## **Achieving Industrialization In East Asia:**

**Achieving Industrialization in East Asia** Helen Hughes, 1988-11-10 This book examines the economic success of the industrializing economies of East Asia Judged in terms of economic growth or by a combination of economic and welfare criteria this group of East Asian countries has established a clear lead over other developing areas of the world *The Newly Industrializing Economies of East Asia* Anis Chowdhury, Iyanatul Islam, 2005-08-09 The phenomenal success of the East Asian Newly Industrializing Economies NIEs of Korea Taiwan Hong Kong and Singapore is now well known and documented Their success has been discussed to such an extent that it has become entrenched as part of the folklore of development economics The Newly Industrializing Economies of East Asia takes a fresh look at the relevant literature and sifts the rhetoric from the reality In the course of surveying the vast range of writing two competing paradigms become clear the neo classical approach which interprets the East Asian economic miracle as the predictable outcome of good policies and the statist perspective which draws attention to the central role of the government in guiding East Asian economic development Throughout the book the authors mix country specific experiences with broader trends **Development Policy in East Asia** Romeo M. Bautista, 1992 The growth performance of East Asia s market economics over the two and half decades has been one of unparalleled success In this regional comparative study of country experiences the author demonstrates the considerable scope for complementarity between economic growth and poverty alleviation in the development process Government policies are shown to have been a major determinant of the development path for the East Asian countries including the outcomes in income growth and distribution The study sheds light on the types of policies conducive to both economic growth and poverty reeducation and provides important lessons for the other developing countries *The Newly Industrialising Economies of East Asia* Anis Chowdhury, Iyanatul Islam, 1993 In surveying the vast range of writing on the East Asian NIEs and their development paths this book evaluates the competing roles of neo classical approaches and central government intervention in guiding economic development **Capitalist Development and Economism in East Asia** Kui-Wai Li, 2003-08-29 Taking a conceptual approach this book studies the economic development of the four East Asian economies since 1950 The author summarizes and reconsiders many of the arguments and findings that supported and explained the economic miracles of Hong Kong Singapore Taiwan and South Korea analysing the relationship between economic development growth and political economy This pioneering book will stimulate further analysis of East Asian development It will be of essential interest to scholars in East Asian economics and all those interested in modern economic development *The Making of Southeast Asia* Amitav Acharya, 2013-02-15 Developing a framework to study what makes a region Amitav Acharya investigates the origins and evolution of Southeast Asian regionalism and international relations He views the Association of Southeast Asian Nations ASEAN from the bottom up as not only a U S inspired ally in the Cold War struggle against communism but also an organization that reflects indigenous traditions

Although Acharya deploys the notion of imagined community to examine the changes especially since the Cold War in the significance of ASEAN dealings for a regional identity he insists that imagination is itself not a neutral but rather a culturally variable concept The regional imagination in Southeast Asia imagines a community of nations different from NAFTA or NATO the OAU or the European Union In this new edition of a book first published as *The Quest for Identity* in 2000 Acharya updates developments in the region through the first decade of the new century the aftermath of the financial crisis of 1997 security affairs after September 2001 the long term impact of the 2004 tsunami and the substantial changes wrought by the rise of China as a regional and global actor Acharya argues in this important book for the crucial importance of regionalism in a different part of the world **Trade, Development, and Political Economy in East Asia** Prema-Chandra

Athukorala, Arianto A. Patunru, Budy P. Resosudarmo, 2014-11-14 This volume is a tribute to Professor Hal Hill one of the most distinguished and internationally renowned Australian development economists and the single most important Australian figure in the networks that bind the Australian and Southeast Asian economics professions over the past four decades The volume contains twelve original contributions by distinguished scholars who are at the forefront of their own subject areas The contributions are thematically arranged into three parts to reflect Professor Hill's wide ranging research interests trade policy issues central to the development policy debate structural change and global economic integration in East Asian economies and the political economy of development policy *Behind East Asian Growth* Henry S. Rowen, 2002-11 A wide ranging interdisciplinary analysis of the evolution of successful economic policies in East Asia this study advances a thorough examination of the sustained economic growth enjoyed by the countries in this region *Africa, Asia, and South America Since 1800* A. Latham, 1995 A reference for graduate and undergraduate students presenting the bibliographic details and sometimes describing and evaluating the content of over 5 000 books in English most published since 1945 and many quite recently but also some earlier works of enduring importance A section of works on all three continents is followed by sections on each which first consider the continent as a whole then each country usually by chronological periods and topics such as economics politics and society Indexed only by author and editor but the table of contents is detailed enough to provide adequate access Distributed in the US by St Martin's Press Annotation copyright Book News Inc Portland Or

**Handbook of Alternative Theories of Economic Development** Erik S. Reinert, Jayati Ghosh, Rainer Kattel, 2016-09-28 The Handbook of Alternative Theories of Economic Development explores the theories and approaches which over a prolonged period of time have existed as viable alternatives to today's mainstream and neo classical tenets With a total of 40 specially commissioned chapters written by the foremost authorities in their respective fields this volume represents a landmark in the field of economic development It elucidates the richness of the alternative and sometimes misunderstood ideas which in different historical contexts have proved to be vital to the improvement of the human condition The subject matter is approached from several complementary perspectives From a historical angle the Handbook charts the mercantilist

and cameralist theories that emerged from the Renaissance and developed further during the Enlightenment From a geographical angle it includes chapters on African Chinese Indian and Muslim approaches to economic development Different schools are also explored and discussed including nineteenth century US development theory Marxist Schumpeterian Latin American structuralism regulation theory and world systems theories of development In addition the Handbook has chapters on important events and institutions including The League of Nations The Havana Charter and UNCTAD as well as on particularly influential development economists Contemporary topics such as the role of finance feminism the agrarian issue and ecology and the environment are also covered in depth This comprehensive Handbook offers an unrivalled review and analysis of alternative and heterodox theories of economic development It should be read by all serious scholars teachers and students of development studies and indeed anyone interested in alternatives to development orthodoxy

The Political Economy of East Asia Ming Wan,2007-10-17 For students of international political economy it is hard to ignore the growth dynamism and global impact of East Asia Japan and China are two of the largest economies in the world in a region now accounting for almost 30 percent more trade than the United States Canada and Mexico combined What explains this increasing wealth and burgeoning power In his new text Ming Wan illustrates the diverse ways that the domestic politics and policies of countries within East Asia affect the region s production trade exchange rates and development and are in turn affected by global market forces and international institutions Unlike most other texts on East Asian political economy that are essentially comparisons of major individual countries Wan effectively integrates key thematic issues and country specific examples to present a comprehensive overview of East Asia s role in the world economy The text first takes a comparative look at the region s economic systems and institutions to explore their evolution a rich and complex story that looks beyond the response to Western pressures Later chapters are organized around close examination of production trade finance and monetary relations While featuring extended discussion of China Japan South Korea and Taiwan Wan is inclusive in his analysis with coverage including Myanmar Thailand Laos Vietnam Cambodia Malaysia Singapore Indonesia Brunei and the Philippines The text is richly illustrated with more than fifty tables figures and maps that present the latest economic and political data to help students better visualize trends and demographics Each chapter ends with extensive lists of suggested readings

**How Asia Got Rich** Edith Terry,2015-05-20 Within a few short months in 1997 Asian economies that had been considered not only healthy but miraculous suddenly fell off a precipice as investors withdrew massively first from Asian currencies and in rapid order from equity markets across the region On October 27 1997 the turmoil in Asian markets spooked Wall Street in the largest single day decline in history a drop of 550 points It was predicted that the Asian crash

could drive the US trade deficit from 191 billion to 300 billion by 1998 creating huge new tensions in relations with some of the largest US trading partners These wrenching changes following a generation of success raise numerous questions about the steps that led to the crisis its likely outcome and the limits and constraints of Asian capitalism Edith Terry presents a blow by blow account of the crisis beginning with the 1996 collapse of the Bangkok Bank of Commerce In her overview she links the fall of the Asian miracle with the theme of globalization arguing that the crisis demonstrates the urgency of dismantling restraints to trade investment and financial services and that the United States should take leadership in pushing for new and sweeping reform through the World Trade Organization and in bilateral negotiations with its trading partners The final section of the book deals with the rise of the Asian miracle how the myth was created who created it why it succeeded for so long and is informed by analysis of the Japanese prototype The Economy of Modern India B. R. Tomlinson,2013-04-25 A unique examination of the development of the modern Indian economy over the past 150 years

**Trade, Growth and Development** Göte Hansson,2003-09-02 Since the end of the second world war the economic gap between rich and poor countries has steadily widened Trade Growth and Development examines this disparity and assesses the reasons why some developing countries have been more successful than others The book is divided into four parts Part I examines recent developments in the theory of trade growth and economic development Parts II to IV present an empirical analysis of policy and performance in Latin America Asia and Africa As well as offering an analysis of traditional economic factors the book also emphasises the role of politics and institutions in the process of economic development Institutional Change and Economic Development Ha-Joon Chang,2007-11-15 Institutional Change and Economic Development discusses not just theoretical issues but a diverse range of real life institutions political bureaucratic fiscal financial corporate legal social and industrial in the context of dozens of countries across time and space spanning Britain Switzerland and the USA in the past to Botswana Brazil and China today **Sovereign Wealth Funds and International Political Economy** Manda Shemirani,2016-12-05 For the first time Shemirani provides a systematic methodology for the study of Sovereign Wealth Funds SWFs over their life span and emphasizes the need for a paradigm shift in our approach towards the study of state capitalism Applied in this book to the world s four largest SWFs Government Pension Fund Global of Norway Abu Dhabi Investment Authority of the United Arab Emirates Temasek of Singapore and the National Wealth Fund of the Russian Federation this methodology can also be applied to other funds or form a basis for further analytical studies of SWFs In addition to its first hand approach the book addresses concerns about the lack of transparency by offering insights into the functioning and investment strategies of the selected SWFs Academics and students in international political economy international finance and international business as well as financiers business leaders and policy makers will find the subject and the approach of this book highly useful *State Building and Late Development* David Waldner,2018-05-31 Why does state building sometimes promote economic growth and in other cases impede it Through an analysis of political and

economic development in four countries Turkey Syria Korea and Taiwan this book explores the origins of political economic institutions and the mechanisms connecting them to economic outcomes David Waldner extends our understanding of the political underpinnings of economic development by examining the origins of political coalitions on which states and their institutions depend He first provides a political model of institutional change to analyze how elites build either cross class or narrow coalitions and he examines how these arrangements shape specific institutions state society relations the nature of bureaucracy fiscal structures and patterns of economic intervention He then links these institutions to economic outcomes through a bargaining model to explain why countries such as Korea and Taiwan have more effectively overcome the collective dilemmas that plague economic development than have others such as Turkey and Syria The latter countries he shows lack institutional solutions to the problems that surround productivity growth The first book to compare political and economic development in these two regions State Building and Late Development draws on and contributes to arguments from political sociology and political economy Based on a rigorous research design the work offers both a finely drawn comparison of development and a compellingly argued analysis of the character and consequences of precocious Keynesianism the implementation of Keynesian demand stimulus policies in largely pre industrial economies

**The Dynamics of Asian Economic Development** Hitoshi Hirakawa, Ferdinand C. Maquito, 2024-12-10 One feature of this book is the clarification of the development mechanism of Asia as a regional economy for over half a century based on an Asian Economy Within the Global Economy approach that goes beyond the single country analytical framework The development of emerging economies has caught the world's attention from the Newly Industrializing Countries or Newly Industrializing Economies of the 1980s to the BRICs entering this century General economics cannot clarify the internal mechanism of the changing of newly industrialized economies led by Asia This book clarifies such regional development structure by focusing on the direct investments of multinational firms and the importance of gradual changes of specific policies adopted by newly industrialized economies Moreover the book concretely deals with the US China trade war and China's Belt and Road Initiative BRI as a problem of Asian economies In so doing the book not only perceives the structural change of the global economy as a structural change from a US centric global economy of the twentieth century to a China centric one but also focuses on the birthing of a new growth frontier in the world economy under a crisis brought about by a war for hegemony between the US and China The investment initiative through China's BRI has prompted the investment competition between Japan and the US which has made even stronger the possibility of giving birth to a new economic frontier in Afro Eurasia Another feature is the consideration of various issues that confront Asian countries in their search for economic development using the Philippines as a case study The analysis of the study points to the importance of a shared growth perspective which is based on an Asian development model and discusses the challenge of overcoming the issues of the economic development model within the region At the same time this book studies the significance and new issues as a region of the economy and

overseas policies of attention drawer China      The New Political Economy of Southeast Asia Rajah Rasiah, Johannes Dragsbaek Schmidt, 2010-01-01 This well researched book examines the dramatic transformation of Southeast Asian countries from agricultural and mining economies to industrial nations In doing so it explores the effects of development policy on a number of interdisciplinary issues and the emergence of new social and political pressures created by industrialization These include their heightened vulnerability to complex economic crises their use of sophisticated instruments in the labour process and increased awareness of environmental issues The distinguished authors present a regional and cross border focus on transnational actors and institutions and the policy issues and problems which have a wider impact on spatial configurations in the region This insightful study will appeal to researchers academics and policymakers working on the economics and development of Southeast Asia
