance yet has received relatively little attention in academia Sustainable Development in World Investment Law Marie-Claire Cordonier Segger, Markus W. Gehring, Andrew Paul Newcombe, 2011-01-01 Sustainable development as defined by the World Commission on Environment and Development is development that meets the needs of the present without compromising the ability of future generations to meet their own needs More specifically sustainable development is a process of change that seeks to improve the collective quality of life by focusing on economically socially and environmentally sound projects that are viable in the long term Sustainable development requires structural economic change and the foundation of that change is investment In developing nations with low levels of domestic savings investment predictably comes from abroad in the form of foreign direct investment A large and ever expanding number of international investment agreements are in place to govern these transactions While these accords seek to foster development while mitigating the risk involved in these types investments many questions remain unresolved This highly insightful book reflects the contributions of a variety of world renowned experts each of which is designed to provide the reader with valuable perspective on recent developments in investment law negotiations and jurisprudence from a sustainable development law perspective It offers answers to pertinent questions concerning advancements in investment law including the negotiation of numerous regional and bilateral agreements as well as the increasing number of disputes resolved in the World Bank s International Centre for the Settlement of Investment Disputes ICSID from different developed and developing country perspectives It lays out future directions for new treaty negotiations and dispute settlement proceedings as well as ongoing investment promotion efforts against a background of rapidly evolving international relationships between economic environment and development law It focuses on key issues in investment laws which have emerged as priorities in the negotiation of bilateral and regional investment agreements and have been clarified through recent decisions of the ICSID and other arbitral panel awards Space Fostering Latin American Societies Annette Froehlich, 2023-06-16 This peer reviewed book presents a comprehensive overview of the role space is playing in enabling Latin America to fulfil its developmental aspirations Following on from the highly acclaimed Parts 1 to 3 it explains how space and its applications can be used to support the development of the full range and diversity of Latin America societies while being driven by Latin American goals The Latin American space sector is currently undergoing a phase of rapid and dynamic expansion with new actors entering the field and with space applications increasingly being used to support the continent s social economic and political development All across Latin America attention is shifting to space as a fundamental part of the continental development agenda and the creation of a Latin American space agency is evidence of this Additionally while in recent years significant advances in economic and social development have lifted many of Latin America s people out of poverty there is still much that needs to be done to fulfil the basic needs of the population and to afford them the dignity they deserve To this end space is already being employed in diverse fields of human endeavour to serve Latin America s goals for its future but

there is still a need for further incorporation of space systems and data This book will appeal to researchers professionals and students in fields such as space studies international relations governance and social and rural development *The Workbook* ,1994 **Addressing Global Environmental Security Through Innovative Educational Curricula** Susan Allen-Gil,Lia Stelljes,Olena Borysova,2008-12-03 As the importance of environmental security increases worldwide colleges and universities are evaluating how well they are preparing the next generation of environmental scientists and managers and developing new educational approaches In this volume we examine 1 current educational practices and the need for change 2 educational needs from the perspective of employers and professionals and 3 new practices in higher education in environmental fields The contributors were carefully selected by an international coordinating team based on their international reputations in the field of progressive educational approaches and understanding of the global employment market in environmental science Although the focal geographic areas are North America Europe and the former Soviet republics the ideas and strategies discussed are universal to all institutions of higher education We highlight specific non traditional approaches such as using the university as a curricular tool developing permaculture programs and applying sustainability pedagogy and document their success from both a student and employer perspective We also include case studies on risk assessment and eco efficiency education to illustrate why and how transdisciplinary education can be accomplished We conclude that it is imperative that our educational systems teach environmental security at the university level within a transdisciplinary context and that opportunities such as internships and other methods of applied learning are included in the curriculum Space Technology Export Controls and International Cooperation in Outer Space Michael Mineiro,2011-11-08 Export controls definitively impact international cooperation in outer space Civil and commercial space actors that engage in international endeavors must comply with space technology export controls In the general discourse members of the civil and commercial space community have an understanding of their domestic export control regime However a careful reading of the literature on space technology export controls reveals that certain questions relevant to international engagements have not been identified or answered What is the legal political origin of space technology export controls How do they relate to the current international legal structure What steps can be taken to evolve our current unilateral paradigm of space technology within the context of peaceful exploration and use of outer space In this book these and other relevant questions on space technology export controls are identified and assessed through an insightful case study of the U S commercial communication export control regime The findings of this case study are used in an international legal political analysis of international space law public international law and international cooperation Breaking new ground in international legal theory a self justified security dilemma that is manifest in international law is identified and explained as the origin for the current paradigm of space technology export controls **Hearings, Reports and Prints of the House Committee on International Relations** United States.
